Making Law The State The Law And Structural Contradictions:

Making Law William J. Chambliss, Marjorie S. Zatz, 1993-11-22 a distinct broad but compelling framework for examining a variety of laws and social policies Legal Studies Forum a very rich volume that has something to offer to many different tastes an excellent companion to the main textbook in a large undergraduate law and society course Contemporary Sociology No issue has captured the imagination of social scientists and legal scholars more consistently than the creation of laws The political implications of the study of law and society often create ideological diatribes with little attention to empirical detail In this book legal scholars sociologists political scientists and anthropologists join in an attempt to develop and refine a structural theory of law

A Sociology of Crime Stephen Hester, Peter Eglin, 2017-05-15 A Sociology of Crime has an outstanding reputation for its distinctive and systematic contribution to the criminological literature Through detailed examples and analysis it shows how crime is a product of processes of criminalisation constituted through the interactional and organizational use of language In this welcome second edition the book reviews and evaluates the current state of criminological theory from this grammatical perspective It maintains and develops its critical and subversive stance but greatly widens its theoretical range including dedicated chapters on gender race class and the post als including postcolonialism It now also provides questions exercises and further readings alongside its detailed analysis of a set of international examples both classical and contemporary

Controlling the Dangerous Classes Randall G. Shelden, Pavel V. Vasiliev, 2017-12-19 Throughout history the powerful have created laws developed agencies to enforce those laws and established institutions to punish lawbreakers Maintaining the social order to their advantage resulted in the systematic repression of disadvantaged groups the dangerous classes The third edition retains a historical approach to exploring patterns of social control and through current examples demonstrates how those strategies continue today The authors trace the roots of race class and gender bias in how laws are written interpreted and applied The management of dangerous classes is not a recent phenomenon there is a long history of keeping those who derive the least advantage from

the status quo and therefore pose the greatest threat under control There was and is one system of justice for the privileged and a very different system for the less privileged The criminal justice system from the law to daily operations of the police courts and corrections generally comes down hardest on those with the least amount of power and influence and is the most lenient with those with the most power and influence The book raises critical questions What is a crime What is law Whose interests are served by the law and the criminal justice system What patterns are repeated generation after generation How does the criminal justice system relate to larger issues such as social inequality social class race and gender Contemplation of these topics contributes to informed public dialogue and careful deliberation about the present state and the future of criminal justice

Reactions to the Law by Minority Religions Eileen Barker, James Richardson, 2020-12-30 Much has been written about the law as it affects new and minority religions but relatively little has been written about how such religions react to the law This book presents a wide variety of responses by minority religions to the legal environments within which they find themselves An international panel of experts offer examples from North America Europe and Asia demonstrating how religions with relatively little status may resort to violence or passive acceptance of the law how they may change their beliefs or practices in order to be in compliance with the law or how they may resort to the law itself in order to change their legal standing sometimes by forging alliances with those with more power or authority to achieve their goals The volume concludes by applying theoretical insights from sociological studies of law religion and social movements to the variety of responses The first systematic collection focussing on how minority religions respond to efforts at social control by various governmental agents this book provides a vital reference for scholars of religion and the law new religious movements minority religions and the sociology of religion

Varieties of Religious Establishment Lori G. Beaman, 2016-02-17 Advocacy for religious freedom has become a global project while religion and the management of religion has become of increasing interest to scholars across a wider range of disciplines Rather than adopting the common assumption that religious freedom is simply incompletely realized the authors in this book suggest that the starting point for understanding religion in public life today should be religious establishment In the hyper globalized world of the politics of religious freedom today a focus on establishments brings into view the cultural assumptions cosmologies anthropologies and institutions which structure religion and religious diversity Leading international scholars from a diverse range of disciplines explore how countries today live with religious difference and consider how considering establishments reveals the limitations of universal multicultural and interfaith models of religious freedom Examining the various forms religion takes in Tunisia Canada Taiwan South Africa and the USA amongst others this book argues that legal protections for religious freedom can only be understood in a context of socially and culturally specific constraints

