## **Regulations Institutions And Commitment Comparative Studies Of Telecommunications:**

**Regulations, Institutions, and Commitment** Brian Levy, Pablo T. Spiller, 1996-08-28 Currently privatization and regulatory reform are often viewed as the solution to the problem of poor performance by telecommunications and other public utilities This volume argues that these high expectations may not always be met because of the way a country's institutions and systems interact Handbook of Regulatory Authorities Maggetti, Martino, Di Mascio, Fabrizio, Natalini, Alessandro, 2022-08-12 Featuring a comprehensive analytical collection of interdisciplinary research on regulatory authorities this innovative Handbook combines contributions from leading scholars and regulatory practitioners to present the fundamental theoretical concepts empirical achievements and challenges in the contemporary study of regulatory authorities *Understanding Regulation* Robert Baldwin, Martin Cave, Martin Lodge, 2012 An introduction to the practical and theoretical issues that are central to the study of regulation which a particular focus on contested areas and how they are dealt with *The International Telecommunications Regime: Domestic Preferences and Regime Change* Juan Ratto-Nielsen, 2009-12-26 This study examines the evolution of the international regime in telecommunications with the main objective of furthering our understanding of the process of regime transformation The dominant theories of international relations realism and institutional liberalism specify how states with shared interests use institutions to realize joint gains and to minimize the possibility of defection But these theories have little to say about when states will attempt to change the objectives that lead them to create the international institution in the first place The main goal of this book is to investigate and test the assumption that domestic politics by themselves can explain the dynamics of regime creation evolution and change as it happened within the International Telecommunications Union ITU **The Economics of Contracts** Eric Brousseau, Jean-Michel Glachant, 2002-10-17 A contract is an agreement under which two parties make reciprocal commitments in terms of their behavior to coordinate As this concept has become essential to economics in the last 30 years three main theoretical frameworks have emerged incentive theory incomplete contract theory and transaction costs theory These frameworks have enabled scholars to renew both the microeconomics of coordination with implications for industrial organization labor economics law and economics organization design and the macroeconomics of market decentralized economies and of the institutional framework These developments have resulted in new analyses of a firm's strategy and State intervention regulation of public utilities anti-trust public procurement institutional design liberalization policies etc Based on contributions by the leading scholars in the field this 2002 book provides an overview of developments in these analytical currents presents their various aspects and proposes expanding horizons for theoreticians and practitioners *Evaluation and Development* Robert Picciotto, Eduardo Wiesner Durán, 1998 The Institutional Dimension Evaluation and Development Eduardo Wiesner, 2017-09-08 This study illustrates the social and political principal that institutions matter It explores not only how to get institutions to work efficiently but also how to assess the proper relationship between

institutions and development challenges through evaluative techniques      **Regulatory Bargaining and Public Law** Jim Rossi, 2005-06-06 This text explores the implications of a bargaining perspective for institutional governance and public law in deregulated industries such as electric power and telecommunications Leading media accounts blame deregulated markets for failures in competitive restructuring policies However the author argues that governmental institutions often influenced by private stakeholders share blame for the defects in deregulated markets The first part of the book explores the minimal role that judicial intervention played for much of the twentieth century in public utility industries and how deregulation presents fresh opportunities and challenges for public law The second part of the book explores the role of public law in a deregulatory environment focusing on the positive and negative incentives it creates for the behavior of private stakeholders and public institutions in a bargaining focused political process      Thirsting for Efficiency M. Shirley, 2002-04-18 One billion people in the world lack safe drinking water and almost 2 billion lack adequate sanitation services As a result millions suffer and die every year from water and sanitation related diseases Poor management and inefficient investment are often responsible for this situation and countless past attempts at reform have accomplished little Recently some developing countries have tried to reverse years of mismanagement of their water and sewerage systems by auctioning contracts to private operators Why do countries that have tolerated mismanagement for decades develop a thirst for efficiency What are the results of their efforts to change What determines success or failure This book fills a gap in the literature by systematically answering these important questions It does so by analyzing reforms in six developing country capitals Buenos Aires Argentina Lima Peru Mexico City Mexico Santiago Chile Abidjan Cote d Ivoire and Conakry Guinea and the United States in the 19th century It not only assesses economic factors but also explores the roles of laws politics and norms It provides an economic theory of water that encompasses institutional political and economic aspects of reform      Media and Communications Policy Making Robert G. Picard, 2020-03-25 This textbook focuses on how media and communications policy is made and what influences its design It explores the structures and processes in which policymaking takes place worldwide the factors that determine its forms influence its elements and affect its outcomes It explores how to analyze policy proposals evaluate policy and use policy studies approaches to examine policy and policymaking Truly international in scope it lays out the variety of political social economic and institutional influences on policy the roles of industries and policy advocates in the processes and issues and factors that complicate effective policymaking and skew policy outcomes This textbook is a valuable resource for advanced undergraduate and postgraduate students      **From the "democratic Deficit" to a "democratic Surplus"** Athanasios Psygkas, 2017 Challenging the conventional narrative that the European Union suffers from a democratic deficit Athanasios Psygkas argues that EU mandates have enhanced the democratic accountability of national regulatory agencies This is because EU law has created entry points for stakeholder participation in the operation of national regulators these avenues for public participation were formerly either not open or

not institutionalized to this degree By focusing on how the EU formally adopted procedural mandates to advance the substantive goal of creating an internal market in electronic communications Psygkas demonstrates that EU requirements have had significant implications for the nature of administrative governance in the member states Drawing on theoretical arguments in favor of decentralization traditionally applied to substantive policy making this book provides insight into regulatory processes to show how the decentralized EU structure may transform national regulatory authorities into individual loci of experimentation that might in turn develop innovative results It thus contributes to debates about federalism governance and public policy as well as about deliberative and participatory democracy in the United States and Europe This book informs current understandings of regulatory agency operations and institutional design by drawing on an original dataset of public consultations and interviews with agency officials industry and consumer group representatives in Paris Athens Brussels and London The on the ground original research provides a strong foundation for the directions the case law could take and small and larger scale institutional reforms that balance the goals of democracy accountability and efficiency

