Making Babies The New Science And Ethics Of Conception

Sara Dubow

Making Babies The New Science And Ethics Of Conception:

Making Babies Peter Singer, Deane Wells, 1985 Explains the technologies of in vitro fertilization embryo freezing artificial insemination by donor surrogate motherhood and prospective methods of conception *Making Babies* Peter Singer, 2001-06-01

The Other Machine Dion Farquhar, 2014-04-23 With technological advances in reproduction no longer confined to the laboratory or involving only the isolated individual women and men are increasingly resorting to a variety of technologies unheard of a few decades ago to assist them in becoming parents The public at large and feminists as a group are confused and divided over how to view these technologies and over what positions to take on the moral and legal dilemmas they give rise to Farquhar argues that two perspectives have tended to dominate feminist discussions of these issues She labels these fundamental feminism and market liberalism By linking a theoretical approach with a practical set of issues Farquhar's *The Other Machine* provides a rigorous analysis of contemporary feminist debates

Reproducing the Womb Alice Elaine Adams, 1994 Alice E Adams crafts a subtle new response to the controversies surrounding reproductive freedom and the implications of medical technology She explores a spectrum of competing visions of childbearing from misogynistic nightmares of matriarchal control to feminist utopias Firmly rooted in political reality Adams offers innovative answers to the questions posed by the intimate interconnections and the perceived conflicts between fetus and mother individual and collective

Cloning Stephen D. Fairbanks, 2004 The terms recombinant DNA technology DNA cloning molecular cloning or gene cloning all refer to the same process the transfer of a DNA fragment of interest from one organism to a self replicating genetic element such as a bacterial plasmid The DNA of interest can then be propagated in a foreign host cell This technology has been around since the 1970s and it has become a common practice in molecular biology labs today Reproductive cloning is a technology used to generate an animal that has the same nuclear DNA as another currently or previously existing animal Dolly was created by reproductive cloning technology In a process called somatic cell nuclear transfer SCNT scientists transfer genetic material from the nucleus of a donor adult cell to an egg whose nucleus and thus its genetic material has been removed The reconstructed egg containing the DNA from a donor cell must be treated with chemicals or electric current in order to stimulate cell division Once the cloned embryo reaches a suitable stage it is transferred to the uterus of a female host where it continues to develop until birth Therapeutic cloning also called embryo cloning is the production of human embryos for use in research The goal of this process is not to create cloned human beings but rather to harvest stem cells that can be used to study human development and to treat disease Stem cells are important to biomedical researchers because they can be used to generate virtually any type of specialised cell in the human body This new book presents an up to date Chronology of Cloning along with current and selected abstracts dealing with cloning as well as a guide to books on the topic Access to the abstract and books sections is provided by title subject and author indexes

Historical and Multicultural Encyclopedia of Women's Reproductive Rights in the United States Judith A.

Baer, 2002-04-30 *Reproductive rights* refers to a range of claims concerning when and how to have children. Beneath this clear statement lies the most contentious political, legal, and cultural issue in America today. Involving the self, the family, and the State, women's reproductive rights generates much impassioned argument but painfully little agreement. Topics and authors take on diverse and often clashing positions, highlighting this issue's complex and highly charged nature. Arranged alphabetically by topic, articles representing racial and ethnic groups' experiences figure prominently, as do the effects of age, class, education, health, religion, and sexual preference on childbearing and rearing practices in and out of wedlock. It also includes articles on laws, court cases, political attitudes, prominent activists, and technological advances as they relate to reproductive rights. Entries are written by highly regarded scholars, are cross-referenced, and conclude with suggested further readings. Designed to introduce and inform the reader to this extremely difficult topic, Baer's ecumenical approach exposes us to a variety of opinions, from support for current abortion policies to the building movement for fetal rights. Only reasoned opinions supported by hard evidence are included, and no attempt was made to mute the often incommensurable opinions expressed within. This book will be a valuable resource for students, scholars, and any person interested in learning about the multiplicity of perspectives on this important issue that is at the heart of our current culture wars. *Ourselves Unborn* Sara Dubow, 2017 INTRODUCTION FETAL STORIES 1 Discovering Fetal Life 1870s 1920s 2 Interpreting Fetal Bodies 1930s 1970s 3 Defining Fetal Personhood 1973 1976 4 Defending Fetal Rights 1970s 1990s 5 Debating Fetal Pain 1984 2007 EPILOGUE FETAL MEANINGS NOTES BIBLIOGRAPHY *Outer Origin* Laura Johnson Dahlke, 2024-04-25 *Outer Origin* examines the individual, social, and spiritual implications of ectogenesis, also known as artificial womb technology. Formerly considered the topic of science fiction, such devices are currently being developed and will soon be a medical reality. This book offers readers information on the status of this technology and considers the ways in which it may one day fully replace human gestation. Ectogenesis has previously been assessed with the future child in mind, but this book instead envisions what it might mean for women. It explores the value of pregnancy and childbirth in the twenty-first century and questions the notion that artificial wombs will lead to full equality of the sexes. *Outer Origin* seeks to elevate the maternal experience by reflecting on the meaning of reproductive technology in our lives. People everywhere must ponder the significance of what has heretofore been their most common link: shared natality and birth. If not *Homo sapiens*, will we enter a deep dive into the unknown that of not being of woman born. **Bioethics and the Law** George Patrick Smith, 1993 Ethical challenges: Rationing health care, Ethics committees, Informed decisionmaking, Embryonic and fetal experimentations, Wrongful life or wrongful birth, Procreational restraints, Surrogation, Fetal abuse, Of clones and cryons, The right to die with dignity. *Cultural Conceptions* Valerie Hartouni, 1997 Examines the meaning of life in an era of emerging biotechnology. What happens to prevailing beliefs about the uniqueness of individual life when life can be cloned? Or to traditional understandings of family relationships when a child can have up to five parents? These are some of the questions addressed.

