Regional Development Reconsidered:

Regional Development Reconsidered Gündüz Atalik, Manfred M. Fischer, 2012-12-06 In the last few years research on regional development has increased dramatically Real world concerns have to a certain extent driven this scientific concern of interest The field has been given a big boost in particular by the process of European integration and the attempt to understand how this deeper integration will work at the regional level This volume makes a modest attempt to reconsider the issue of regional development mainly from an European perspective and in the light of the transition of society towards a knowledge driven economy It originated from the Thirteenth European Advanced Studies Institute in Regional Science held in Istanbul July 28 2000 In producing the book as friends and colleagues we have benefited from the possibility of exchange of ideas and experience We have also received useful assistance from the referees who have offered observations and advice in their written reports The soundness of their comments has contributed immensely to the quality of the volume We should in addition like to acknowledge the timely manner in which contributing authors have responded to our requests and their willingness to follow the stringent editorial guidelines

Regional Development Reconsidered Allen John Scott, Michael Storper, 1990 *Regional Development Reconsidered* Urban Foundation, 1994 [The Theory, Practice and Potential of Regional Development](#) Kelly Vodden, David Douglas, Sean Markey, Sarah Minnes, Bill Reimer, 2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build

The Routledge Handbook to Regional Development in Central and Eastern Europe Gábor Lux, Gyula Horváth, 2017-07-06 Twenty five years into transformation Central and Eastern European regions have undergone substantial socio economic restructuring integrating into European and global networks and producing new patterns of regional differentiation and development Yet post socialist modernisation has not been without its contradictions manifesting in increasing social and territorial inequalities Recent studies also suggest there are

apparent limits to post socialist growth models accompanying a new set of challenges within an increasingly uncertain world Aiming to deliver a new synthesis of regional development issues at the crossroads between post socialism and post transition this book identifies the main driving forces of spatial restructuring in Central and Eastern Europe and charts the different regional development paths which take shape against the backdrop of post crisis Europe A comparative approach is used to highlight common development challenges and the underlying patterns of socio economic differentiation alike The issues investigated within the Handbook extend to a discussion of the varied economic consequences of transition the social structures and institutional systems which underpin development processes and the broadly understood sustainability of Central and Eastern Europe s current development model This book will be of interest to academics and policymakers working in the fields of regional studies economic geography development studies and policy

Handbook of Social Capital and Regional Development Hans Westlund, Johan P. Larsson, 2016-12-30 The role of social capital in regional development is a multifaceted topic which is studied all over the world using various methods and across numerous disciplines It has long been evident that social capital is important for regional development however it is less clear how this works in practice Do all types of social capital have the same effects and are different kinds of regions impacted in the same way This book is the first to offer an overview of this rapidly expanding field of research and to thoroughly analyse the complex issue of social capital and regional development

Reconsidering Regions in an Era of New Nationalism Alex Finkelstein, Anne F. Hyde, 2023-11 Regions connect and divide us even as global economies weather and germs batter us Historians literary scholars and social scientists use region to ground and challenge ideas about national belonging In *Reconsidering Regions in an Era of New Nationalism* Alexander Finkelstein and Anne F Hyde have assembled leading scholars of regionalism to discuss the relationship of region to nation The contributors explore how historical forces have changed regional associations and how regional associations have changed culture and history The themes of culture space and institutions organize this volume contributors historicize how race and racial thinking have evolved as a major force to define region and nation over time the essays raise questions about the stability and validity of canonical regions in U S history to find new complexity in how these blocs form and how they understand themselves and they focus on historicist and conjunctural trends and how institutions and ordinary people shape regional identities through politics and cultural change throughout history Challenging ideas about both national belonging and local association the contributors emphasize how regional analysis deepens understanding of migration race borders infrastructure climate and Native sovereignty

Small Business in Indonesia Peter van Diermen, 2019-05-23 First published in 1997 this volume examines why small scale enterprises have performed so well in Indonesia given that the country s labour force is expected to expand and urbanise rapidly between 1995 and 2025 It also considers what future contribution small scale enterprises could make Peter van Diermen explores the industrial organisation of family businesses local development in a global context and family businesses

in Jakarta in considering the unexpected success of small scale enterprises and the future contributions they could make

