Dunning, 2004-09-16 Gordon Brown Jonathan Sacks Joseph Stiglitz Hans Kung Shirley Williams and a dozen other leading thinkers in international business and ethics identify the pressing moral issues which global capitalism must answer How can we develop a global economic architecture which is efficient morally acceptable geographically inclusive and sustainable over time If global capitalism arguably the most efficient wealth creating system currently known to man is to be both economically viable and socially acceptable each of its four constituent institutions markets governments supranational agencies and civil society must not only be technically competent but also be buttressed and challenged by a strong moral ethos The book includes contributions from leading academics politicians and moralists Recognizing that solutions will not come from any one quarter and that any serious discussion of a just and equitable system will touch on questions of ethics and faith the book approaches the issues from a range of different disciplines and forums **Education in the Era of**

**Globalization** Klas Roth, Ilan Gur-Ze'ev, 2007-10-11 Education seems to have lost its orientation in Western culture and is in disarray all over the globe in time of global transitions Globalizing capitalism is the general headline for some of the most profound deep and dramatic developments in our era that education must address The response of educationalists is only in its beginning and there is an urgent need to address the dramatic changes inflicted on promised to our era philosophically sociologically culturally ecologically physically aesthetically and politically In the proposed book we try to address the challenge of globalization to education in the broadest sense of the concept of education by treating this challenge in various perspectives through different disciplines and topics within which the challenge of globalization is conceived as the most profound dynamic of this historical moment a development that is realized in many diverse and different levels fields and spaces of human and natural existence The various texts in this collection written by some of the famous and interesting scholars in the field of philosophy of education and the sociology of education try to address the richness and diversity of the challenge of globalization It tries to reconstruct historically sociologically and philosophically the roots the practices and the fruits of globalization as a threat and as a gateway for new possibilities for today's education The collection is a meeting point for research that is not only analytical and critical but also offers new roads and possibilities for education in the 21st century in face of globalization As such this collection is unique in this field and opens the door for further research and public discussion on the future role of education **New Challenges for International Business Research** John H.

Dunning, 2010-01-01 In this final collection of his essays John Dunning looks back on more than 40 years of research in International Business IB whilst at the same time considering possibilities for the future Is there a way to sustainable investment? Katja Treichel, 2008-07-17 Inhaltsangabe Introduction The issue of foreign direct investment FDI as one of the key features of globalisation continues to attract widespread attention particularly since its rapid increase in the last decade

While some see FDI as a panacea for overcoming poverty others point precisely to the opposite and recall the negative image often connected to multinational corporations MNCs embodied in child labour environmental catastrophes and exploitation of cheap work force Opinions on the benefits of FDI for development differ considerably but so does the observed reality In some countries FDI has in fact contributed to economic progress and fallen poverty rates Other countries by contrast have not been able to reap the repeatedly praised fruits of investment flows such as job creation and technological spillovers or did not even attract significant amounts of FDI But in the highly inter dependent and inter connected world that we live in now extreme views cannot and should not set the tone for future debates Neither the retreat into isolated and protectionist patterns nor the advocacy of a downright neo liberal credo seem to be viable options For one thing FDI has outstripped official development aid in numbers and no single country has lifted itself out of poverty in the last 50 years without integrating into the world market For another simple liberalisation measures have not always increased FDI flows into host developing countries and where they did FDI flows have not automatically brought with them the desired benefits for development The term development should be understood in a sustainable sense and thus goes far beyond the rise of the gross national product per capita It means according to the frequently quoted Brundtland report development that meets the needs of the present without comprising the ability of future generations to meet their own needs Without neglecting the importance of raising income levels it puts special emphasis on enhancing the skills and competencies of people who should harness and shape their ecological economic and social environment in sustainable ways Crucial with this understanding of development is on one hand its long term perspective and on the other the interplay between the economic social and environmental dimension both making any action oriented towards development a highly complex matter As a consequence the presumption that all kinds of investment flows

*Religion in International Politics and Development* J. A. Rees, 2011 This unique and fascinating book illustrates that in moving the research agenda forward despite whatever methodological pitfalls that may await in the attempt the dynamics of religion must now be considered to be of central and abiding importance in the study of world politics An illuminating case study of the World Bank's engagements with religion faith communities institutions and social movements provides insights into the current discourse on religion in international relations John A Rees argues that religion is of equal importance to other structures of international relations IR and questions where religion is operating in

world politics rather than what religion is in an essential sense He constructs a new model for differentiating three distinct discourses of religion in the theory and practice of world politics which he applies to the IR sphere of international development and encourages new thinking in the field by answering conceptual and methodological challenges in religion research This book will prove an enlightening point of reference for academics and researchers in the fields of religion world politics international relations and development studies as well as for international organisations development theorists and practitioners working in conjunction with faith based organisations

**A Strategic and Tactical Approach to Global Business Ethics, Second Edition** Lawrence A. Beer, 2015-01-12 The inclusion of ethically driven elements into the strategic planning process of multinational corporations MNCs is an emerging consideration in the modern era of globalization Firms pursuing cross border activities in any capacity and to whatever degree or scale are increasingly coming into contact with differences in morally applied decision making that affects their operational success and sustainability The choices made require the use of clear and unambiguous codes of conduct for embedded managers abroad The implementation of a properly administered code coupled with a program of corporate social responsibility CSR can add value to a company while its misapplication or exclusion can diminish value

personal interpretation The study of international business and all related managerial disciplines usually includes ethical content The majority of global management textbooks offer a chapter on ethics and its often misaligned cousin social responsibility They tend to cover the subject matter by stating the problem and then reciting laws enacted to combat social injustice as well as including philosophical theories intended to provide generic direction This iceberg approach a topical view of the issues leaves the average MBA student along with executive cadre longing for more specific guidelines *Loving the Poor, Saving the Rich* Helen Rhee,2012-11-01 The issue of wealth and poverty and its relationship to Christian faith is as ancient as the New Testament and reaches even further back to the Hebrew Scriptures From the beginnings of the Christian movement the issue of how to deal with riches and care for the poor formed an important aspect of Christian discipleship This careful study shows how early Christians adopted appropriated and transformed the Jewish and Greco Roman moral teachings and practices of giving and patronage As Helen Rhee illuminates the early Christian understanding of wealth and poverty she shows how it impacted the formation of Christian identity She also demonstrates the ongoing relevance of early Christian thought and practice for the contemporary church
