Regulation Through Litigation:

Regulation through Litigation Kip W. Viscusi, 2004-05-13 Recent high profile lawsuits involving cigarettes guns breast implants and other products have created new frictions between litigation and regulation Increasingly litigation is being used as a financial lever to force companies to accept negotiated regulatory policies policies that invariably involve less public input and accountability than those arising from government regulation The process not only usurps the traditional governmental authority for regulation but also shifts the locus of establishing tax policy from the legislature to the parties involved in the litigation Citizen interests are not explicitly represented and there is no mechanism to ensure that these outcomes are in society's best interests By focusing on case studies involving the tobacco industry guns lead paint breast implants and health maintenance organizations the contributors to this volume collectively shed light on the likely consequences of regulation through litigation for insurance markets and society at large They analyze the ramifications of large scale lawsuits mass torts and class actions for the insurance market and advocate increased public scrutiny of attorney reimbursement and a competitive bidding process for all lawsuits involving government entities as the plaintiffs

Regulation Versus Litigation Daniel P. Kessler, 2011-02 The efficacy of various political institutions is the subject of intense debate between proponents of broad legislative standards enforced through litigation and those who prefer regulation by administrative agencies This book explores the trade offs between litigation and regulation the circumstances in which one approach may outperform the other and the principles that affect the choice between addressing particular economic activities with one system or the other Combining theoretical analysis with empirical investigation in a range of industries including public health financial markets medical care and workplace safety Regulation versus Litigation sheds light on the costs and benefits of two important instruments of economic policy *Experimentalist Competition Law and the Regulation of Markets* Yane Svetiev, 2020-11-26 This book charts the emergence of experimentalist governance in the implementation of EU competition law as a response to uncertainty and the limits of hierarchical enforcement in an increasingly dynamic and heterogeneous economic environment It contributes to ongoing debates about the current state of EU competition law and provides an innovative account of emergent enforcement trends and its future direction It also argues that an experimentalist evolution of competition law and market regulation attenuates concerns about the competitive strictures of EU law on national economic and regulatory institutions Through its focus on experimentalist governance the book provides guidance on completing experimentalist infrastructures for market regulation as well as on the role of courts in triggering and sustaining experimentalist solutions As such it offers a novel perspective on implementing competition law in the EU and beyond

Regulating Lifestyle Risks Alberto Alemanno, Amandine Garde, 2015-01-01 This collection of essays looks at the role the European Union could and should play in promoting healthier lifestyle in light of the moral philosophical legal and political challenges associated with the regulation of individual choices By tackling the main non

communicable diseases NCD risk factors tobacco consumption harmful use of alcohol unhealthy diets and lack of physical activity the contributors endeavour to identify common themes and determine whether and if so to what extent the lessons learned in relation to each area of EU intervention could be transposed to the others By focusing on the European Union legal order the book highlights both the opportunities that legal instruments offer for NCD prevention and control agenda in Europe as well as the constraints that the law imposes on policy makers *Personal Responsibility in Food Consumption Act* United States. Law and Reputation Roy Shapira,2020-09-17 The law shapes behavior not only by imposing sanctions but also by producing information on how powerful entities behave **Federalism on Trial** Paul Nolette,2015-02-23 It is one of the happy incidents of the federal system Justice Louis Brandeis wrote in 1932 that a single courageous state may if its citizens choose serve as a laboratory and try novel social and economic experiments without risk to the rest of the country It is one of the features of federalism in our day Paul Nolette counters that these laboratories of democracy under the guidance of state attorneys general are more apt to be dictating national policy than conducting contained experiments In Federalism on Trial Nolette presents the first broadscale examination of the increasingly nationalized political activism of state attorneys general Focusing on coordinated state litigation as a form of national policymaking his book challenges common assumptions about the contemporary nature of American federalism In the tobacco litigation of the 1990s a number of state attorneys general managed to reshape one of America s largest industries all without the involvement of Congress or the executive branch This instance of prosecution as a form of regulation is just one case among many in the larger story of American state development Federalism on Trial shows how new social policy regimes of the 1960s and 1970s adopting national objectives such as cleaner air wider access to health care and greater consumer protections promoted both adversarial legalism and new forms of cooperative federalism that enhanced the powers and possibilities open to state attorneys general Nolette traces this trend as AGs took advantage of these new circumstances and opportunities through case studies involving drug pricing environmental policy and health care reform The result is the first full account far reaching and finely detailed of how rather than checking national power or creating productive dialogue between federal and state policymakers the federalism exercised by state attorneys general frequently complicates national regulatory regimes and seeks both greater policy centralization and a more extensive reach of the American regulatory state **Big Tech and EU Law** Elaine

Fahey,2025-07-15 This book explores the use of EU law by Big Tech in the transatlantic context Elaine Fahey examines how digital platforms utilise both top down and bottom up approaches to litigate lobby and lawyer global standards analysing their attempts to strategically exploit the legislation **Human and Ecological Risk Assessment** Dennis J.

