The State and American Foreign Economic Policy G. John Ikenberry, David A. Lake, Michael Mastanduno, 1988 How has the U S government made the nation s foreign economic policy over the last hundred years Social scientists have traditionally presented the American state as relatively weak its policies as directly reflecting the domestic balance of strength among interested social groups and economic sectors This collection of essays by seven notable young political scientists provides a theoretical reevaluation of the forces at work in national policy making and present evidence that the effectiveness of the national government in shaping U S policy has been greatly underestimated

Taking Trade to the Streets Susan Ariel Aaronson, 2002-05-14 In the wake of civil protest in Seattle during the 1999 World Trade Organization meeting many issues raised by globalization and increasingly free trade have been in the forefront of the news But these issues are not necessarily new Taking Trade to the Streets describes how so many individuals and nongovernmental organizations came over time to see trade agreements as threatening national systems of social and environmental regulations Using the United States as a case study Susan Ariel Aaronson examines the history of trade agreement critics focusing particular attention on NAFTA the North American Free Trade Agreement between Canada Mexico and the United States and the Tokyo and Uruguay Rounds of trade liberalization under the GATT She also considers the question of whether such trade agreement critics are truly protectionist The book explores how trade agreement critics built a fluid global movement to redefine the terms of trade agreements the international system of rules governing trade and to redefine how citizens talk about trade The terms of trade is a relationship between the prices of exports and of imports That movement which has been growing since the 1980s transcends borders as well as longstanding views about the role of government in the economy While many trade agreement critics on the left say they want government policies to make markets more equitable they find themselves allied with activists on the right who want to reduce the role of government in the economy Aaronson highlights three hot button social issues food safety the environment and labor standards to illustrate how conflicts arise between trade and other types of regulation And finally she calls for a careful evaluation of the terms of trade from which an honest debate over regulating the global economy might emerge Ultimately this book links the history of

trade policy to the history of social regulation It is a social political and economic history that will be of interest to policymakers and students of history economics political science government trade sociology and international affairs Susan Ariel Aaronson is Senior Fellow at the National Policy Institute and occasional commentator on National Public Radio s Morning Edition *Congressional Record* United States.
