*Making Construction Vehicles for Kids* Luc St-Amour,1995      **1001 Great Ideas for Teaching and Raising Children with Autism Spectrum Disorders** Ellen Notbohm,Veronica Zysk,2004 Contains 1001 suggestions for meeting the day to day challenges faced by children with autism spectrum disorders covering communication social issue behavior self care and other topics      **Library Journal** ,2001 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately      *The 160-Character Solution* Benjamin L. Castleman,2015-11-15 A fascinating study that brings the power of behavioral economics to how schools work how students learn and how we can help them succeed For decades schools have invested substantial resources in boosting educational outcomes for disadvantaged students but those investments have not always generated positive outcomes Although many communities have expanded school choice for example families often choose to keep their children in failing schools And while the federal government has increased the size of Pell Grants many college bound students who would be eligible for aid never apply Then there is the troubling trend of summer melt in which up to 40 percent of high school graduates who have been accepted to college mostly from underserved communities fail to show up for the fall semester In *The 160 Character Solution* Benjamin L Castleman shows how insights from behavioral economics the study of how social cognitive and emotional factors affect our decisions can be leveraged to help students complete assignments perform to their full potential on tests and choose schools and colleges where they are well positioned for success By employing behavioral strategies or nudges Castleman shows administrators teachers and parents can dramatically improve educational outcomes from preschool to college Castleman applies the science of decision making to explain why inequalities persist at various stages in education and to identify innovative solutions to improve students academic achievement and attainment By focusing on behavioral changes Castleman demonstrates that small changes in how we ask questions design applications and tailor reminders can have remarkable impacts on student and school success

**Complete Sourcebook on Children's Software** ,1999      *Engaging Children in Family Therapy* Catherine Ford Sori,2012-12-06 A common question at the initial meeting of a family therapist and a new client s is often whether or not to include a child or children in the counseling sessions The inclusion of a child in the family therapy process often changes the dynamic between client and therapist and between the clients themselves within the context of the counseling sessions And yet although this is such a common experience many counselors and family therapists are not adequately equipped to advise parents on whether to include a child in therapy sessions Once the child does make an appearance in the counseling session the therapist is faced with the challenges inherent in caring for a child in addition to many concerns due to the unique circumstance of the structured therapy Counseling a child in the context of a family therapy session is a specific skill that has not received the attention that it deserves This book is intended as a guide for both novice and experienced counselors and

family therapists covering a wide range of topics and offering a large body of information on how to effectively counsel children and their families. It includes recent research on a number of topics including working with children in a family context, the exclusion of children from counseling and counselor training methods and approaches, the effectiveness of filial play therapy, the effects of divorce on children and ADHD. Theoretical discussion is given to different family therapy approaches including family play therapy and filial play therapy. Central to the text are interviews with leaders in the field including Salvador Minuchin, Eliana Gil, Rise VanFleet, and Lee Shilts. A chapter devoted to ethical and legal issues in working with children in family counseling provides a much needed overview of this often overlooked topic. Chapters include discussion of specific skills relevant to child counseling in the family context, case vignettes, and examples/practical tips for the counselor and handouts for parents.

With this collection of resource recommendations, direction for program development, and activities, you'll have students reading proficiently in no time. Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem solving by allowing students to create their own solutions to a problem through trial and error. In order to enhance literacy development in the STEAM program, however, they need resources for integrating literature into the curriculum. In this collection of resources for doing just that, veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources selected based on research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas. Titles are complemented by discussion questions and problem solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning. In addition to promoting literacy, these resources will help to develop creativity, lateral thinking skills, and confidence in students.
