Dictionary of Global Climate Change W.J. 1929 the IMO had set up a Commission for Climatology to deal with matters related to climate studies When in 1950 the World Meteorological Organization assumed the mantle of the IMO it retained the commission which among other responsibilities had already recognized the need for the definition and explanation of terms used in climatology It must also be said that much of what we now know about climate derives from the scientific and technical programmes coordinated by IMO and now to a much greater extent by WMO In 1979 the First World Climate Conference made an assessment of the status of knowledge of climate and climate variability and recommended the establishment of a World Climate Programme This recommendation was fully endorsed by the Eighth World Meteorological Congress and the World Climate Programme was subsequently established by WMO in co operation with the International Council of Scientific Unions ICSU and the United Nations Environment Programme UNEP
