Regional International Organizations:

Regional International Organizations / Structures and Functions Paul A. Tharp, 1971-06-18 Interactions between Regional and Universal Organizations Laurence Boisson de Chazournes, 2016-11-01 Cooperation through international organizations is fundamental to the international legal order International organizations are nowadays ubiquitous and come in many different manifestations each allowing for different levels of international cooperation The profile of regional and universal organizations may vary greatly from one organization to another At the same time they do not live apart and this has led to the creation of a complex network of relationships These relationships have seldom been the object of scholarship and this book seeks to address that gap In general the relationships between international organizations can give rise to such issues as the conditions placed upon one organization by another demarcations of competence membership of other organizations and various forms of collaboration involving the conclusion of agreements between organizations Optimal coexistence cooperation and coherence all play a role in optimizing the relations between international organizations The volume concludes by analysing current challenges including those of legal identity responsibility and accountability as well as making proposals for reform such as through the development of a common law between organizations

Regional Cooperation, and the Role of International Organizations and Regional Integration Maurice Schiff, 2016 Schiff and Winters examine regional cooperation among neighboring countries in the area of regional public goods These public goods include water basins such as lakes rivers and underground water infrastructure such as roads railways and dams energy and the environment Their analysis focuses on developing countries and the potentially beneficial role that international organizations and regional integration may play in bringing the relevant countries to a cooperative equilibrium A major problem in reaching a cooperative solution is likely to be the lack of trust If neighboring countries do not trust each other because of past problems they may fail to reach a cooperative solution as each tries to maximize its gain from the regional public good These strategies typically do not account for spillover effects and ultimately leads to losses for all parties Other constraints on reaching a cooperative solution are its complexity and the financial requirements Two types of institutions may help resolve some or all of these problems International organizations can help with trust expertise and financing The United Nations and the World Bank have been involved in a number of such projects in Africa Asia and elsewhere and have been successful in helping parties reach cooperative solutions Regional integration agreements though not necessary for regional cooperation may also be helpful by embedding the negotiations on regional cooperation in a broader institutional framework The authors examine these issues with the support of both analysis and a number of case studies This paper a product of Trade Development Research Group is part of a larger effort in the group to examine the role and effects of regional integration Maurice Schiff may be contacted at

mschiff worldbank org *International Organization in the Anarchical Society* Tonny Brems Knudsen, Cornelia Navari, 2018-05-23 This book takes up one of the key theoretical challenges in the English School's conceptual framework namely the nature of the institutions of international society. It theorizes their nature through an analysis of the relationship of primary and secondary levels of institutional formation so far largely ignored in English School theorizing and provides case studies to illuminate the theory. Hitherto the School has largely failed to study secondary institutions such as international organizations and regimes as autonomous objects of analysis seeing them as mere materializations of primary institutions. Building on legal and constructivist arguments about the constitutive character of institutions it demonstrates how primary institutions frame secondary organizations and regimes but also how secondary institutions construct agencies with capacities that impinge upon and can change primary institutions. Based on legal and constructivist ideas it develops a theoretical model that sees primary and secondary institutions as shared understandings enmeshed in observable historical processes of constitution reproduction and regulation.

Sustainable Development, Regional Governance, and International Organizations Anastassia Obydenkova, 2024-06-28 This book aspires to establish a dialogue among the studies of sustainable development global environmental politics comparative regionalism and area studies of Eurasia. The chapters in this book reflect deep knowledge of the authors of the main trends in environmental politics at global international and national levels before the invasion in Ukraine in 2022. First the book looks into the role and impact of international organizations such as the European Union EU European Bank for Reconstruction and Development EBRD Arctic Council AC and Global Forums on Climate Action on post Communist states but also the role of nation states e.g. Russia Kazakhstan and China. Second the book explores relatively new international organizations such as the Eurasian Economic Union EAEU the Eurasian Development Bank and the Shanghai Cooperation Organization SCO. How do the EAEU EDB and the SCO matter if at all in promoting an environmental agenda? How do the EU EBRD and the AC advance the environmental agenda across the post Communist region? This book aspires to answer these questions and to shed more light on the challenges to sustainable development in post Communist Europe Central Asia and Eurasia. With a new foreword and afterword this book will appeal to students scholars and researchers of political science international relations area studies as well as practitioners and policymakers working in international organizations and dealing with challenges of sustainable development. The other chapters were originally published as a special issue of *Problems of Post Communism*.

