Alan Winters, 2003 This text examines regionalism from the perspective of developing countries It presents a comprehensive account of existing theory and empirical results and incorporates the findings of formal analyses of the politics and dynamics of regionalism **Regional Governance in Post-NAFTA North America**

Brian Bow, Greg Anderson, 2014-10-30 Twenty years after NAFTA the consensus seems to be that the regional project in North America is dead The trade agreement was never followed up by new institutions that might cement a more ambitious regional community The Security and Prosperity Partnership SPP launched with some fanfare in 2005 was quietly discontinued in 2009 And new cooperative ventures like the US Canada Beyond the Border talks and the US Mexico Merida Initiative suggest that the three governments have reverted to the familiar pre NAFTA pattern of informal incremental bilateralism One could argue however that NAFTA itself has been buried and yet the region somehow lives on albeit in a form very different from regional integration in other parts of the world A diverse group of contributors from the United States Canada and Mexico with experience in academia government service think tanks and the private sector bring to bear a sophisticated and much needed examination of regional governance in North America its historical origins its connection to the regional distribution of power and the respective governments domestic institutions and the variance of its forms and function across different issue areas The editors begin by surveying the literature on North American regional politics matching up developments there with parallel debates and controversies in the broader literatures on comparative regional integration and international policy coordination more generally Six contributors later explore the mechanisms of policy coordination in specific issue areas each with an emphasis on a particular set of actors and with its own way of characterizing the relevant political and diplomatic dynamics Chapters on the political context for regional policy coordination follow leading to concluding remarks on the future of North America At a time when scholarly interest in North America seems to be waning even while important and interesting political and economic developments are taking place this volume will reinvigorate the study of North America as a region to better understand its past present and future Regional Competition

Eurasian Politics: Ideas, Institutions and External Relations Mr Tulsiram, Mr Ajay Patnaik, 2013-06-15 The transitional politics of Eurasian space is marked by a constant struggle among three sets of ideas and institutions: the 1 is the remarkable resilience of Soviet ideas and institutions; 2 an attempt by the regimes of these states to reinvent the historical and cultural traditions of pre-Soviet periods; and third is an attempt by a section of the powerful elite to superimpose Western liberal ideas and institutions. There is a strange intertwining of these ideas and institutions. This book examines the extent to which the post-Soviet politics has departed from the Soviet one. What are the new ideational structures emerging in these states and how far have they crystallised into institutions? What are the external influences which are shaping the institutions in the Eurasian space? And finally what are the various dynamics of geopolitics in this region? Experts from various countries will delve into the shifting dynamics of Eurasian politics.
