Net Loss Internet Prophets Private Profits And The Costs To Community:

Net Loss Nathan Newman, 2015-12-16 How has the Internet been changing our lives and how did these changes come about Nathan Newman seeks the answers to these questions by studying the emergence of the Internet economy in Silicon Valley and the transformation of power relations it has brought about in our new information age *Net Loss* is his effort to understand why technological innovation and growth have been accompanied by increasing economic inequality and a sense of political powerlessness among large sectors of the population Newman first tells the story of the federal government's crucial role in the early development of the Internet with the promotion of open computer standards and collaborative business practices that became the driving force of the Silicon Valley model He then examines the complex dynamic of the process whereby regional economies have been changing as business alliances built around industries like the Internet replace the broader public investments that fueled regional growth in the past A radical restructuring of once regionally focused industries like banking electric utilities and telephone companies is under way with changes in federal regulation helping to undermine regional planning and the power of local community actors The rise of global Internet commerce itself contributes to weakening the tax base of local governments even as these governments increasingly use networked technology to market themselves and their citizens to global business usually at the expense of all but their most elite residents More optimistically Newman sees an emerging countertrend of global use of the Internet by grassroots organizations such as those in the antiglobalization movements that may help to transcend this local powerlessness Net

Digital Disconnect Robert W. McChesney, 2013-03-05 Celebrants and skeptics alike have produced valuable analyses of the Internet's effect on us and our world oscillating between utopian bliss and dystopian hell But according to Robert W McChesney arguments on both sides fail to address the relationship between economic power and the digital world McChesney's award winning Rich Media Poor Democracy skewered the assumption that a society drenched in commercial information is a democratic one In Digital Disconnect McChesney returns to this provocative thesis in light of the advances of the digital age incorporating capitalism into the heart of his analysis He argues that the sharp decline in the enforcement of antitrust violations the increase in patents on digital technology and proprietary systems and other policies and massive indirect subsidies have made the Internet a place of numbing commercialism A small handful of monopolies now dominate the political economy from Google which garners an astonishing 97 percent share of the mobile search market to Microsoft whose operating system is used by over 90 percent of the world's computers This capitalistic colonization of the Internet has spurred the collapse of credible journalism and made the Internet an unparalleled apparatus for government and corporate surveillance and a disturbingly anti democratic force In Digital Disconnect Robert McChesney offers a groundbreaking analysis and critique of the Internet urging us to reclaim the democratizing potential of the digital revolution while we still can

this industry far more than the technology Surveillance Valley Yasha Levine, 2018-02-06 The internet is the most effective weapon the government has ever built In this fascinating book investigative reporter Yasha Levine uncovers the secret origins of the internet tracing it back to a Pentagon counterinsurgency surveillance project A visionary intelligence officer William Godel realized that the key to winning the war in Vietnam was not outgunning the enemy but using new information technology to understand their motives and anticipate their movements This idea using computers to spy on people and groups perceived as a threat both at home and abroad drove ARPA to develop the internet in the 1960s and continues to be at the heart of the modern internet we all know and use today As Levine shows surveillance wasn't something that suddenly appeared on the internet it was woven into the fabric of the technology But this isn't just a story about the NSA or other domestic programs run by the government As the book spins forward in time Levine examines the private surveillance business that powers tech industry giants like Google Facebook and Amazon revealing how these companies spy on their users for profit all while doing double duty as military and intelligence contractors Levine shows that the military and Silicon Valley are effectively inseparable a military digital complex that permeates everything connected to the internet even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden With deep research skilled storytelling and provocative arguments *Surveillance Valley* will change the way you think about the news and the device on which you read it *The DARPA Model for Transformative Technologies: Perspectives on the U.S.*

America's New Working Class Kathleen R. Arnold, 2015-08-26 Today s political controversy over immigration highlights the plight of the working class in this country as perhaps no other issue has recently done The political status of immigrants exposes the power dynamics of the new working class which includes the former labor aristocracy women and people of color This new working class suffers exploitation in advanced industrial countries as the social cost of capitalism s success in a neoliberal and globalized political economy Paradoxically as borders become more open they are also increasingly fortified subjecting many workers to the suspension of law In this book Kathleen Arnold analyzes the role of the state s prerogative power in creating and sustaining this condition of severe inequality for the most marginalized sectors of our population in the United States Drawing on a wide range of theoretical literature from Locke to Marx and Agamben whose notion of bare life features prominently in her construal of this as a biopolitical era she focuses attention especially on the values of asceticism derived from the Protestant work ethic to explain how they function as ideological justification for the exercise of prerogative power by the state As a counter to this repressive set of values she develops the notion of authentic love borrowed from Simone de Beauvoir as a possible approach for dealing with the complex issues of exploitation in liberal democracy today

millennium The effects of that pivotal year reverberate still marking the close of one century and the dawning of another

