Global Pentecostalism: An Inquiry Into the Cultural Dimensions of Globalization Matthias Deininger,2013-05-24 The rapid global expansion of Pentecostal Christianity is one of the most striking religious phenomena in our contemporary world Today Pentecostalism is by no means some marginal or peculiar denomination within world Christianity It is not simply

a niche product in the global religious market but the most dynamic and fastest growing religious movement within the contemporary Christian world From Singapore over Brazil to Ghana Pentecostal Christians are historically and presently rooted in many cultural contexts throughout the world As such Pentecostalism is a religious movement that is both shaped by globalization processes but also a major contributor to the globalization of religion Until recently social scientific approaches to Christianity have often been informed by a rather selective understanding of Christianity stressing its ascetic components premised on a body spirit dualism and seeing its importance mainly as a harbinger of secular modernity Hence where Christianity was studied outside the West it has usually been peripheral and viewed as an alien intrusion undermining local cosmologies However rather than a religious rejection of the world Pentecostalism accommodates to the world and modernity It transcends locality by promulgating a universal imaginary of the world while at the same time incorporating itself successfully into the socio cultural contexts of any new cultures it encounters The fundamental fluidity of the transnational Pentecostal network is conducive for its flexibility to react on the enormous upheavals and changes in a globalized world and to accommodate to them in constructive ways Thus Pentecostalism can be regarded as a paradigmatic case of a glocalised religion it has the ability to adapt itself to local conditions while maintaining and preserving its distinct religious features at the same time This study focuses on the different theoretical attempts made to explain the massive global expansion of Pe

Can the West Be Converted? Jean-Georges Gantenbein, 2021-11-04 Rather than reconsidering contemporary culture in light of secularization much of the western church operates with a degree of nostalgia She has yet to fully embrace prospective innovative models for what form her task might take in some of Christianity's historic heartlands Amidst rapidly declining church membership contextualizing the Gospel for the contemporary West is an urgent task for churches and Christians living in this context This book seeks an

interdisciplinary international and ecumenical response to this challenge uniting historical sociological theological and missiological perspectives Benefiting from recent studies in sociology of religion Dr Gantenbein offers several detailed contextual case studies before establishing correlations between western cultural religious characteristics and corresponding theological affirmations This study includes several unexpected dimensions including the development of a theological aesthetic in tension with the typically Word alone tradition of Protestantism a constructive reading of the book of Revelation as a source for contemporary aesthetic missiology reflections on a soteriology for the postmodern era and a proposal for an anonymous ecclesiology within a European context where churches are viewed with growing suspicion With rare perspicacity Gantenbein s study creatively calls churches to apply renewed intellectual rigor in faithfulness to their common purpose

Sociologie Et Religions Liliane Voyé, Jaak Billiet, 1999 What are the relations between sociology and the different religions Christianity with its various branches Judaism Islam Oriental religions sects and New Religious Movements That is the question which this work conceived on the occasion of the XXVth Conference of the International Society for the Sociology of Religion Soci t Internationale de Sociologie des Religions SISR wishes to clarify The book retraces the varied and troubled history of these relations and also reveals how in opening up its research to other religions besides the Christian sociology is forced to redefine the very object of its field of study What is the religious This question which until recently was considered impertinent informs this book throughout If confronts the necessity of rethinking theories and methodological approaches which constructed in the context of 19th and early 20th century Western Europe prove to be rather inadequate for encompassing contemporary religious phenomena and religious manifestations in other contexts To these new theoretical and methodological demands is added for the sociologist a deontological imperative which takes on all the more importance today as the religious provokes passionate social debate

The Non-religion of the Future: A Sociological Study Jean-Marie Guyau, 2015-01-09 Example in this ebook I Sociality the basis of religion Its definition I We shall meet in the course of this work many different definitions that have at one time or another been given to religion Some were assigned from the point of view of physics others from that of metaphysics others from that of morals almost none from that of sociology And yet upon closer scrutiny the notion of a social bond between man and the powers superior to him but resembling him is precisely the point in which all religious conceptions are at one Man becomes truly religious in our judgment only when above the human society in which he lives he superimposes in his scheme of the world another society more powerful and more cultured a universal and so to speak a cosmic society The sphere of sociality which is one of the characteristics of humanity must be enlarged till it reaches to the stars Sociality is the firm foundation of the religious sentiment and a religious being might be defined as a being disposed to be sociable not only with all living creatures with whom experience makes him acquainted but also with the creatures of thought with whom he peoples the world That religion consists essentially in the establishment of a bond at first mythical and subsequently mystic in the first instance between man and the forces of the universe then between man and the universe itself and ultimately between man and the elements of the universe is distinctly the outcome of every study of religion but what we wish especially here to consider is the precise way in which this bond has been conceived Well it may appear more clearly at the close of this inquiry the religious bond has been conceived ex analogia societatis human the relations amicable and inimical of men to each other were employed first for the

