Religion And Advanced Industrial Society:

Religion and Advanced Industrial Society James A. Beckford, 2019-03-19 This book first published in 1989 demonstrates that sociologists have much to gain from a strengthening of the connections between general theories about the changing character of modern western societies and specific studies of religion It combines an exegesis of sociological classics in the study of religion and a history of their influence upon the subject's development a criticism of Talcott Parson's attempt to synthesise classical viewpoints into a single theory of modernity a discussion of post-Parsonian theories of religion's declining importance and an argument that some quasi-Marxist thinkers may offer fresh insights into the place of religion in capitalist societies

Routledge Library Editions: Sociology of Religion Various, 2021-07-14 This set collects together in 19 volumes a wealth of texts on Sociology of Religion An invaluable reference resource it contains classic books on a wide range of topics including religion and violence religion and family life religion and society culture and class

Religion and Civil Society David Herbert, 2017-03-02 This book presents the first full-length study of the relationship between religion and the controversial concept of civil society Across the world in the last two decades of the twentieth century religions re-entered public space as influential discursive and symbolic systems apparently beyond the control of either traditional religious authorising institutions or states This differentiation of religion from traditional institutions and entry into secular public spheres carries both dangers and possible benefits for democracy Offering a fresh interdisciplinary approach to understanding religion in contemporary societies this book provides an invaluable resource for students and researchers in religious studies sociology politics and political philosophy theology international relations and legal studies Part one presents a critical introduction to the interaction between religion modernization and postmodernization in Western and non-Western settings America Europe the Middle East and India focussing on discourses of human rights civil society and the public sphere and the controversial question of their cross-cultural application Part two examines religion and civil society through case studies of Egypt Bosnia and Muslim minorities in Britain and compares Poland as an example of a Christian majority society that has experienced the public reassertion of religion

Studying Religion and Society Titus Hjelm, Phil Zuckerman, 2013 How do you study religion and society In this fascinating book some of the most famous names in the field explain how they go about their everyday work of studying religions in the field They explain how the ideas for their projects and books have come together how their understanding of religion has changed over the years and how their own beliefs have affected their work They also comment on the changing nature of the field the ideas which they regard as most important and those which have not stood the test of time Lastly they offer advice to young scholars and suggest what needs to be done to enable the field to grow and develop further

The Blackwell Companion to Sociology of Religion Richard K. Fenn, 2008-04-15 The Blackwell Companion to Sociology of Religion is presented in three comprehensive parts Written by a range of outstanding academics the volume explores the current status of the sociology of religion and how it might look in

future Explores the current status of the sociology of religion and how it might look at the beginning of the next millennium
Traces the boundaries between sociology and other closely related disciplines such as theology and social anthropology
Edited by one of the best known and most widely respected sociologists of religion Accessibly presented in three comprehensive parts **Sociologies of Religion** ,2015-07-14 Sociologies of Religion National Traditions presents fourteen histories of the sociological study of religion in a diverse set of nations Each of the histories is newly written by author who are uniquely situated to tell narrate the story of the field in their countries They give us the stories behind major personages theoretical traditions seminal works research institutes and professional associations The histories trace the various ways the field was established in different academic and religious contexts and the trajectories it took in emerging as a scientific specialty Culture Shift in Advanced Industrial Society Ronald Inglehart,1990 Economic technological and sociopolitical changes have been transforming the cultures of advanced industrial societies in profoundly important ways during the past few decades This ambitious work examines changes in religious beliefs in motives for work in the issues that give rise to political conflict in the importance people attach to having children and families and in attitudes toward divorce abortion and homosexuality Ronald Inglehart s earlier book The Silent Revolution Princeton 1977 broke new ground by discovering a major intergenerational shift in the values of the populations of advanced industrial societies This new volume demonstrates that this value shift is part of a much broader process of cultural change that is gradually transforming political economic and social life in these societies Inglehart uses a massive body of time series survey data from twenty six nations gathered from 1970 through 1988 to analyze the cultural changes that are occurring as younger generations gradually replace older ones in the adult population These changes have far reaching political implications and they seem to be transforming the economic growth rates of societies and the kind of economic development that is pursued **Social Theory and Religion** James A. Beckford,2003-08-21 Many aspects of religion are puzzling these days This book looks at ways of improving our understanding of religious change by strengthening the links between social theory and the social scientific study of religion It clarifies the social processes involved in constructing religion and non religion in public and private life Taking illustrations of the importance of these boundaries from studies of secularisation religious diversity globalisation religious movements and self identity James A Beckford reviews the current state of social scientific knowledge about religion **Educating the Right Way** Michael W. Apple,2013-01-11 In this book Apple explores the conservative restoration the rightward turn of a broad based coalition that is making successful inroads in determining American and international educational policy It takes a pragmatic look at what critical educators can do to build alternative coalitions and policies that are more democratic Apple urges this group to extricate itself from its reliance on the language of possibility in order to employ pragmatic analyses that address the material realities of social power Research in the Social Scientific Study of Religion, Volume 4 ,2021-11-22 The purpose of this book is to provide an outlet for original research articles examining the role and value of religious and

