International Finance: Theory and Policy in Africa Daniel

Gbetnkom,2012-01-26 It is now well known that there are close links between financial sector development and economic growth and in turn between economic growth and poverty reduction A well functioning financial sector that allocates finance to the best opportunities can contribute to a more diverse economy and a more equal society rewarding entrepreneurial newcomers and challenging an entrenched and sometimes corrupt economic and political status quo However at first glance the international finance theory and policies would seem to have little relevance for Africa as there were built up in response to developments that took place far from Africa and whose direct impact on Africa was limited Nonetheless key components of the international finance functioning are very relevant for Africa The ongoing global financial and economic crises that are shaking the world have come as a stark reminder that African countries have a direct interest in global financial stability even though they may not be the main actors In this line economic fundamentals sound national macroeconomic and structural policies and a sound and properly regulated financial system are as critical as ever in Africa This volume explores the application of the basic theory and the policies of international financial transactions in Africa It contains six chapters on

conceptual and policy oriented issues Analyses raise important questions and offers favorable counter arguments to the application of international finance theory after bringing to focus the relevance of certain themes in Africas inter state and intrastate policies

Financial Stability Policy in the Euro Zone Gundbert Scherf,2013-06-17 Due to the lack of political salience that financial stability policy enjoys in tranquil economic times this policy field lends itself particularly well to capture the more so the more important the role of banks is in the financial system Gundbert Scherf s research focuses on this nexus between integrated banking supranational monetary policy and national banking regulation He finds that national level differences in financial systems and related institutions explain and drive variation in regulatory financial stability policy across countries

Regulation of Network Utilities Claude Henry,Michel Matheu,Alain Jeunemaître,2001 Propelled by deep technical economic and cultural changes network utilities have in the last twenty years entered a new era Since competition has been widely introduced and promoted we have experienced a radical change in the structure of the industries and the role of the state authorities Their role in managing monopolies has evolved into regulating new forms of markets which has resulted in the creation of independent regulatory authorities These new public bodies work with governments to try and reconcile the needs of competition and public service missions This suggests the use of recent developments in economic theory to handle complex problems This volume offers an exploration by scholars and regulators of the new regulatory regimes across Europe The first part presents the pioneering experiences of the United Kingdom and Sweden The United Kingdom has quickly chosen to establish powerful and independent individual regulators Reforms in

Sweden have been more gradual and regulators have in the first instance acted mainly as mediators Part two is devoted to second wave developments that took place in various European countries i e France Germany Italy and Spain countries where the legal tradition is less conducive to the concept of independent regulators There the regulators are often but not always less powerful and meet more obstacles in their efforts to prevent either the formation of oligopolies or the resistance of incumbent monopolies In Germany another problem has emerged as the federal tradition prevents the creation of independent regulators in certain key sectors The contributions in the third part of the volume throw some light on the problems of coordinating national regulations One can observe the continuous emergence of modes of cooperation between national regulators as well as European authorities Faced with certain categories of problem the European authorities are themselves led to act as common regulators The countries of central and eastern Europe which are progressively converging towards the general economic model of the West are more and more concerned with the accompanying regulation problems Last but not least the Internet raises worldwide problems of regulation that are beginning to be seriously considered

Global Financial Deregulation Itzhak Swary, Barry Topf, 1992 Financial institutions in developed countries have undergone a profound structural change in recent years As a result banking has become internationalized and competition has intensified within vast and complex markets for a range of financial services This book reviews these changes **The**
