Global Politics of Regionalism Mary Farrell, Björn Hettne, Luk Van Langenhove, 2005-08-20 This book explores the phenomenon of regionalism In a seeming contradiction to globalization there is a growing tendency for countries to enter into regional arrangements as a response to the pressures of operating in a global marketplace But regionalism is also emerging as a phenomenon in its own right serving distinct purposes and taking different forms in different areas The contributors explore how these patterns impact on wider issues such as global governance democracy and trade The book reviews the major theoretical approaches to regional cooperation including perspectives from international relations political economy economics and sociology It is divided into three main sections theoretical approaches to regionalism issues of regional cooperation such as security monetary issues identity and integration and an exploration of specific case studies including the Middle East Africa the Americas China Europe Asia and the Pacific With an international range of contributors including Bjorn Hettne Louise Fawcett and Andrew Hurrell this in depth and multi disciplinary guide will be of interest to students across the social sciences and to the wider policy community

"L'être situé", Effectiveness and Purposes of International Law Shotaro Hamamoto, Hironobu Sakai, Akiho Shibata, 2015-05-26 The traditional and mainstream conception

of international law presupposes a certain ideal type of State. However, each State is situated in a particular context, an *Etat situ*, and the universal, impartial and non discriminatory application of international law to each State often produces unjustifiable results in the real world. International law thus needs to cope with this existential question in order to ensure and maintain the effectiveness of the international legal order without, however, being trapped by a nihilistic relativism. This approach requires a flexible understanding and reconstruction of the international law making theory. The present collection of essays gathers contributions written in honour of Professor Ryuichi Ida by his colleagues and former students inspired by the *dicataire* who places particular emphasis upon the context, effectiveness and purposes of international law. The *dicataire*'s perspective finds wide ranging applications and the present collection deals with international economic law, international criminal law, international environmental law, international law making, the law of State responsibility and the law of international organizations. Contributors are Tatsuya Abe, Pierre Marie Dupuy, Shotaro Hamamoto, Machiko Kanetake, Tomohiko Kobayashi, Tomonori Mizushima, Hironobu Sakai, Akiho Shibata, Mari Takeuchi, Dai Tamada, Sakda Thanitcul, Zhi an Wang and Takuhei Yamada.

Enlarging the Euro Area Kenneth Dyson, 2006-11-02. This book seeks to offer the first in depth and systematic analysis of the challenges of the Euro Area and the eastward enlargement of the European Union. It focuses in particular on how the prolonged process of accession to the Euro Area is affecting domestic economic policies in the accession states of east central Europe. It contributes to Europeanization studies, comparative political economy and to studies of Economic and Monetary Union. It also provides a picture of processes of domestic transformation in such countries as the three Baltic States, Bulgaria, the Czech Republic, Hungary, Poland and Romania. The book brings together a range of recognized experts from across Europe and combines country and sectoral case studies with a thematic treatment. It begins by offering an outside in perspective which situates the effects of EMU on the accession states in the wider context of the development of global economic norms. The second part focuses on an inside out analysis of how Euro Area accession affects the states of east central Europe, their policies, politics and public institutions. The final part assesses how Euro Area accession is affecting key policy sectors in east central Europe: financial market regulation, fiscal policies and welfare states and labour markets.

process this timely book will appeal to EU and international law scholars and practitioners as well as those looking to future legal harmonisation in other regions in Asia Latin America and Africa

Reforming WTO Rules on State-Owned Enterprises Yingying Wu, 2019-01-28 This book argues that the trade distorting effects of advantages associated with SOEs are more severe from an economic perspective and the behavior of SOEs after receiving advantages is of more concern compared to private owned enterprises POEs The premise is that the existence of SOEs per se is not the essential problem rather the underlying problems are i the disproportionate granting of advantages to SOEs compared to POEs and ii the behavior of SOEs once they receive advantages The book offers a systematic analysis focusing on the various advantages granted to SOEs and their subsequent behavior Its detailed analysis reveals the inadequacy of current WTO rules and is complemented by a number of concrete proposals