The Death of the American Death Penalty Larry Wayne Koch, Colin Wark, John F. Galliher, 2012 The death penalty has largely disappeared as a national legislative issue and the Supreme Court has mainly bowed out leaving the states at the cutting edge of abolition politics This

essential guide presents and explains the changing political and cultural challenges to capital punishment at the state level As with their previous volume *America Without the Death Penalty* Northeastern 2002 the authors of this completely new volume concentrate on the local and regional relationships between death penalty abolition and numerous empirical factors such as economic conditions public sentiment the roles of social political and economic elites the mass media and population diversity They highlight the recent abolition of the practice in New York New Jersey New Mexico and Illinois the near misses in New Hampshire Connecticut Maryland and Nebraska the Kansas rollercoaster rides and the surprising recent decline of the death penalty even in the deep South Abolition of the death penalty in the United States is a piecemeal process with one state after another peeling off from the pack until none is left and the tragic institution finally is no more This book tells you how and why that will likely happen

Religious Pluralism Giuseppe Giordan, Enzo Pace, 2014-07-08 This volume illustrates both theoretically and empirically the differences between religious diversity and religious pluralism It highlights how the factual situation of cultural and religious diversity may lead to individual social and political choices of organized and recognized pluralism In the process both individual and collective identities are redefined incessantly moving along the continuum that ranges from exclusion to inclusion The book starts by first detailing general issues related to religious pluralism It makes the case for keeping the empirical the normative the regulatory and the interactive dimensions of religious pluralism analytically distinct while recognizing that in practice they often overlap It also underlines the importance of seeking connections between religious pluralism and other pluralisms Next the book explores how religious diversity can operate to contribute to legal pluralism and examines the different types of church state relations eradication monopoly oligopoly and pluralism The second half of the book features case studies that provide a more specific look at the general issues from ways to map and assess the religious diversity of a whole country to a comparison between Belgian French views of religious and philosophical diversity from religious pluralism in Italy to the shifting approach to ethnic and religious diversity in America and from a sociological and historical perspective of religious plurality in Japan to an exploration of Brazilian religions old and new The transition from religious diversity to religious pluralism is one of the most important challenges that will reshape the role of religion in contemporary society This book provides readers with insights that will help them better understand and interpret this unprecedented transition

Reinventing Bankruptcy Law Virginia Torrie, 2020-05-26 *Reinventing Bankruptcy Law* explodes conventional wisdom about the history of the Companies Creditors Arrangement Act and in its place offers the first historical account of Canada's premier corporate restructuring statute The book adopts a novel research approach that combines legal history socio legal theory ideas from political science and doctrinal legal analysis Meticulously researched and multi disciplinary *Reinventing Bankruptcy Law* provides a comprehensive and concise history of CCAA law over the course of the twentieth century framing developments within broader changes in Canadian institutions including federalism judicial review and statutory interpretation Examining the

influence of private parties and commercial practices on lawmaking Virginia Torrie argues that CCAA law was shaped by the commercial needs of powerful creditors to restructure corporate borrowers providing a compelling thesis about the dynamics of legal change in the context of corporate restructuring Torrie exposes the errors in recent case law to devastating effect and argues that courts and the legislature have switched roles leading to the conclusion that contemporary CCAA courts function like a modern day Court of Chancery This book is essential reading for the Canadian insolvency community as well as those interested in Canadian institutions legal history and the dynamics of change

The Politics of Community Policing Wilson Edward Reed, 2013-06-17 First published in 1999 As with the other volumes in this series readers will appreciate the clear and compelling way this case study is presented Reed critiques the way in which political and economic dynamics not only threaten but convolute the intended benefits of community policing Although you may not always agree with the author's interpretations he has given us a compelling look at the potential for corruption of model programs

Radical and Marxist Theories of Crime Paul B. Stretesky, 2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control