by Valerie Hartouni in her consideration of the cultural effects of new reproductive technologies as reflected in video images popular journalism scientific debates legal briefs and policy decisions In *Cultural Conceptions* Hartouni tracks the circulation and communication of various myths images and stories pertaining to new reproductive technologies and their effects both imagined and real during the past two decades While addressing topics ranging from surrogacy and cloning to adoption ultrasound imaging and abortion Hartouni looks to American popular culture for clues to what these new and not so new reproductive practices tell us about issues of personhood Hartouni investigates the emergence of new anxieties about the nature of selfhood as well as the recurrence of age old myths regarding individuality sexuality property and family She argues that both are being played out in cultural contests over the meaning and organization of women's reproductive capacity In her discussion of provocative issues such as The Bell Curve controversy and the Baby M case Hartouni traces the dialectic of crisis and containment unleashed by reproductive technologies Ultimately however *Cultural Conceptions* argues that the anxieties that surround new reproductive technologies provide openings for alternative understandings and practices of life to emerge and challenge those currently in place A thoughtful daring and original look at this complex set of issues *Cultural Conceptions* provides an much needed guide to our nation's psyche as we approach the new millennium

Philosophical Perspectives on Bioethics L. W. Sumner, Joseph Boyle, Joseph M. Boyle, 1996-01-01 The contributors to the volume discuss various approaches to bioethical thinking and the political and institutional contexts of bioethics addressing underlying concerns about the purposes of its practice

Philosophical Dimensions of Public Policy William Galston, 2017-07-12 At the mid point of the twentieth century many philosophers in the English speaking world regarded political and moral philosophy as all but moribund Thinkers influenced by logical positivism believe that ethical statements are merely disguised expressions of individual emotion lacking propositional force or that the conditions for the validation of ethical statements could not be specified or that their content however humanly meaningful is inexpressible *Philosophical Dimensions of Public Policy* presents thirty four articles written by research scholars numerous fields philosophy political theory medicine law biology economics ecology and sociology treating a broad range of topics in practical philosophy The Institute for Philosophy and Public Affairs has been home for these ideas pioneering a distinctive method of conducting inquiry into the moral dimensions of public life and contributing to public discussion and deliberation Members of the Institute reject the idea that public philosophy means reaching into the philosopher's tool kit and applying prefabricated theories to particular problems They set in motion a dialogue between the distinctive moral features of practical problems and the more general moral theories or considerations that seem most likely to elucidate these problems The volume is divided into five areas Politics Civic Life and Moral Education Diversity Identity and Equal Opportunity Human Rights Development Ethics and International Justice Biotechnology Genetic Research and Health Policy and Natural Environment Human Communities *Philosophical Dimensions of Public Policy* presents empirical data and philosophical arguments with the

intention of informing public policy and public deliberation Scholars as well as graduate and undergraduate students are certain to find it useful to their research work

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1985

Feminist Approaches To Bioethics Rosemarie Putnam Tong,2018-02-05 No other cluster of medical issues affects the genders as differently as those related to procreation contraception sterilization abortion artificial insemination in vitro fertilization surrogate motherhood and genetic screening Yet the moral diversity among feminists has led to political fragmentation foiling efforts to create policies that are likely to serve the interests of the largest possible number of women In this remarkable book Rosemarie Tong offers an approach to feminist bioethics that serves as a catalyst bringing together varied perspectives on choice control and connection Emphasizing the complexity of feminist debates she guides feminists toward consensus in thought cooperation in action and a world that would have no room for domination and subordination Tong fairly and comprehensively presents the traditions of both feminist and nonfeminist ethics and bioethics Although feminist approaches to bioethics derive many insights from nonfeminist ethics and bioethics Tong shows that their primary source of inspiration is feminist ethics leading feminist bioethicists to ask the so called woman question in order to raise women s consciousness about the systems structures and relationships that oppress them Feminist bioethicists are naturally committed to acting locally in the worlds of medicine and science But their different feminist voices must also be raised at the policy table in order to make gender equity a present reality rather than a mere future possibility Inability to define a plan that guarantees liberation for all women must not prevent feminists from offering a plan that promises to improve the welfare of many women Otherwise a perspective less appealing to women may fill the gap

