## **Regional Competitiveness And Skills:**

*OECD Regional Development Studies Regional Competitiveness and Skills* OECD, 1997-12-12 Regional policies are increasingly focusing on human resources and their orientation towards market demand and improvement of partnerships This volume casts a new light on these issues providing a useful source of information and inspiration for regional actors and their national partners *Regional Competitiveness* Ron Martin, Michael Kitson, Peter Tyler, 2012-11-12 There is now a wide spread interest in regions as a key focus in the organization and governance of economic growth and wealth creation This important book considers the factors that influence and shape the competitive performance of regions This is not just an issue of academic interest and debate but also of increasing policy deliberation and action However as the readings in this book make clear the very idea of regional competitiveness is itself complex and contentious Many academics and policy makers have used the concept without fully considering what is meant by the term and how it can be measured Policy formulation has tended to rush ahead of understanding and analysis and the purpose of this book is to close this important gap in understanding This book was previously published as a special issue of *Regional Studies* **Knowledge Intensive**

**Business Services and Regional Competitiveness** João J. M. Ferreira, Mário L. Raposo, Cristina I. Fernandes, Marcus Dejardin, 2016-04-20 Research interest in the service sector has boomed in recent years as deindustrialisation became entrenched Instead of being regarded as merely supplementary to traditional industry and manufacturing services have generated progressively rising levels of growth in developed economies while at the same time coming to be recognised as major drivers of innovation Among the factors which have helped service companies notch up swifter growth rates than all other sectors are the outsourcing of such services by other sectors including the development of information and communication technologies and changes to the regulatory legal and market frameworks as well as globalisation and internationalisation The result is a cluster of highly innovative firms which can loosely be grouped under the heading of Knowledge Intensive Business Services KIBS Knowledge Intensive Business Services and Regional Competitiveness charts the development of these firms and explores their success through four mutually linked parts KIBS and industrial dynamics KIBS and their context KIBS and their contribution to regional competitiveness and economic development and finally KIBS and public policy This book is suitable for researchers and policy makers interested in the rise of these influential actors and their influence on regional competitiveness **Crossing the Next Regional Frontier: Information and Analytics**

**Linking Regional Competitiveness to Investment in a Knowledge-Based Economy**, *Critical Reflections on Regional Competitiveness* Gillian Bristow, 2010-04-05 The book is structured into three parts Part 1 introduces the concept of regional competitiveness by tracing its origins and exploring its different meanings in regional economic development This will critically engage with political economy approaches to understanding the nature and dominance of the competitiveness discourse Part 2 interrogates the pursuit of regional competitiveness in policy and practice This critically evaluates the

degree to which the pursuit of competitiveness is encouraging convergence in policy agendas in regions through an examination of key determinants of policy sameness and difference notably benchmarking and devolved governance Part 3 explores the limitations to regional competitiveness and explores whether and how its predominance in the policy discourse might be challenged by alternative agendas such as sustainable development and wellbeing This focuses on the developing qualitative character of regional development

**Provincial and Regional Competitiveness Analysis for Greater China Economies** Khee Giap TAN, Randong

YUAN, Sangiita W. E. I. Cher YOONG, 2015-11-09 After more than three decades of rapid growth China is now entering into the New Normal Era which will be characterised by slower but sustainable quality growth for several decades to come How China will fare under the New Normal Era matters not only for itself but also for its great impact on global prosperity While presenting as the second instalment of ACI's annual tracking of the dynamics of competitiveness among 34 Greater China economies this volume also includes the results of the inaugural regional competitiveness analysis for five regions of Greater China As regional imbalance in socioeconomic advancement is a serious issue China has to face up to under the New Normal Era the results of such competitiveness analysis at provincial and regional levels offer insights for policy makers to help address concerns associated with the regional disparity in development and facilitate industry leaders and other stakeholders in identifying challenges and opportunities for sound decision making *Smart Metropolitan Regional Development* T.M.

Vinod Kumar, 2018-05-31 This book discusses the concept and practice of a smart metropolitan region and how smart cities promote healthy economic and spatial development It highlights how smart metropolitan regional development can energize reorganize and transform the legacy economy into a smart economy how it can help embrace Information and Communications Technology ICT and how it can foster a shared economy In addition it outlines how the five pillars of the third industrial revolution can be achieved by smart communities In addition the book draws on 16 in depth city case studies from ten countries to explore the state of the art regarding the smart economy in smart cities and to apply the lessons learned to shape smart metropolitan economic and spatial development *Theories of Endogenous Regional Growth* Börje

Johansson, Charlie Karlsson, Roger R. Stough, 2012-12-06 During the last two decades a new growth theory has emerged often labelled endogenous economic growth The contributions in the book develop these advances into a theoretical framework for endogenous regional economic growth and explain the implications for regional economic policies in the perspective of the new century Endogenous growth models can reflect increasing returns and hence refer more adequately to empirical observations than earlier models and the models become policy relevant because in endogenous growth models policy matters Such policies comprise efforts to stimulate the growth of knowledge intensity of the labour supply and knowledge production in the form of R D The New Competitive Advantage Michael Best, 2001-07-12 This book addresses the

sustained resurgence of American economy and the firms regions and technologies that are driving this growth Michael Best develops a new model of technology management and regional innovation based on the principle of systems integration The principle of systems integration is manifest in the organizational capability of firms individually and networked to foster rapid technological change Application of the principle of systems integration to business organization means integrating an

ongoing technology management capability into a production system. The effect is a network or cluster of entrepreneurial firms in which design is decentralized within the enterprise and diffused amongst networked enterprises. It is a business model ideally suited to product led strategies and technological innovation. The combination of entrepreneurial firms and inter firm networks is shown to foster a range of dynamic cluster processes which in turn underlie the growth of Silicon Valley and the unexpected resurgence of Boston's Route 128. The general character of the capabilities and innovation perspective is illustrated with applications to regions at different levels of industrial development. The implications for policy making are profound: technology management is a powerful lever for both fostering growth and shaping competitive advantage. Moreover, it offers a framework for addressing the challenge of ecologically sustainable growth. Complex product systems such as energy, transportation and health are a consequence of past and present technology R D choices and corresponding investments in technical education. Thus capability and skill development policies shape what is on offer in the marketplace.

**Understanding and Analyzing Competitive Dynamics** Murat Arik, 2014-10-24. Understanding and Analyzing Competitive Dynamics will serve as the first book for economic development professionals, undergraduate and graduate students and businesses because it answers the following three questions: What are the tools and techniques to analyze regional dynamics? how can these tools be used in a regional setting? and how can these tools help us formulate new directions? The book also highlights the necessity of regional level leadership in leveraging existing regional assets to create a cluster based competitive regional economy through regional level marketing, increasing synergy between industries in target clusters and their suppliers and customers, strengthening the cluster supply chain by diversifying target clusters and investing in human resources.
