Making and Changing Law in Small Jurisdictions Caroline Morris, 2024-03-12 This book puts the spotlight on a different and neglected aspect of law drafting and reform the question of size Specifically how does the size of a jurisdiction affect its ability to make and change its laws Some of the challenges affecting small jurisdictions include a lack of resources and paucity of policy drafting capacity the pressures and pull from sources outside the jurisdiction e.g. international bodies or NGOs larger states treaty commitments a vulnerability to domestic capture e.g. criminal elements big local businesses strong domestic lobby groups weak bad governance e.g. laws or institutions which themselves do not encourage or promote good governance reflection and reform the legacy of colonial legal systems and their interaction with indigenous or customary laws and struggles to comply with constitutional norms such as accountability and transparency Despite these difficulties small jurisdictions also have certain advantages when it comes to making and reforming law they can be flexible and creative they can legislate very quickly if the political will is there and there is strong informal formal accountability in a small jurisdiction This edited collection explores law reform and law drafting in small jurisdictions through the themes of sovereignty the

impact of colonialism and legal plurality the challenges of harmonising laws at regional and international levels and constitutional reform Of use to researchers and practitioners alike *Law-Making in the People's Republic of China* Jianfu Chen, Yuwen Li, Jan Michiel Otto, Maurice V. Polak, 2021-10-25 Who are the legislators and what are the products of the legislative process in China How does a law come into being What meaning should we ascribe to these legislative products from the perspective of legal certainty Can we recognise a Chinese approach to or style of law making What technical legislative problems have Chinese jurists identified and what sorts of solutions to them are being considered These are the questions which Law making in the PRC attempts to solve The volume opens with papers on the historical perspective of law making on ideology and law making and on a comparison between the PRC's legal framework and the frameworks of other legal systems Part II deals with various Institutions and Actors involved and offers analyses of the National People's Congress the State Council departmental rule making local law making law making in autonomous regions public participation and the proposed law on law making by academics Part III offers three case studies in which important areas of legal development are analysed from a law making point of view The selected areas are administrative law contract law and criminal law

Making Policy, Making Law Mark C. Miller, Jeb Barnes, 2004-08-23 The functioning of the U S government is a bit messier than Americans would like to

think The general understanding of policymaking has Congress making the laws executive agencies implementing them and the courts applying the laws as written as long as those laws are constitutional Making Policy Making Law fundamentally challenges this conventional wisdom arguing that no dominant institution or even a roughly consistent pattern of relationships exists among the various players in the federal policymaking process Instead at different times and under various conditions all branches play roles not only in making public policy but in enforcing and legitimizing it as well This is the first text that looks in depth at this complex interplay of all three branches The common thread among these diverse patterns is an ongoing dialogue among roughly coequal actors in various branches and levels of government Those interactions are driven by processes of conflict and persuasion distinctive to specific policy arenas as well as by the ideas institutional realities and interests of specific policy communities Although complex this fresh examination does not render the policymaking process incomprehensible rather it encourages scholars to look beyond the narrow study of individual institutions and reach across disciplinary boundaries to discover recurring patterns of interbranch dialogue that define and refine contemporary American policy Making Policy Making Law provides a combination of contemporary policy analysis an interbranch perspective and diverse methodological approaches that speak to a surprisingly overlooked gap in the literature dealing with the role of the courts in the American policymaking process It will undoubtedly have significant impact on scholarship about national lawmaking national politics and constitutional law For scholars and students in government and law as well as for concerned citizenry this book unravels the complicated interplay of governmental agencies and provides a heretofore in depth look at how the U S government functions in reality

Democracy in International Law-Making Salar Abbasi, 2021-12-20 This book provides a critique of current international law making and draws on a set of principles from Persian philosophers to present an alternative to influence the development of international law making procedure The work conceptualizes a substantive notion of democracy in order to regulate international law making mechanisms under a set of principles developed between the twelfth and seventeenth centuries in Persia What the author here names democratic egalitarian multilateralism is founded on the idea of egalitarian law by Suhrawardi the account of substantial motion by Mulla Sadra and the ideal of intercultural dialectical democracy developed by R m Following a discussion of the conceptual flaws of the chartered and customary sources of international law it is argued that democratic egalitarian multilateralism could be a source for a set of principles to regulate the procedures through which international treaties are made as well as a criterion for customary international law ascertainment Presenting an alternative drawn from a less dominant culture to the established ideas of international law making the book will be essential reading for researchers and academics working in public international law history of law legal theory comparative legal theory Islamic law and history