Regulatory Breakdown Cary Coglianese, 2012-08-16 Regulatory Breakdown The Crisis of Confidence in U S Regulation brings fresh insight and analytic rigor to what has become one of the most contested domains of American domestic politics Critics from the left blame lax regulation for the housing meltdown and financial crisis not to mention major public health disasters ranging from the Gulf Coast oil spill to the Upper Big Branch Mine explosion At the same time critics on the right disparage an excessively strict and costly regulatory system for hampering economic recovery With such polarized accounts of regulation and its performance the nation needs now more than ever the kind of dispassionate rigorous scholarship found in this book With chapters written by some of the nation's foremost economists political scientists and legal scholars Regulatory Breakdown brings clarity to the heated debate over regulation by dissecting the disparate causes of the current crisis as well as analyzing promising solutions to what ails the U S regulatory system This volume shows policymakers researchers and the public why they need to question conventional wisdom about regulation whether from the left or the right and demonstrates the value of undertaking systematic analysis before adopting policy reforms in the wake of disaster

The American Illness F. H. Buckley, 2013-05-28 DIV This provocative book brings together twenty plus contributors from the fields of law economics and international relations to look at whether the U S legal system is contributing to the country's long postwar decline The book provides a comprehensive overview of the interactions between economics and the law in such areas as corruption business regulation and federalism and explains how our system works differently from the one in most countries with contradictory and hard to understand business regulations tort laws that vary from state to state and surprising judicial interpretations of clearly written contracts This imposes far heavier litigation costs on American companies and hampers

economic growth div *The Impact of Regulation on U.S. Manufacturing* United States. Congress. House. Committee on Government Reform. Subcommittee on Regulatory Affairs, 2005

The Cambridge Handbook of Class Actions Brian T. Fitzpatrick, Randall S. Thomas, 2021-02-03 Economic activity is more globally integrated than ever before but so is the scope of corporate misconduct As more and more people across the world are affected by such malfeasance the differences in legal redress have become increasingly visible This transparency has resulted in a growing convergence towards an American model of robust private enforcement of the law including the class action lawsuit This handbook brings together scholars from nearly two dozen countries to describe and assess the class action procedure or its equivalent in their respective countries and where possible to offer empirical data on these systems At the same time the work presents a variety of multidisciplinary perspectives on class actions from economics to philosophy making this handbook an essential resource to academics lawyers and policymakers alike

Cato Supreme Court Review, 2006-2007 Mark K. Moller, 2007-10-25 Published every September in celebration of Constitution Day the Cato Supreme Court Review brings together leading legal scholars to analyze the most important cases of the Court s most recent term It is the first scholarly review to appear after the term s end and the only on to critique the court from a Madisonian perspective

Agents of Justice Quinn Mulroy, 2025-07-11 Agents of Justice chronicles the key role played by agencies in shaping the development of the litigation state the American phenomenon of policy enforcement by private litigation Quinn Mulroy argues that this enforcement strategy is very much by design exploring how civil rights and environmental agencies established during the rights revolution developed creative strategies for mobilizing litigation by private individuals The book examines how and when agency officials acting as agents of justice divert their attention and resources to helping level the playing field for private plaintiffs seeking to protect their rights through the legal system ultimately transferring regulatory authority from the bureaucracy to the courts

Lawyer Barons Lester Brickman, 2011-01-31 This book is a broad and deep inquiry into how contingency fees distort our civil justice system influence our political system and endanger democratic governance Contingency fees are the way personal injury lawyers finance access to the courts for those wrongfully injured Although the public senses that lawyers manipulate the justice system to serve their own ends few are aware of the high costs that come with contingency fees This book sets out to change that providing a window into the seamy underworld of contingency fees that the bar and the courts not only tolerate but even protect and nurture Contrary to a broad academic consensus the book argues that the financial incentives for lawyers to litigate are so inordinately high that they perversely impact our civil justice system and impose other unconscionable costs It thus presents the intellectual architecture that underpins all tort reform efforts