spiritual constructs across the social sciences The aim of the series is to include an international and interfaith voice to this research dialogue An effort is made to be interdisciplinary and academically eclectic The articles in each volume represent a wide array of perspectives and research projects Most of the articles report the findings of quantitative or qualitative investigations but some deal with methodology theory or applications of social science studies in the field of religion and some are applied demonstrating the relevance of the social sciences to religious organizations and their clergy The value of the volume is that it gives to researchers in this area a broad perspective on the issues and methods of religious research across a spectrum of academic disciplines The aim of the book is to stimulate a creative integrative dialogue that will enhance interdisciplinary research

The Centrality of Religion in Social Life Eileen Barker, 2021-11-18 James A Beckford's work is internationally acclaimed not only in the sociology of religion but also in other fields of the social sciences Beckford has long been arguing that the barriers that have grown up between the different sub disciplines should be broken down with those specialising in religion becoming more cognisant of new theoretical developments and sociologists in general becoming more aware of the significance of developments in the religious scene This book is a collection of essays written in Beckford's honour drawing on a number of religious themes that have been central to Beckford's interests whilst also offering a significant contribution to our understanding of the wider society A central theme is modernity and its relation to the post modern and how religion affects and is affected by the dynamics of contemporary society with the primary focus of many of the chapters being a concern with how society copes with the minority religions that have become visible with the globalising tendencies of contemporary society The contributors who come from America Asia and various parts of Europe are all internationally renowned scholars Beckford's most important publications are listed in an Appendix and the volume opens with a short account of his contribution to sociology by Eileen Barker the editor and James T Richardson

Exclusion & Embrace Miroslav Volf, 2010-03-01 Life at the end of the twentieth century presents us with a disturbing reality Otherness the simple fact of being different in some way has come to be defined as in and of itself evil Miroslav Volf contends that if the healing word of the gospel is to be heard today Christian theology must find ways of speaking that address the hatred of the other Reaching back to the New Testament metaphor of salvation as reconciliation Volf proposes the idea of embrace as a theological response to the problem of exclusion Increasingly we see that exclusion has become the primary sin skewing our perceptions of reality and causing us to react out of fear and anger to all those who are not within our ever narrowing circle In light of this Christians must learn that salvation comes not only as we are reconciled to God and not only as we learn to live with one another but as we take the dangerous and costly step of opening ourselves to the other of enfolding him or her in the same embrace with which we have been enfolded by God

Richard H. Roberts, 2002 Religion Theology and the Human Sciences explores the religious consequences of the so called end of history and triumph of capitalism as they have impinged upon key institutions of social reproduction in recent times The book explores the imposition of managerial modernity upon successive sectors of society and shows why many people today feel themselves to be oppressed by systems of management that seem to leave them no option but to conform Richard Roberts seeks to challenge and outflank such seamless oppressive modernity through reconfiguration of the religious and spiritual field **Research in the Social Scientific Study of Religion, Volume 7**, 2021-11-22 The purpose of this book is

