Culture & Agriculture , 2007 *Culture and Economy* Ullrich

Kockel, 2019-07-17 This title was first published in 2002 For many regions culture is considered the only viable resource they have for economic development Neo liberalist economics has become the dominant paradigm across a wide range of cultural contexts while the cultural contingency of this paradigm itself has been obscured In offering an empirically grounded anthropological critique of these issues the volume makes an original contribution to the international debate on culture and economy The case studies shed light on everyday practices used to establish culture s economic value and concepts of culture and economy employed by policy decision makers are scrutinized through studies of strategies and policies at various levels Aspects of economy such as the market are examined as cultural constructs in a historical context Illustrated by

international case studies the volume provides a compelling and insightful survey of the theories and practices that shape the polyvalent relationships between culture and economy in the twenty first century **Companies, Cultures, and the Region** Nick Clifton, Stefan Gartner, Dieter Rehfeld, 2016-04-08 Europe has its strength in regional cultural diversity However current debates surrounding globalisation and the integration of markets tend to focus on the homogenisation of cultures whilst the emergence of vital and innovative regional cultures has typically been neglected This edited collection addresses this gap considering relevant questions such as how strategies orientations values and symbols help a company to become aware of its location and how different regional cultures are of interest to particular types of companies The book s central focus is the interaction of regional and corporate cultures how different cultures come together shape each other and change The volume takes an interdisciplinary approach bringing together research from cultural science regional science social science and economics This book was originally published as a special issue of the journal European Planning Studies

The European Puzzle Marion Demossier, 2007 The twin concepts of Culture and Identity are inescapable in any discussion of European Integration and yet over the last ten years their meaning has become increasingly contested By combining an anthropological and political perspective the authors challenge the traditional boundaries within the issue of the construction of Europe In the first part historians and anthropologists from various national traditions discuss the process of the construction of Europe and its implications for cultural identities The second section examines a number of topics at the core of the process of Europeanization and presents up to date information on each of these issues political parties regions football cities the Euro ethnicity heritage and European cinema Emphasis is be placed on the political structuring of cultural identities by contrasting top down and bottom up processes that define the tensions between the unity and diversity of the European Community **The Anthropology of Ireland** Hastings Donnan, Thomas M.

Wilson, 2020-08-04 Where and what is Ireland What are the identities of the people of Ireland How has European Union membership shaped Irish people s lives and interests How global is local Ireland This book argues that such questions can be answered only by understanding everyday aspects of Irish culture and identity Such understanding is achieved by paying close attention to what people in Ireland themselves say about the radical changes in their lives in the context of wider global transformation As notions of sex religion and politics are radically reworked in an Ireland being re imagined in ways inconceivable just a generation ago anthropologists have been at the forefront of recording the results The first comprehensive book length introduction to anthropological research on the island as a whole The Anthropology of Ireland considers the changing place in a changing Ireland of religion sex sport race dance young people the Travellers St Patrick s Day and much more *A Behavioural Theory of Economic Development* Robert Huggins, Piers Thompson, 2021-01-14 Innovation entrepreneurship knowledge and human capital are widely acknowledged as key levers of development Yet what are the sources of these factors and why do they differ in their endowment across regions Motivated by a belief that theories

of economic development can move beyond the generally accepted explanations of location and the organization of industries and capital this book establishes a behavioural theory of economic development illustrating that differences in human behaviour across cities and regions are a significant deep rooted cause of uneven development Fusing a range of concepts relating to culture psychology human agency institutions and power it proposes that the long term differentials in economic development between cities and regions both within and across nations is strongly connected to the underlying forms of behaviour enacted by humans on an individual and collective basis Given a world of finite and limited resources coupled with a rapidly growing population especially in cities and urban regions human behaviour and the expectations and preferences upon which it is based are central to understanding how notions of development may change in coming years This book provides a novel theory of the role of psychocultural context and human behavioural and institutional frameworks in uneven economic development on a global scale
