Quality Risk Management in the FDA-Regulated Industry José Rodríguez-Pérez, 2017-02-21 The purpose of this new edition is to offer an updated view of the risk management field as it applies to medical products Since the publication of the first edition 2012 the emphasis on risk based

processes has growth exponentially across all sectors and risk management is now considered as significant as quality management ISO 9001 was revised and now requires that top management promote the use of risk based thinking ISO 13485 2016 which specifies the requirements for a quality management system specific to the medical devices industry also now shows a greater emphasis on risk management and risk based decision making In addition the FDA Food Safety Modernization Act FSMA is the most important reform of U S food safety laws in more than 70 years This indispensable book presents a systematic and comprehensive approach to quality risk management It will assist medical and food product manufacturers with the integration of a risk management system or risk management principles and activities into their existing quality management system by providing practical explanations and examples The appropriate use of quality risk management can facilitate compliance with regulatory requirements such as good manufacturing practice or good laboratory practice All chapters have been updated and revised and a new chapter has been added to discuss some of the most common pitfalls and misunderstandings regarding risk management specifically those related to the use of FMEA as the only element of risk management programs One of the appendices includes 12 case studies and the companion CD ROM contains dozens of U S FDA and European guidance documents as well as international harmonization documents ICH and GHTF IMDRF related to risk management activities as well as a 30 question exam with answers on the material discussed in the book

Quality Risk Management in the FDA-Regulated Industry Jose (Pepe) Rodriguez-Perez, 2024-04-18 For quality professionals and manufacturers in the food safety and medical device industries risk management is essential to ensuring organizations meet FDA regulations and requirements Without these recognized standards the lives of patients and consumers are placed in jeopardy In this third edition of *Quality Risk Management in the FDA Regulated Industry* Jose Rodriguez Perez provides an updated view of the risk management field as it applies to FDA regulated products using risk based thinking *International Regulation of Natural Health Products* John R. Harrison, 2008 This book reviews natural health product laws and regulations for Canada s primary natural health products NHP trading partners namely Australia China France Germany Hong Kong India USA United Kingdom and the European Union and compare them to Canada s natural health product regulations The study was also undertaken to identify priority areas where policy research should be focussed and then propose strategies to address these selected policy research areas The Canadian NHP definition was used to compare similar classes of products for these other countries Further the major components of the Canadian regulatory framework for NHPs that were used for research purposes were the following Product Licensing including Standards of Evidence Site Licensing Good Manufacturing Practices and Adverse Reaction Reporting Tables of regulatory information were prepared for each country providing sections for certain aspects of the Canadian NHP regulatory framework and including the main governmental regulatory authority for each country This work reveals a fast paced change and revision of national and international regulations for NHPs such as herbals vitamins minerals and homeopathic medicines Many changes

in the European countries were precipitated by the implementation of European Union Directives Canada's major trading partner the United States classifies some NHPs as dietary substances while other NHPs are under the U S FDA's control as non prescription medicine and homeopathic medicines which are classified as drugs In the United States dietary substances require little regulatory scrutiny yet the regulatory environment in the United States is moving toward a more regulated system Strategies for prioritizing policy research needs in the area of international regulations of Natural Health Products NHPs were developed The priority areas for policy research fell into two main categories the safety of the products being manufactured and sold to Canadians and processes to facilitate trade between countries The overall aim for trade development should be to look for methods and means of further harmonization with trading partners and to develop Mutual Recognition Agreements MRAs