explanation of physical phenomena and natural forces then for the metaphysical explanation of the world of its creation conservation and government in short sociological laws were universalized and the state of war or peace which existed among men families tribes and nations was conceived as existing also among the volitions which were fancied to exist beneath or beyond the forces of nature A mythic or mystic sociology conceived as containing the secret of all things lies at the basis of all religions Religion is not simply the expression of an anthropomorphism animals and fantastic beings of various sorts have played no inconsiderable r le in different cults it is an imaginative extension a universalization of all the good or evil relations which exist among conscious beings of war and peace friendship and enmity obedience and rebellion protection and authority submission fear respect devotion love religion is a universal sociomorphism Social relations with animals with the dead intellectual and social relations with good and evil genii with the forces of nature are nothing more nor less than various forms of this universal sociology in which religion has sought to find the reason of things of physical phenomena such as thunder storm sickness death as well as of metaphysical relations the origin and destiny of things and of moral relations virtue vice law and sanction To be continue in this ebook **Religion and Knowledge** Mathew Guest, Elisabeth Arweck, 2016-04-15 Religions have always been associated with particular forms of knowledge often knowledge accorded special significance and sometimes knowledge at odds with prevailing understandings of truth and authority in wider society New religious movements emerge on the basis of reformulated often controversial understandings of how the world works and where ultimate meaning can be found Governments have risen and fallen on the basis of such differences and global conflict has raged around competing claims about the origins and content of religious truth Such concerns give rise to recurrent questions faced by academics governments and the general public How do we treat statements made by religious groups and on what basis are they made What authorities lie behind religious claims to truth How can competing claims about knowledge be resolved Are there instances when it is appropriate to police religious knowledge claims or restrict their public expression This book addresses the relationship between religion and knowledge from a sociological perspective taking both religion and knowledge as phenomena located within ever changing social contexts It builds on historical foundations but offers a distinctive focus on the changing status of religious phenomena at the turn of the twenty first century Including critical engagement with live debates about intelligent design and the new atheism this collection of essays brings recent research on religious movements into conversation with debates about socialisation reflexivity and the changing capacity of social institutions to shape human identities Contributors examine religion as an institutional context for the production of knowledge as a form of knowledge to be transmitted or conveyed and as a social field in which controversies about knowledge emerge Religions and Development Emma Tomalin, 2013-07-03 Religion has been excluded from development studies for decades Religious traditions have contributed greatly towards development work yet major international players have tended to ignore its role Recent years have shown a noticeable shift in development policy

practice and research to recognize religion as a relevant factor This text provides a comprehensive insight into different approaches towards the understanding the relationships between religions and development studies policy and practice It guides readers through current debates presenting explaining and critically evaluating a broad range of literature and locating it within a theoretical context The text explores the role of religion within development from positive contributions such as the important role that many faith based organizations play in education or health care to more complicated and contested notions of impact such as religiously inspired violence or gender inequality The book begins with three background chapters outlining the relevance of religions for development studies policy and practice and introducing the reader to the study of development and of religions Following these the focus then shifts to examine a number of thematic areas including religion gender and development and the implications of the rise of religion for mainstream development studies policy and practice in the 21st century Each chapter contains a range of features to assist undergraduate learning including learning objectives for each chapter discussion of key concepts summaries discussion questions further reading and websites The book also contains over sixty boxed case studies to provide further definition explanation and examples of the interactions between religions and development globally This innovative text presents religions as something that can both obstruct and aid development encouraging readers to engage critically with the multiple ways that religion impacts on both the conceptualization of development as well the resulting project interventions This will be of interest to undergraduate postgraduate students and scholars interested in religious studies development studies and the broader study of societies and cultures

Studying Christian Spirituality David B. Perrin,2024-04-23 Studying Christian Spirituality proposes a framework

to discover how spirituality can be understood beyond the conventional boundaries that religions have established Its nine chapters discuss a wide variety of issues and questions which include definitions of spirituality the impact of models of God human spiritual development the importance of context historical criticism anthropology interpretation of texts and art and examples of spiritual practice David B Perrin clearly explains the traditional relationships between Christian spirituality and theology and history He also proposes greater connections with the human sciences such as philosophy psychology phenomenology and sociology and reshapes the classical approaches to Christian spirituality its texts practices and experience This interdisciplinary volume is an essential reference for scholars and students at all levels who desire to develop a deeper understanding of Christian spirituality s research methods and its relevance to the world today Mapping the Academic Debate Johannes Duschka, Christoph Kleine, Monika Wohlrab-Sahr, Florian Zemmin, 2024-12-16 This volume maps the international academic debate on secularity It places seminal contributions from within Western academia alongside less well known texts from various parts of the world in several cases this is the first time that they have been translated into English The volume demonstrates that the academic debate on secularity was and is a global debate with contributions from many regions The collected texts relate to each other either directly or indirectly by referring to similar arguments whether reinforcing or criticising them and thus create a discourse When speaking of global secularity we therefore do not insinuate a uniform world secularity resulting from the alleged global diffusion of Western norms ideas and concepts It is rather a web of relations that is constituted via various different references These references are not evenly distributed the development in the West is often the point of reference to which positions from other regions relate to which they connect or from which they distance themselves But the references are not completely unidirectional We also present texts from Europe that underline the multidirectionality of the process even early on Thereby the volume offers the reader the material with which to trace these global exchanges and references