Clean Living Movements Ruth Clifford Engs,2001-08-30 Over the past 200 years a health reform movement has emerged about every 80 years These clean living cycles surged with or were tangential to a religious awakening Simultaneously with these awakenings out groups such as immigrants and or youth were seen to exhibit behaviors that undermined society Middle class fear of these dangerous classes and a desire to eliminate disease crime and other perceived health or social problems led to crusades in each of the three reform eras against alcohol tobacco drugs certain foods and sexual behaviors A backlash began to emerge from some segments of the population against reform efforts After the dissipation of the activism phase laws made during the reform era often became ignored or repealed With a few exceptions during the 30 to 40 year ebb of the cycle the memory of the movement disappeared from public awareness The desire for improved health and social conditions also led to campaigns in favor of exercise semi vegetarian diets women s rights chastity and eugenics Engs describes the interweaving of temperance women s rights or religion with most health issues Factions of established faiths emerged to fight perceived immorality while alternative religions formed and adopted health reform as dogma In the reform phase of each cycle a new infectious disease threatened the population Some alternative medical practices became popular that later were incorporated into orthodox medicine and public health Ironically over each succeeding movement reformers became more likely to

represent grass roots beliefs or even to be state or federal officials rather than independent activists

Human Reproductive Biology Mark M. Jones, 2012-12-02 Human Reproductive Biology focuses on the processes concerns and trends in human reproduction Divided into four parts with 19 chapters the book starts by tracing the history of human reproduction biology and the questions and choices involved The first part focuses on the male and female reproductive systems The text notes the different organs involved in reproduction including the penis scrotum vagina oviducts and mammary glands The book discusses sexual development and differentiation particularly noting the variance of sex ducts and glands external genitalia and disorders of sexual development and determination The text also looks at puberty Concerns include gonadal changes from birth to puberty mechanisms that influence puberty and puberty and psychosocial adjustment The second part deals with menstrual cycle fertilization pregnancy labor and birth Some of the concerns include length of menstrual cycle absence of menstruation transport of sperm and ovum in the oviduct and semen release The text also highlights labor and birthing processes as well as the relationship of neonates and parents The third part looks at the medical aspects of human reproduction infertility and sexually transmitted diseases Concerns include contraception abortion herpes genitalis and vaginitis The text folds with discussions on human sexual behavior population growth and family planning Concerns include sexual dysfunction the effects of overpopulation and population control The book is a vital source of data for readers interested in human reproduction

Technologies of Feminist Speculative Fiction Sherryl Vint, Sümeyra Buran, 2022-05-04 Technologies of Feminist Speculative Fiction Gender Artificial Life and the Politics of Reproduction explores how much technology has reshaped feminist conversations in the decades since Donna Haraway s influential Cyborg Manifesto was published With sections exploring reproductive technologies new ways of imagining femininity and motherhood via artificial means queer readings of gender as a social technology and posthuman visions of a world beyond gender this book demonstrates how feminist speculative fiction offers an urgently needed response to the intersections of women s bodies and technology This collection brings together authors from Europe Japan the US and the UK to consider speculative films and texts reproductive technologies and food futures and opportunities to rethink family aging gender and sexuality and community through feminist speculative fiction a social technology for building better futures

Feminist Thought Rosemarie Tong, 2013-10-08 In this survey of feminist theory Rosemarie Tong provides coverage of the psychoanalytic existential and postmodern schools of feminism The author guides the reader through the complexities of even the most notoriously difficult thinkers Students will meet and become familiar with many of the essential figures in the feminist tradition from Wollstonecraft and Engel on through de Beauvoir Dinnerstein and Daly and up to Mitchell and Cixous The text treats all views with respect and encourages students to think critically and sympathetically about a wide range of views that have a direct relevance to their own lives

Philosophical Interventions Martha C. Nussbaum, 2012-01-02 This volume collects the notable published book reviews of Martha C Nussbaum an acclaimed philosopher who is also a professor of law

and a public intellectual Her academic work focuses on questions of moral and political philosophy and on the nature of the emotions But over the past 25 years she has also written many book reviews for a general public in periodicals such as The New Republic and The New York Review of Books Dating from 1986 to the present these essays engage constructively and also critically with authors like Roger Scruton Allan Bloom Charles Taylor Judith Butler Richard Posner Catharine MacKinnon Susan Moller Okin and other prominent intellectuals of our time Throughout her views defy ideological predictability heralding valuable work from little known sources deftly criticizing where criticism is due and generally providing a compelling picture of how philosophy in the Socratic tradition can engage with broad social concerns For this volume Nussbaum provides an intriguing introduction that explains her selection and provides her view of the role of the public philosopher

A Companion to Bioethics Helga Kuhse, Peter Singer, 2013-04-16 This second edition of A Companion to Bioethics fully revised and updated to reflect the current issues and developments in the field covers all the material that the reader needs to thoroughly grasp the ideas and debates involved in bioethics Thematically organized around an unparalleled range of issues including discussion of the moral status of embryos and fetuses new genetics life and death resource allocation organ donations AIDS human and animal experimentation health care and teaching Now includes new essays on currently controversial topics such as cloning and genetic enhancement Topics are clearly and compellingly presented by internationally renowned bioethicists A detailed index allows the reader to find terms and topics not listed in the titles of the essays themselves