Friedrichs, 2024-10-23 International Organizations IOs have been at the forefront of responding to crises in the 21st century and yet there is little comparative research on how and how effectively they have done this This book fills this gap by exploring what roles IOs take in response to global crises and to what effect Bringing together a range of international contributors the book examines a vast array of international and regional organizations including the International Organization for Migration World Health Organization African Union and European Union Aiming to answer key questions about IO behaviour the book investigates these IOs responses to pressing issues including the global COVID 19 pandemic the liberal order and security and the climate crisis States, International Organizations and Strategic Partnerships Lucyna Czechowska, Andriy Tyushka, Agata Domachowska, Karolina Gawron-Tabor, Joanna Piechowiak-Lamparska, 2019 In post Cold War international relations strategic partnerships are an emerging and distinct analytical and political category critical in understanding the dynamics of contemporary strategic cooperation between states and International Organizations However the idea of strategic partnerships has remained under theorized and overshadowed by the alliance theory Addressing this clear cut gap in the International Relations Foreign Policy Analysis literature this book originally endeavors to theorize and empirically test the analytical model of strategic partnerships as a new form of sustainable international cooperation in times of globalized interdependence and turbulence **Authoritarian Regionalism in the World of International Organizations** Anastassia V. Obydenkova, Alexander Libman, 2019-05-02 The

interconnection between international organizations IOs membership and democratization has become a topic of intense debate. However, the main focus of the literature so far has been on IOs created by democratic states and comprised mostly of democracies, for example, the European Union. In contrast to existing studies, this book focuses on another group of regional IOs referred to as non-democratic IOs, which are organizations founded by autocracies. How do these newly emerged organizations interrelate and interact with the outside world? How do they counteract and confront the danger of democratization in their own member states and neighboring states? This book aims to address these questions by developing a new theory of authoritarian regionalism and by combining both quantitative and qualitative analysis to test it. The quantitative analysis uses a large dataset of all regional organizations worldwide for the post-World War II period with the aim of defining historical trends in development and the modification of regionalism over the last seven decades (1945–2015). Qualitative analysis refines and develops the argument by looking at the case of post-Soviet Eurasia. The book uncovers a new type of regionalism, authoritarian regionalism, and traces its historical roots as well as its implications for modern politics. The book is the first attempt to systematically investigate the functioning and the impact of authoritarian regionalism as a new phenomenon as well as its implications for democratization world-wide. The book contributes to the theory of regionalism, international organizations studies, studies of autocracies, foreign policy, and democratization world-wide.

International Organizations and the Management of Regime Complexity Diana Panke, Sören Stapel, 2025-05-15

Regime complexity, which is characterized by overlap between international organizations IOs concerning both policy competencies and member states, has been increasing over time. It is a defining feature of today's international system. As the regime complexity literature points out, overlaps between IOs carry potential negative effects, such as duplicated efforts or incompatible norms. This book argues that IOs can actively manage regime complexity and potentially avoid negative side effects or even create positive benefits. Yet, overlapping IOs differ in how they react. To explain under what conditions IOs disregard overlaps or manage them by resorting to confrontation or collaboration, this book addresses the following research questions: Why do organizations differ in their responses to overlaps? Why do some opt for disregard while others choose confrontation or engage in collaboration? These questions are answered by studying a subset of IOs, namely regional international organizations RIOs, which recruit their member states on the basis of geographic criteria. It introduces a novel theoretical selection model on three junctures: saliency, ideological fit, and contextual uncertainties. This influences whether overlapping RIOs disregard one another and do not actively manage regional regime complexity (low saliency) when they choose confrontation (high saliency but low ideological fit) and when they opt for one of two ways to engage in collaboration, namely coordination (high saliency, high ideological fit, limited contextual uncertainty) or cooperation (high saliency, high ideological fit, high contextual uncertainty). The corresponding hypotheses are comprehensively analyzed in qualitative case studies from Africa, the Americas, Asia, and Europe.