Cultures and Globalization Helmut K Anheier, Yudhishtir Raj Isar, 2007-03-27 In the age of globalization we are no longer home alone Migration brings other worlds into our own just as the global reach of the media transmits our world into the hearts and minds of others Often incommensurate values are crammed together in the same public square Increasingly we all today live in the kind of edge cultures we used to see only on the frontiers of civilizations in places like Hong Kong or Istanbul The resulting frictions and fusions are shaping the soul of the coming world order I can think of no other project with the ambitious scope of defining this emergent reality than The Cultures and Globalization project I can think of no more capable minds than Raj Isar and Helmut Anheier who can pull it off Nathan Gardels Editor in Chief NPQ Global Services Los Angeles Times Syndicate Tribune Media This series represents an innovative approach to the central issues of globalization that phenomenon of such undefined contours Lupwishi Mbuyumba Director of the Observatory of Cultural Policies in Africa The world's cultures and their forms of creation presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood The Cultures and Globalization Series is designed to fill this void in our knowledge Analyzing the relationship between globalization and cultures is the aim of the Series In each volume leading experts as well as young scholars will track cultural trends connected to globalization throughout the world covering issues ranging from the role of cultural difference in politics and governance to the evolution of the cultural economy and the changing patterns of creativity and artistic expression Each volume will also include an innovative presentation of newly

developed indicator suites on cultures and globalization that will be presented in a user friendly form with a high graphics content to facilitate accessibility and understanding Like so many phenomena linked to globalization conflicts over and within the cultural realms crystallize great anxieties and illusions through misplaced assumptions inadequate concepts unwarranted simplifications and instrumental readings The aim here is to marshal evidence from different disciplines and perspectives about the culture conflict and globalization relationships in conceptually sensitive ways

The SAGE Handbook of the Sociology of Religion James A Beckford, Jay Demerath, 2007-10-29 In their introduction to this Handbook the editors affirm Many sociologists have come to realise that it makes no sense now to omit religion from the repertoire of social scientific explanations of social life I wholeheartedly agree I also suggest that this wide ranging set of essays should become a starting point for such enquiries Each chapter is clear comprehensive and well structured making the Handbook a real asset for all those engaged in the field Grace Davie University of Exeter Serious social scientists who care about making sense of the world can no longer ignore the fact that religious beliefs and practices are an important part of this world This Handbook is a valuable resource for specialists and amateurs alike The editors have done an exceptionally fine job of incorporating topics that illuminate the range and diversity of religion and its continuing significance throughout the world Robert Wuthnow Princeton University At a time when religions are increasingly affecting and affected by life beyond the narrowly sacred sphere religion everywhere seems to be caught up in change and conflict In the midst of this contention and confusion the sociology of religion provides a rich source of understanding and explanation This Handbook presents an unprecedentedly comprehensive assessment of the field both where it has been and where it is headed Like its many distinguished contributors its topics and their coverage are truly global in their reach The Handbook's 35 chapters are organized into eight sections basic theories and debates methods of studying religion social forms and experiences of religion issues of power and control in religious organizations religion and politics individual religious behaviour in social context religion self identity and the life course and case studies of China Eastern Europe Israel Japan and Mexico Each chapter establishes benchmarks for the state of sociological thinking about religion in the 21st century and provides a rich bibliography for pursuing its subject further Overall the Handbook stretches the field conceptually methodologically comparatively and historically An indispensable source of guidance and insight for both students and scholars Choice Outstanding Academic Title 2009

Social Europe Joe Bailey, 2014-06-03 Since the first edition of Social Europe was published in 1992 profound social changes have occurred throughout Europe as a result of conflicting pressures on the one hand to become more integrated and on the other to protect national interests and identity This second edition of Social Europe has been fully revised to provide a comprehensive and focused account of basic social issues and structures which provide the context for these changes Each chapter covers a key topic such as education crime gender health and religion and provides valuable comparisons between the key nation states of Western Europe

The Problem of Invented Religions Steven J.

Sutcliffe, Carole M Cusack, 2017-08-15 Invented religions have been described as modern religions which advertise their invented status and reject traditional strategies of authorisation. But what does it mean for a religious formation to be made up and how might this status affect perceptions of its legitimacy or authenticity in wider society? Based in original fieldwork and archival sources and in the secondary literature on invented and constructed formations, this volume explores the allure of as well as the limits of the invention of religion. Through a series of case studies, the contributors discuss strategies of mobilization and legitimation for new traditions at their point of emergence as well as taking issue with simplistic interpretations of the phenomenon which neglect wider cultural and political dimensions. This book was originally published as a special issue of *Culture and Religion*.
