Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the

authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all Books in Print Supplement ,2002 Official Records ,1946 **Legislative Calendar** United States. House of Commons,2003 **Countering Biological Terrorism in the United States** Potomac Institute for Policy Studies. Counter Biological Terrorism Panel,David W. Siegrist,Janice M. Graham,1999-05-28 Contains 13 papers which analyze the threat of biological terrorism in the United States Written by members of the Potomac Institute s Counter Biological Terrorism Panel these papers also discuss the efforts of the Department of Defense to counter these weapons and the terrorist groups associated with them *Journal of the Senate of the United States of America* United States. Congress. Senate,2008 Deterring International Terrorism and Rogue States James H. Lebovic,2007 This new study challenges the widely held view that many current US adversaries cannot be deterred maintaining that deterrence is not a relic of the Cold War period and that it should shape US policies toward so called rogue states and terror groups James Lebovic argues that deterrence principles continue to apply and focuses upon the three pillars of the Bush administration s national security policy missile defence which preoccupied the administration until September 11 2001 pre emptio which became the US focus with the September 11 attacks and US success in overthrowing the Taliban regime in Afghanistan homeland security which the administration has portrayed as more a natural response to threat than an aspect of policy that must be reconciled with the other pillars Deterring International Terrorism and Rogue States asserts that bad offences and defences have been endemic to the current US policy approach leading US policy makers to pursue policies that require them to do everything without adequate concern for resource trade offs overreach and unintended consequences This book will be of great interest to students of US foreign policy national and international security terrorism and international relations in general