External Economies and Cooperation in Industrial Districts Roberta Rabellotti, 2016-07-27 This book aims to explore the potential of the industrial district model through the analysis of Italy the land of districts and in Mexico a less developed country Empirical research assesses the extent to which the core characteristics of the model correspond to the clusters analyzed The investigation focuses upon external economies and cooperation which stem directly from the industrial district model with particular emphasis upon the intense linkages existing within the clusters examined *Globalization, Export Orientated Employment and Social Policy* S. Razavi, R. Pearson, C. Danloy, 2004-04-30 Gender and development theory and analysis is replete with implicit assumptions that women s entry into the world of paid work will positively affect their status both in the household and in the public sphere Until recently the debate on global factories and export production has remained focused on women s individual experience of export employment and the extent to which this represents a positive opportunity or gross exploitation In spite of the extended discussion of rights and citizenship in the global economy little attention has hitherto been paid to the implications for women s entitlements arising out of their pivotal role in export sectors Whilst many assume that women s visible and crucial presence in key economic sectors will be reflected in the ways in which social policies are formulated there has been up to now little empirical and analytical engagement with this question This volume bringing together detailed commissioned studies from six developing countries aims to fill this gap **Spatial**

Autocorrelation and Spatial Filtering Daniel A. Griffith, 2013-03-19 Exploiting the old maxim that a picture is worth a thousand words scientific visualization may be defined as the transformation of numerical scientific data into informative graphical displays It introduces a nonverbal model into subdisciplines that hitherto employed mostly or only mathematical or verbal conceptual models The focus of this monograph is on how scientific visualization can help revolutionize the manner in which the tendencies for dis similar numerical values to cluster together in location on a map are explored and analyzed affording spatial data analyses that are better understood presented and used In doing so the concept known as spatial autocorrelation which characterizes these tendencies and is one of the key features of georeferenced data or data tagged to the earth s surface is further de mystified This self correlation arises from relative locations in geographic space

Perceptions of Marginality Heikki Jussila, Walter Leimgruber, Rosrer Majoral, 2019-07-09 First published in 1998 this volume takes an international approach theoretical and regional perceptions and experiences of marginality along with some key case studies in Arctic North America Greenland Aboriginal Australia and the Republic of Ireland Its contributors are geographers from all over the world It is part of a series which aims to publish new scientific work on the dynamism of the marginal and critical regions of the world and concentrates on understanding marginality and its processes the human process and its agents comparative approaches and different policy responses to economic social and environmental problems along with studying the human response to global change and its implications for marginalization **Knowledge**

Management John F. Wilson, Ian Jones, Steven Toms, 2021-07-19 This shortform book presents key peer reviewed research selected by expert series editors and contextualised by new analysis from each author on the subject of knowledge management in industrial history With contributions on knowledge management knowledge transfer knowledge loss knowledge creation competition and co operation in producing skilled employees and ownership structures and their relation to knowledge management this volume provides an array of fascinating insights into industrial history Of interest to business and economic historians this shortform book also provides analysis and illustrative case studies that will be valuable reading across the social sciences

Introducing Human Geographies Kelly Dombroski, Mark Goodwin, Junxi Qian, Andrew Williams, Paul Cloke, 2024-07-09 Introducing Human Geographies is a travel guide into the academic subject of human geography and the things that it studies The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography This updated and much extended fourth edition includes a diverse range of authors and topics from across the globe with a completely revised set of contributions reflecting contemporary concerns in human geography Presented in four parts with a streamlined structure it includes over 70 contributions written by expert international researchers addressing the central ideas through which human geographers understand and shape their subject It maps out the big foundational ideas that have shaped the discipline past and present explores key research themes being pursued in human geography s various sub disciplines and identifies emerging collaborations between human geography and other disciplines in the areas of technology justice and environment This comprehensive stimulating and cutting edge introduction to the field is richly illustrated throughout with full colour figures maps and photos The book is designed especially for students new to university degree courses in human geography across the world and is an essential reference for undergraduate students on courses related to society place culture and space

Reconsidering the Impact of Climate Change on Global Water Supply, Use, and Management Rao, Prakash, Patil, Yogesh, 2016-11-04 Changes in the planet s climate in recent years have led to significant impacts on natural resources and ecosystems New strategies must be adopted in order to support the protection and continued development of numerous natural resources Reconsidering the Impact of Climate Change on Global Water Supply Use and Management is a pivotal reference source for the latest scholarly material on the relationship between global climate changes and the planet s water ecosystems Highlighting relevant environmental social and economic issues this book is ideally designed for academics researchers policy makers students and practitioners interested in the impacts of climate change on global water resources

