Regional City An Anglo American Discussi:

The Regional City Derek Senior, 2017-07-12 In this volume leaders in the fields of urban design and planning from both sides of the Atlantic examine the structure and functioning of the urban region discuss the strategies and machinery required to make regional planning effective compare experiences in urban renewal and analyze the part played by transportation and land values in the shaping of regional development For thousands of years we have lived in cities towns villages or country houses and most of us still think of our surroundings in these traditional terms Today however most people in Western countries inhabit a new form of social environment the urban region For all who live within thirty or forty miles of a metropolitan center modern means of transport communication and power transmission have opened up a vastly extended range of choice in employment recreation and every other form of social activity But our obsolete pattern of settlement and our pre motor age administrative organization prevent us from making the most of the opportunities to enrich the quality of everyday life which advances in technology have put within our reach In our efforts to plan for a fuller enjoyment of the benefits of regional living we can learn much from those who are tackling this worldwide problem in the context of different laws public outlooks and degrees of motorization Therefore this Anglo American discussion of metropolitan planning offering much material that is new unfamiliar or not easily available has special timeliness and significance *Planning Canadian*

Regions Gerald Hodge, Ira M. Robinson, 2007-10-01 *Planning Canadian Regions* is the first book to consolidate the history evolution current practice and future prospects for regional planning in Canada As planners grapple with challenges wrought by globalization the evolution of massive new city regions and the pressures of sustainable and community development a deeper understanding of Canada s approaches is invaluable Hodge and Robinson identify the conceptual and historical foundations of regional planning and propose a new planning paradigm that emphasizes regional governance and greater inclusiveness and integration of physical planning with planning for economic sustainability and natural ecosystems **A**

Century of British Geography Ron Johnston, Michael Williams, British Academy, 2003-09-11 These essays trace the evolution of British geography as an academic discipline during the last hundred years and stress how the study of the world we live in is fundamental to an understanding of its problems and concerns Never before has such an ambitious and wide ranging review been attempted and never before has it been done with so much knowledge and passion The principal themes covered in this volume are those of environment place and space and the applied geography of map making and planning The volume also addresses specific issues such as disease urbanization regional viability and ethics and social problems This lively and accessible work offers many insights into the minds and practices of today s geographers **The Literature and**

Soule, 2007-11-01 Urban sprawl has gained much national attention in recent years Sprawl involves not only land use issues but also legal political and social concerns It affects our schools the environment and race relations Comprehensive enough for high school students and also appropriate for college undergraduates Remaking American Communities delves into the challenges of urban sprawl by turning to some of America's top thinkers on the problem including Robert Yaro president of the Regional Plan Association Other cutting edge essays include a foreword about the emergence of sprawl by nationally syndicated columnist Neal Peirce views about race and class by former mayor of Albuquerque David Rusk and a discussion of transportation dynamics by Curtis Johnson president of the CitiStates Group The essays in this collection explore the core issues of sprawl and the agenda for dealing with it Complete with a glossary resources and contact information for smart growth alliances this book is extremely user friendly David C Soule offers an unbiased viewpoint of this national phenomenon in a way that will be accessible to students and those with little background in the issue

Geography and Regional Administration T. W. Freeman, 2025-05-01 At the time of the publication of this book in its fourth edition in 1969 Ireland was alone globally in having experienced a decline of population for more than a century National movements in Wales and Scotland made the story of the Irish Republic's first fifty years increasingly interesting Traditional and conservative as Ireland's life may have seemed in the late 20th Century it had changed considerably since 1921 Like much of Western Europe it continues to share the experience of a declining number of agricultural workers and its government like that of many other countries is concerned with the problem of industrial growth The book analyses the physical environment and the life of 20th century Ireland whilst it was in the throes of an economic revolution

Problems of an Urban Society J.B. Cullingworth, 2012-11-12 This book provides a wide ranging review of urban problems and constitutes a major contribution to the mounting public debate that these problems are attracting Many of the problems of social and economic decay are not new indeed they are perennial problems of urban societies As the complexities and interdependencies of modern life have increased so has the resolve to combat the environmental and social ills to which these give rise The particular focus of this volume is on the framework of urban problems the changing demographic social and economic structure the shortage of land and the transport needs of a highly complex industrial society A mass of facts and figures are neatly and succinctly marshalled to provide a clear picture of the problems Stress is laid on the essentially political nature of these problems and

the alternative solutions In essence urban problems are problems of social injustice of disadvantage and of lack of power This book was first published in 1973 Housing and Planning References United States.