Working in Silicon Valley Alan Hyde,2015-06-11 This work examines the relationship between the rapid technological and economic growth characteristic of high technology districts and their distinct labor market institutions short job tenures rapid turnover flat firm hierarchies weak internal labor markets high use of temporary labor unusual uses of independent contracting little unionization unusual employee organization e g chat groups and ethnic organization unequal income minimal employment discrimination litigation flexible compensation especially stock options and heavy use of immigrants on short term visas The author suggests that while these distinctive labor market institutions are somewhat unorthodox and may present legal problems they play essential roles in high growth

The Power of Market Fundamentalism

Fred Block,Margaret R. Somers,2014-04-30 What is it about free market ideas that give them tenacious staying power in the face of such manifest failures as persistent unemployment widening inequality and the severe financial crises that have stressed Western economies over the past forty years Fred Block and Margaret Somers extend the work of the great political economist Karl Polanyi to explain why these ideas have revived from disrepute in the wake of the Great Depression and World War II to become the dominant economic ideology of our time Polanyi contends that the free market championed by market liberals never actually existed While markets are essential to enable individual choice they cannot be self regulating because they require ongoing state action Furthermore they cannot by themselves provide such necessities of social existence as education health care social and personal security and the right to earn a livelihood When these public goods are subjected to market principles social life is threatened and major crises ensue Despite these theoretical flaws market principles are powerfully seductive because they promise to diminish the role of politics in civic and social life Because politics entails coercion and unsatisfying compromises among groups with deep conflicts the wish to narrow its scope is understandable But like Marx s theory that communism will lead to a withering away of the State the ideology that free markets can replace government is just as utopian and dangerous

Towards A New Social Order? Real Democracy, Sustainability & Peace

Patrick Holz, 2018-01-31 This contribution argues that a long established social order has been in place since the first stratified societies in the Near Middle East which unavoidably comes with substantial economic political and environmental repercussions Part I of the book dissects the various facets of this order which is termed the social dominance paradigm while in Part II a fundamentally different order the peace paradigm is introduced The latter rests on real democracy in the Athenian sense sustainability and peace As such both paradigms function as vehicles for further analysis and research while the peace paradigm also provides a rough plan for the implementation of transformational change Typically political economic social and environmental research seeks to increase specialized knowledge Here however the overall intent is to utilize interdisciplinary evidence and connect the dots between a number defining features within seemingly modern societies The argument is that these are in fact not modern at all but follow an ancient template of power control and coordination concentrated in the hands of the few Potentially this contribution can function as a trans disciplinary methodological framework as well as an information hub for researchers in the fields of political and social sciences history anthropology evolutionary biology organization and peace studies Practitioners who are interested in fundamental social change may also find the issues raised to be of interest As such this book provides a generalist evidence based discussion of a multi disciplinary nature that may pique the interest of both experts and amateurs alike

The Economic Sociology of Capitalism

Victor Nee, Richard Swedberg, 2020-09-01 This book represents a major step forward in the use of economic sociology to illuminate the nature and workings of capitalism amid the far reaching changes of the contemporary era of global capitalism For the past twenty years economic sociologists have focused on mesa level phenomena of networks but they have done relatively little to analyze capitalism as an overall system or to show how such phenomena emerge from and shape the dynamics of capitalism The Economic Sociology of Capitalism seeks to change this by presenting both big picture analyses of capitalism and more focused pieces on institutions crucial to capitalism The book which includes sixteen chapters by leading scholars in economic sociology is organized around three broad themes The first section addresses core issues and problems in the new study of capitalism the second considers a variety of topics concerning America the leading capitalist economy of the world and the third focuses attention on the question of convergence stemming from the global transformation of capitalism and the challenge of explaining institutional change The contributions which follow a foreword by economic historian Avner Greif and the editor s introduction are by Mitchel Abolafia James Baron and Michael Hannan Mary C Brinton John Campbell Gerald Davis and Christopher Marquis Paul DiMaggio and Joseph Cohen Peter Evans Neil Fligstein John Freeman Francis Fukuyama Ko Kuwabara Victor Nee Douglass C North AnnaLee Saxenian Richard Swedberg and Viviana Zelizer
