The World Is Around You, But You Are in Your Car William M. Trently,2009-05 The World is Around You but You are in Your Car is a work of fiction wrapped around an essay that describes an American problem the relentless pursuit of the perfect life and its negative consequences that adversely affect progress and behavior toward the rest of the world I want it and I want it now with its shortage of self restraint has been taken to levels not reached before and the insidious ramifications are eye opening the easy disposability of people or principles if these should obstruct the path to the perfect life the mental depression from the strains of struggling to keep up with neighbors or the isolation from reality as people become more and more comfortable in their plush living rooms and cars The tale brings history s great philosophers together to sound an alarm and talk about ways to slow the relentless pursuit They have already debated the relevant issues with each other here in this story their role is only to inform us of their conclusions They discuss the external and internal controls that restrain the pursuit agreeing that internal control involving individual self regulation is more effective and desired than external control primarily because of its greater conduciveness to freedom the crown jewel of this civilization

Teaching Teachers James W. Fraser,Lauren Lefty,2018-10-01 Teacher education in America has changed dramatically in the past thirty years with major implications for how our kids are taught As recently as 1990 if a person wanted to become a public school teacher in the United States he or she needed to attend an accredited university education program Less than three decades later the variety of routes into teaching is staggering In Teaching Teachers education historians James W Fraser and Lauren Lefty look at these alternative programs through the lens of the

past Fraser and Lefty explain how beginning in 1986 an extraordinary range of new teaching programs emerged most of which moved teacher education out of universities In some school districts and charter schools superintendents started their own teacher preparation programs sometimes in conjunction with universities sometimes not Other teacher educators designed blended programs creating collaboration between university teacher education programs and other parts of the university linking with school districts and independent providers and creating a range of novel options Fraser and Lefty argue that three factors help explain this dramatic shift in how teachers are trained an ethos that market forces were the solution to social problems long term dissatisfaction with the inadequacies of university based teacher education and the frustration of school superintendents with teachers themselves who can seem both underprepared and too quick to challenge established policy Surveying which programs are effective and which are not this book also examines the impact of for profit teacher training in the classroom Casting light on the historical and social forces that led to the sea change in the ways American teachers are prepared Teaching Teachers is a substantial and unbiased history of a controversial topic

The Brink Mark Hunter, 2014-10-15 The author lays bare his own triumphs and failures while breaking down that elusive edge that turns great leaders into influencers Brad Szollose award winning author of *Liquid Leadership* The Brink is a method for generating leadership in an individual leader and on a team It is based on the simple assertion that leadership is created in the face of some great challenge or obstacle to overcome rather than in a vacuum or in comfortable places with no adversity The Brink model uses climbing a mountain as an analogy throughout for creating that big challenge or goal and then demonstrates how to create a team to climb it with and outlines the way to create leadership in everyone involved in the process This metaphor transfers to virtually any leadership position one holds and is organized into a clear list of ingredients essential to leadership As an adventurer I resonated with the climbing stories and analogies in *The Brink* However the concepts and strategies are valid and powerful for anyone looking to improve as a leader in business and life A great read Heather Hansen O Neill author of *Find Your Fire at Forty*
