into one another and the unsaid space of the text becomes an initiatory secret Understanding this mode of discourse allows us to resolve many apparent contradictions in Plotinus thought The Region of Silence Maria Grazia Ciani,1987

a more complex variable concept than its conventional translation of imitation can now convey Far from providing a static model of artistic representation mimesis has generated many different models of art encompassing a spectrum of positions from realism to idealism Under the influence of Platonist and Aristotelian paradigms mimesis has been a crux of debate between proponents of what Halliwell calls world reflecting and world simulating theories of representation in both the visual and musico poetic arts This debate is about not only the fraught relationship between art and reality but also the psychology and ethics of how we experience and are affected by mimetic art Moving expertly between ancient and modern traditions Halliwell contends that the history of mimesis hinges on problems that continue to be of urgent concern for contemporary aesthetics
