Galloway, 1958 *Political Missions to Bootan* Sir Ashley Eden, Robert Boileau Pemberton, Kishen Kant Bose, 1865 Published in Calcutta present day Kolkata in 1865 this volume contains four narratives relating to the interactions in the 19th century between British India and the Kingdom of Bhutan The first is the report of Sir Ashley Eden 1831 87 a British administrator who in 1863 was sent on a mission to

conclude a treaty of peace and friendship with Bhutan Eden's mission failed and was followed by the outbreak of the Anglo Bhutan War of 1864-65 also known as the Dooar or Du'r War in which Bhutan was forced to cede several border regions to the British. The second narrative is by Captain R. Boileau Pemberton who undertook a mission to Bhutan in 1837-38 but failed to conclude a treaty between Bhutan and the British East India Company. The third narrative is the journal of William Griffiths, a medical doctor who accompanied Pemberton. The final narrative is a translation of a report by Baboo Kishen Kant Bose, a native agent who in 1815 traveled to Bhutan on behalf of the East India Company to negotiate certain issues. In addition to the main narratives, the book includes the texts of several draft treaties and tables containing detailed information about the vegetation, geology, and climate of Bhutan. *Asiatick Researches, Or, Transactions of the Society Instituted in Bengal, for Inquiring Into the History and Antiquities, the Arts, Sciences, and Literature of Asia*, 1825 **Boston Musical Visitor**, 1842 **The Science of Musical Sound** William Ralph Bennett Jr., 2018-09-04 This textbook is a product of William Bennett's work in developing and teaching a course on the physics of music at Yale University to a diverse audience of musicians and science students in the same class. The book is a culmination of over a decade of teaching the course and weaves together historical descriptions of the physical phenomena with the author's clear interpretations of the most important aspects of the science of music and musical instruments. Many of the historical examples are not found in any other textbook available on the market. As the co-inventor of the Helium Neon laser, Prof. Bennett's knowledge of physics was world class. As a professor at one of the most prestigious liberal arts universities in the world, his appreciation for culture and humanities shines through. The book covers the basics of oscillations, waves, and the analysis techniques necessary for understanding how musical instruments work. All types of stringed instruments, pipe organs, and the human voice are covered in this volume. A second volume covers the remaining families of musical instruments as well as selected other topics. Readers without a background in acoustics will enjoy learning the physics of the Science of Musical Sound from a preeminent scientist of the 20th century. Those well-versed in acoustics will discover wonderful illustrations and photographs depicting familiar concepts in new and enlightening ways. *Four to Fourteen* Kathleen M. Lines, 2015-04-09 First published in 1956, this book contains a list of children's books suitable for children from infancy until the early teens. *A Handbook of Modern Irish* John Patrick Henry, 1910 [The Calcutta Annual Register](#), 1823 **The Asiatic Journal and Monthly Register for British India and Its Dependencies**, 1822 *The Asiatic Journal and Monthly Register for British and Foreign India, China, and Australia*, 1822 **Asiatic Journal and Monthly Register for British and Foreign India, China and Australasia**, 1822 Contains verbatim reports of Debates at the East India House taken in shorthand for these pages V 1 p iii **The Asiatic Journal and Monthly Register for British and Foreign India, China and Australasia**, 1822