Encyclopedia of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Toccock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference However university reference librarians can tell you this is often far from the case Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics the who what where how and why if you will And reference librarians often find it difficult to guide these students to a quick one stop source In response SAGE Reference is publishing the two volume *Encyclopedia of Criminological Theory* available in both print and electronic formats This serves as a reference source for anyone interested in the roots of contemporary criminological theory Drawing together a team of international scholars it examines the global landscape of all the key theories and the theorists behind them presenting them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established

theories it also offers essays on cutting edge research as one might find in a handbook And like an unabridged dictionary it provides concise to the point definitions of key concepts ideas schools and figures Coverage will include contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory Liquid Relations Dik Roth,Rutgerd Boelens,Margreet Zwarteveen,2005 Annotation Proposals to address water shortages are usually based on two assumptions water is a commodity that can be bought and sold states or other centralized entities should control access to water This book criticizes these assumptions from a socio legal perspective Eleven case studies examine laws and distribution in regions around the world Producing Legality Marjorie Zatz,2014-03-18 Producing Legality provides a window into the official construction of socialist legality in Cuba and the dissemination of this legal consciousness throughout the country It links abstract theories of lawmaking and the state with the specific dilemmas confronting individual policymakers to detail the inner workings of the Cuban legal order **Routing The Opposition** David S. Galliher, Larry W. Koch, David Patrick Keys, Teresa J. Guess, 2005 In 2000 Governor George Ryan of Illinois a Republican and a supporter of the death penalty declared a moratorium on executions in his state In 2003 he commuted the death sentences of all Illinois prisoners on death row Ryan contended that the application of the death penalty in Illinois had been arbitrary and unfair and he ignited a new round of debate over the appropriateness of execution Nationwide surveys indicate that the number of Americans who favor the death penalty is declining As the struggle over capital punishment rages on twelve states and the District of Columbia have taken bold measures to eliminate the practice This landmark study is the first to examine the history and motivations of those jurisdictions that abolished capital punishment and have resisted the move to reinstate death penalty statutes In the Name of Hate Barbara Perry, 2002-05-03 In The Name of Hate is the first book to offer a comprehensive theory of hate crimes arguing for an expansion of the legal definitions that most states in the U S hold Barbara Perry provides an historical understanding of hate crimes and provocatively argues that hate crimes are not an aberration of current society but rather a by product of a society still grappling with inequality difference fear and hate

Punishing Immigrants Charis Elizabeth Kubrin, Marjorie Sue Zatz, Ramiro Martinez, 2012-10-15 Arizona s controversial new immigration bill is just the latest of many steps in the new criminalization of immigrants While many cite the presumed criminality of illegal aliens as an excuse for ever harsher immigration policies it has in fact been well established that immigrants commit less crime and in particular less violent crime than the native born and that their presence in communities is not associated with higher crime rates Punishing Immigrants moves beyond debunking the presumed crime and immigration linkage broadening the focus to encompass issues relevant to law and society immigration and refugee policy and victimization as well as crime The original essays in this volume uncover and identify the unanticipated and hidden consequences of immigration policies and practices here and abroad at a time when immigration to the U S is near an all time high Ultimately Punishing Immigrants illuminates the nuanced and layered realities of immigrants lives describing the varying complexities surrounding immigration crime law and victimization **Recent Developments in Criminological Theory** Scott A. Lukas, 2017-07-05 This volume contains recent and cutting edge articles from leading criminological theorists The book is organized into ten sections each representing the latest in the multi disciplinary orientations representing a cross section of contemporary criminological theory These sections include 1 Classical and Rational Choice 2 Biological and Biosocial 3 Psychological 4 Social Learning and Neutralization 5 Social Control 6 Social Ecology Sub cultural and Cultural 7 Anomie and Strain 8 Conflict and Radical 9 Feminist and Gender 10 Critical Criminologies Anarchist Postmodernist Peacemaking The articles were selected based on their contributions to advancing the field including ways in which the authors of each chapter understand the current theoretical tendencies of their respective approaches and how they envision the future of their theories Because of this the articles focus on theory rather than empirical research Of particular note is the tendency toward integration of different perspectives as described by editors Henry and Lukas in their original