Leadership and Institutions in Regional Endogenous Development Robert John Stimson, Roger Stough, Maria Salazar, 2009-01-01 The authors of this comprehensive book provide a detailed rationale and original theory for the study of leadership and institutional factors including entrepreneurship in the growth and development of cities and regions They demonstrate why leadership institutions and entrepreneurship can and indeed do play a crucial enhancing role as key

elements in the process of regional endogenous growth The so called new growth theory emphasizes endogenous processes While some of the literature refers to leadership and institutional factors there has been little analysis of the explicit roles these factors play in the growth and development of cities and regions This book remedies that gap beginning with a brief overview of the evolution of the new growth theory in regional economic development in which the emphasis is on endogenous factors The book then discusses leadership and institutional factors in that context creating a new path for understanding regional economic development processes Multiple case studies from different parts of the world illustrate the theoretical concepts Students and scholars in regional development planning and public policy will find this volume invaluable

Dynamic Agroindustrial Clusters Gabriel Casaburi,1999-03-08 The recent economic liberalization in developing countries is making many sectors succumb to new competitive pressures Governments face the dilemma of how to help firms compete without falling back into failed dirigiste policies Based on recent findings on the importance of inter firm cooperation public private collaboration and local policies in boosting competitiveness this book analyzes how much these elements explain the new dynamism of two agroindustrial sectors in Argentina and Chile dairy and fresh fruit respectively

Creating Competitiveness David B. Audretsch,Mary Walshok,2013-02-01 Although competitiveness is typically associated with firms they are not the only organizational body whose performance is dependent upon competitiveness This poignant and insightful book focuses on how the varied economic performance of cities and regions both within nations as well as across nations during the era of the Great Recession also highlights the need for competitiveness Competitive cities and regions enjoy a superior economic performance while their less competitive counterparts experience poorer economic growth and increasing unemployment Using leading frameworks this study provides applications and case studies about what shapes the competitiveness of places in an international context Specific policies that enhance local competitiveness are identified and analyzed Scholars of regional economics urban economics urban planning and public policy as well as policymakers will find plenty of invaluable information in this invigorating book

Networks, Governance and Economic Development Mari Joes Aranguren Querejeta,Cristina Iturrioz Landart,James Wilson,2008-01-01 This innovative volume explores the role of networks and variation in their forms of governance in delivering successful local and regional economic development Written by experts from different disciplines it offers a judicious mix of general theoretical reflections and specific case studies of different places sectors and scales The result is an important contribution to an emerging research agenda on networked governance and the governance of networks and their influence on competitiveness in and across different scales of economic activities Bob Jessop Lancaster University UK Networks Governance and Economic Development represents one of the most authoritative compilations on the role of networks The editors have brought together an impressive group of scholars who from different disciplinary approaches provide a fantastic overview of the key aspects in the governance of networks and on how they affect local economic

development Andr s Rodr guez Pose London School of Economics UK This compact and authoritative book brings together the topical themes of networks and governance to advance understanding of the determinants of local economic development in the context of increasingly global relationships Analyzing the governance of networks is critical in understanding how individual localities are able to promote development and consolidate positions within global production systems In addressing such issues this book accomplishes a significant bridging of disciplinary boundaries incorporating different theoretical and empirical perspectives on the meanings and roles of territory economic development and different forms of networks and governance Networks Governance and Economic Development brings together the analysis of leading researchers in their fields following their interactions at a European Science Foundation exploratory workshop The chapters will be an invaluable resource to researchers working in the fields of regional economic development economic geography and economic policy as well as postgraduate students taking modules that specialize in aspects of the above themes

Innovation Clusters and Interregional Competition Johannes Bröcker, Dirk Dohse, Rüdiger Soltwedel, 2012-11-02
Empirical evidence about cluster building the emphasis of new growth theory on innovation the recent interest in economic geography and the high pressure on politicians to establish favourable conditions for attracting dynamic industries have triggered a wave of research during the last decade trying to understand more deeply why how and where clusters emerge and what factors determine their respective success or failure In this volume the world s leading experts contribute to our understanding of regional innovation cluster formation and the factors influencing regional productivity and innovative performance It provides a timely and comprehensive picture on innovation location networks and clusters as important means in an environment of intensifying interregional competition