Climate and Trade Policy Carlo Carraro, Christian Egenhofer, 2007-01-01 The difficulty of achieving and implementing a global climate change agreement has stimulated a wide range of policy proposals designed to favour the participation of a large number of countries in a global cooperative effort to control greenhouse gas emissions This significant book analyses the viability of controlling climate change through a set of regional or sub global climate agreements rather than via a global treaty The authors argue that the principal challenge in devising a truly global architecture is in providing sufficient incentives for all party participation whilst also ensuring compliance which raises global governance issues The main purpose of this study is not to trace in detail the process of negotiation and implementation of international regimes but rather to evaluate whether a series of regional or sub global agreements is more likely to achieve climate change control than a global agreement attempted from the outset From a political science perspective the focus centres on institution building and governance From an economic perspective it concentrates on incentives used to encourage participation in a global and non fragmented agreement Lessons from EU integration and actual global and regional trade agreements are employed in order to analyse the future prospects of climate change negotiations The focus on climate change and more generally the management of environmental and resource problems will make this book essential reading for participants observers and analysts of the public policy process as it concerns climate change and more generally the management of environmental and resource problems In addition the rich combination of international relations theory and economic literature with findings from the policy process will appeal to both general readers and the academic community

The Right to Regulate in International Investment Law Catharine Titi, 2014-12-01 Since the inception of the international investment law system investment promotion and protection have been the *raison d'être* of investment treaties and states have confined their policy space in order to attract foreign investment and protect their investors abroad Languishing in relative obscurity until recently the right to regulate has gradually come to the spotlight as a

key component of negotiations on new generation investment agreements around the globe States and regional organisations including notably the European Union and the United States have started to examine ways in which to safeguard their regulatory power and guide and delimit the interpretive power of arbitral tribunals by reserving their right to pursue specific public policy objectives The monograph explores the status quo of the right to regulate in order to offer an appraisal and a reference tool for treaty-makers thus contributing to a better understanding of the concept and the broader discourse on how to enhance the investment law system's legitimacy

EU

Freedoms, Non-EU Countries and Company Taxation D.S. Smit, 2012-06-01 In today's environment of largely globalizing national economies international economic integration does not stop at the frontiers of the European Union. Many non-EU based enterprises are carrying on business in the European Union through the operation of branches or subsidiaries established in EU Member States and a large number of EU based enterprises maintain a diversified range of investments outside the Union. Accordingly in both inward and outward investment relationships economic openness is key nowadays. This legal relationship between EU Member States and the EU as a whole vis-à-vis the rest of the world is the starting point of this book. The author analyses the freedom of investment concept between EU Member States and non-EU States under EU law and specifically its effect on company taxation regimes from the perspective of multinational enterprises. Focusing on the impact of the Treaty freedoms and international integration agreements on relations with non-EU Member States, this work is the first to specifically address the all important issue under which circumstances can investment related rights deriving from EU law be invoked by companies established in non-EU states. The analysis identifies the impact of the EU Treaty freedoms on six basic corporate income tax themes that are of particular interest for multinational enterprises: limitation on the deduction of interest expenses, withholding taxes on dividend interest and royalty payments, relief for double taxation of income received from foreign investments, CFC legislation, non-deduction of foreign losses from the domestic taxable base and company taxation upon the transnational transfer of business assets. **Rethinking the World Trade Order**

Mohammad F. A. Nsour, 2010 Regional Trade Agreements RTAs have proliferated at an unprecedented pace since the creation of the World Trade Organization (WTO). Although the WTO legally recognizes countries' entitlement to form RTAs, neither the WTO nor parties to RTAs have an unequivocal understanding of the relationship between the WTO and RTAs. In other words, the legal controversies, the result of uncertainty regarding the application of the WTO GATT laws, risk undermining the objectives of the multilateral trade system. This research tackles a phenomenon that is widely believed to be heavily economic and political. It highlights the economic and political aspects of regionalism but largely concentrates on the legal dimension of regionalism. The main argument of the book is that the first step to achieving harmony between multilateralism and regionalism is the identification of the legal uncertainties that regionalism produces when countries form RTAs without taking into account the substantive and procedural aspect of the applicable WTO GATT laws. The book calls for the creation of a legal instrument, i.e. agreement on RTAs, that combines all of the applicable law on RTAs and simultaneously clarifies the legal language used therein. Likewise, the WTO should have a proactive role, not merely as a coordinator of RTAs but as a watchdog for the multilateral system that has the power to prosecute violating RTAs. The author is aware that political concerns are top priorities for governments and policy makers when dealing with the regionalism problematic. Hence legal solutions or proposals are not sufficient to create a better international trade system without the good will of the WTO Members who are in fact the players who are striving to craft more regional trade arrangements. Negotiating the Free
