The Unfinished Business of the Civil Rights Movement Frank Simpkins, 2014-02 The Unfinished Business of the Civil Rights Movement Failure of America s Public Schools to Properly Educate its African American Student Populations by Frank Simpkins The Unfinished Business of

the Civil Rights Movement Failure of America's Public Schools to Properly Educate its African American Student Population vividly describes the current crisis of America's inability to properly educate its African American students. Many of the details and cited statistics indicate alarming illiteracy rates and high dropout rates for disadvantaged Black and Latino students across the country. These rates stand in sharp contrast to those of their White peers and the Black-White academic achievement gap continues to widen. The author mentions other problems that afflict the Black community including the horrendous incarceration rates of young Black males, the shocking rates of Black abortions, and the precarious and imploding condition of the Black family in America. He contends that the core of these problems lay with America's failure to properly educate its Black students. These alarming figures are more than just statistics; they have widespread consequences upon American society. The author highlights a proven and scientifically tested dialect reading program that showed promising results for Black functionally illiterate inner-city students in grades 7-12. He urges that a Second Civil Rights movement is needed to gain equal quality educational opportunities for all of America's children. We cannot deny these rights to some children without disparaging all children and the nation.

About the Author: Frank Simpkins co-authored the book *Between the Rhetoric and Reality* with his brother Gary Simpkins. He has served a number of years in the K-12 system and as Director of Educational Opportunities Programs and Services at Barstow Community College District.

The SAGE Guide to Curriculum in Education Ming Fang He, Brian D. Schultz, William H. Schubert, 2015-06-05

The SAGE Guide to Curriculum in Education integrates, summarizes, and explains in highly accessible form foundational knowledge and information about the field of curriculum with brief, simply written overviews for people outside of or new to the field of education. This Guide supports study, research, and instruction with content that permits quick access to basic information accompanied by references to more in-depth presentations in other published sources. This Guide lies between the sophistication of a handbook and the brevity of an encyclopedia. It addresses the ties between and controversies over public debate, policy making, university scholarship, and school practice. While tracing complex traditions, trajectories, and evolutions of curriculum scholarship, the Guide illuminates how curriculum ideas, issues, perspectives, and possibilities can be translated into public debate, school practice, policy making, and life of the general public, focusing on the aims of education for a better human condition.

55 topical chapters are organized into four parts: Subject Matter as Curriculum, Teachers as Curriculum, Students as Curriculum, and Milieu as Curriculum, based upon the conceptualization of curriculum commonplaces by Joseph J. Schwab: subject matter, teachers, learners, and milieu. The Guide highlights and explicates how the four commonplaces are interdependent and interconnected in the decision-making processes that involve local and state school boards and government agencies, educational institutions, and curriculum stakeholders at all levels that address the central curriculum questions: What is worthwhile? What is worth knowing? Needing, experiencing, doing, being, becoming, overcoming, sharing, contributing, wondering, and imagining. The Guide benefits undergraduate and graduate students, curriculum professors, teachers, teacher educators,