*Advanced Introduction to New Institutional Economics* Ménard, Claude, Shirley, Mary M., 2022-01-14 New institutional economics NIE is a powerful tool for understanding real world phenomena This Advanced Introduction explores NIE's answers to fundamental questions about the organization growth and development of economies such as why are some countries rich and others poor Why are activities organized as firms or markets or through alternative organizational solutions When are shared resources overexploited

The Governance Report 2014 The Hertie School of Governance, 2014-02 The Governance Report 2014 seeks to address the implications of the current state of the world in terms of good governance that is the effective efficient and reliable set of legitimate institutions and actors dedicated to dealing with matters of public concern

The Regulation of Investment in Utilities Ian Alexander, 2005 Drawing on a worldwide series of case studies from across the regulated sectors this paper illustrates the various approaches to regulating investment and some of the practical implementation problems that are faced This allows some tentative suggestions for the design of practical investment regimes to be developed depending upon the circumstances of the situation in hand Jacket

**Institutions and Development** M. M. Shirley, 2010-01-01 Both economic research and the history of foreign aid suggest that the largest barriers to development arise from a society's institutions its norms and rules This book explains how institutions drive economic development It provides numerous examples to illustrate the complex interlocking and persistent nature of real world rules and norms

*Bureaucrats in Business*, 1995 Refer review of this policy book in Journal of International Development vol 10 7 1998 pp 841 855

*Dealing with Public Risk in Private Infrastructure* Timothy Irwin, 1997 Many infrastructure privatizations still leave governments and thus taxpayers exposed to significant financial risks This book examines these risks and considers how governments should respond to investors requests for guarantees and other forms of government support The report examines how governments can decide which risks to bear and which to

avoid how they can reduce the risks that private investors face without giving guarantees and how they can measure budget and account for the risks they do take on

Telecommunications Reform in the Asia-Pacific Region Allan Brown, Moazzem Hossain, Duc-Tho Nguyen, 2005-02-24 This book attempts to draw lessons from the experiences of developed as well as developing countries in carrying out telecommunications reform Contributors come from academia as well as from stakeholders in telecommunications policy in a dozen countries mostly in the Asia Pacific region Globally the telecommunications industry is undergoing major changes technological advances in the form of a vast number of new digitised services ownership shifts as state owned carriers in many countries become fully or partly privatized and a general transition from monopolistic to more competitive market environments The economic and regulatory experiences derived from these changes are explored and analyzed using the USA the UK Australia and Singapore to represent developed and newly industrialized countries and China India Indonesia Malaysia the Philippines Sri Lanka Thailand and Vietnam as examples of developing countries The conclusions outlined in this timely volume hold important lessons for these as well as for other countries

*Rethinking the Reform Question* Ann Marie Bissessar, 2009-03-26 In this comprehensive and very wide ranging collection of papers from specific countries across the globe a group of eminent and capable academics in the fields of public administration policy and management draw on a vast amount of theoretical empirical and comparative data to provide an up to date and timely collection of work aiming to explain the underpinning currents of the public sector reform phenomenon This is a set of excellently written papers brought together as a whole to provide a first rate resource for current and existing scholars in the field Most of the research is based on empirical case material from some of the CARICOM countries but one of the book s key strengths is the keen location of findings on firm theoretical foundations backed up with existing comparative data from other parts of the globe It will prove a useful first rate resource for other scholars who want to ascertain the key trends challenges and dilemmas of public sector reform across the world The first two thought provoking chapters set the global context of public sector reform but are also strong on theoretical and comparative analysis The remaining chapters introduce readers to a series of excellent in depth empirical and theoretical contributions but they are not confined to the cases and countries under investigation as all draw from existing theoretical empirical and comparative data sources The authors have given us a deeper sense of understanding of the countries being examined and their underpinning knowledge of the political systems within which public sector reforms are taking place is very evident in this excellent book Taken as a whole this publication provides a set of well written chapters that will provide a very interesting reading

*Handbook of New Institutional Economics* Claude Ménard, Mary M. Shirley, 2008-06-27 New Institutional Economics NIE has skyrocketed in scope and influence over the last three decades This first Handbook of NIE provides a unique and timely overview of recent developments and broad orientations Contributions analyse the domain and perspectives of NIE sections on legal institutions political institutions transaction cost economics governance contracting

institutional change and more capture NIE's interdisciplinary nature. This Handbook will be of interest to economists, political scientists, legal scholars, management specialists, sociologists, and others wishing to learn more about this important subject and gain insight into progress made by institutionalists from other disciplines. This compendium of analyses by some of the foremost NIE specialists, including Ronald Coase, Douglass North, Elinor Ostrom, and Oliver Williamson, gives students and new researchers an introduction to the topic and offers established scholars a reference book for their research.
