Longitudinal Research On Individual Development Present Status And Future Perspectives:

Longitudinal Research on Individual Development David Magnusson, Paul Casaer, 1993-11-18 Longitudinal research is an essential element in the investigation of human development over time with considerable advantages over more widely used cross sectional research designs This book examines the scope for longitudinal studies in a range of developmental fields emphasizing the advantages of this approach for the investigation of causal mechanisms and processes and the dynamics of development over the life span It also discusses methodological issues and some of the practical and ethical problems that longitudinal research may present Contributors review normal and disordered development in the emotional cognitive and social domains including valuable discussions of gene environment interactions the maturation of the human brain and issues relating to aging

Studying individual Development in An interindividual Context Lars R. Bergman, David Magnusson, Bassam M. El Khouri, 2003-01-30 During the last decade there has been increased awareness of the limitations of standard approaches to the study of development When the focus is on variables and relationships the individual is easily lost This book describes an alternative person oriented approach in which the focus is on the individual as a functioning whole The authors take as their theoretical starting points the holistic interactionistic research paradigm expounded by David Magnusson and others and the new developmental science in which connections and interactions between different systems biological psychological social etc are stressed They present a quantitative methodology for preserving to the maximum extent possible the individual as a functioning whole that is largely based on work carried out in the Stockholm Laboratory for Developmental Science over the past 20 years The book constitutes a complete introductory guide to the person oriented approach The authors lay out the underlying theory a number of basic methods the necessary computer programs and an extensive empirical example The computer programs have been collected into a statistical package SLEIPNER that is freely accessible on the Internet The empirical example deals with boys school adjustment from a pattern perspective and covers both positive and negative adaptation Studying Individual Development in an Interindividual Context A Person Oriented Approach will be crucial reading for all researchers who seek to understand the complexities of human development and for their advanced students

Handbook of the Life Course Michael J. Shanahan, Jeylan T. Mortimer, Monica Kirkpatrick Johnson, 2015-10-26 Building on the success of the 2003 Handbook of the Life Course this second volume identifies future directions for life course research and policy The introductory essay and the chapters that make up the five sections of this book show consensus on strategic next steps in life course studies These next steps are explored in detail in each section Section I on life course theory provides fresh perspectives on well established topics including cohorts life stages and legal and regulatory contexts It challenges life course scholars to move beyond common individualistic paradigms Section II highlights changes in major institutional and organizational contexts of the life course It draws on conceptual advances and recent empirical findings to identify promising avenues for research that illuminate the interplay between structure and

agency It examines trends in family school and workplace as well as contexts that deserve heightened attention including the military the criminal justice system and natural and man made disaster The remaining three sections consider advances and suggest strategic opportunities in the study of health and development throughout the life course They explore methodological innovations including qualitative and three generational longitudinal research designs causal analysis growth curves and the study of place Finally they show ways to build bridges between life course research and public policy

The Lifespan Development of Individuals David Magnusson,1997-10-28 A full understanding of the developmental process in individuals requires contributions from disciplines including developmental biology and psychology physiology neuropsychology social psychology sociology and anthropology This ambitious and wide ranging book integrates the findings from these and related areas to form a holistic view of human development from conception to death Distinguished scientists have combined their expertise in a synthesis of biological and social sciences that will demand the attention of all researchers and practitioners concerned with human development across the lifespan Based on a Nobel symposium the topics discussed range from the function and development of single cells to the whole organism interacting with its environment Drawing upon new theories and models including the study of nonlinear dynamic systems and chaos theory this book represents a major step in the move towards an integrated science of human development

Individual Development from 3 to 12 Franz E. Weinert,Wolfgang Schneider,1999-01-28 A long term comprehensive longitudinal study analyzing developmental changes in the cognitive social and personality domain

The Berlin Aging Study Paul B. Baltes,Karl Ulrich Mayer,2001-03-19 The present and future of our society are shaped by an ever increasing proportion of old and very old people The Berlin Aging Study is one of the largest interdisciplinary efforts to explore old age and aging Unique aspects of the Berlin Aging Study are the spectrum of scientific disciplines involved the range of discipline specific and interdisciplinary research topics the focus on very old age 70 to over 100 years and the empirical reference to a representative heterogenous urban population The study s first cross sectional findings on intellectual abilities self and personality social relationships physical health functional capacity medical treatment mental disorders such as depression and dementia socioeconomic conditions activities everyday competence subjective well being and gender differences are reported in depth in this book The study was carried out in the context of the Berlin Brandenburg Academy of Sciences study group on Aging and Social Development The authors primarily conduct their research at the Berlin Max Planck Institute for Human Development the Free University of Berlin and the Humboldt University Berlin

Advances in Psychological Science: Social, personal, and cultural aspects John G. Adair,David Bélanger,Kenneth L. Dion,Michel Sabourin,1998 The volumes *Advances in Psychological Science* are the most timely reviews for a person who wants an up to date state of the art description of selected topics in psychology These volumes will be useful for the graduate student to get a perspective on the latest developments in psychology today The chapters are written in a non technical manner i e not for the specialist but for the educated psychologist who wishes to see

developments across the spectrum of psychology They may be used for teaching or by experts who wish an overview of recent advances in their science The chapters uniquely reflect the international or global character of psychology both in the authors selected to write them and in their coverage of research from around the world Volume 1 contains original contributions to the social personal and cultural aspects of the discipline *Human Development from Early Childhood to Early Adulthood* Wolfgang Schneider, Merry Bullock, 2010-10-18 Data generated from longitudinal studies allow researchers to better understand how context and experience interact with stable characteristics of the developing person over time This book summarizes a landmark longitudinal study of 200 children from the ages of 3 to 23 The Munich Longitudinal Study on the Ontogenesis of Individual Competencies LOGIC examined the development of individual differences over time and whether it is possible to predict later competencies from earlier ones Offering a snapshot of theory and data on personality social motor moral and cognitive development the contributors help us understand which individual differences can and cannot be altered through schooling and other experiences and how differences seen in the earliest stages are later reflected in adulthood The results provide valuable insight into the strengths and limitations of early prediction of individual differences This is the second volume to review the wealth of data generated by the study The first volume Weinert and Schneider 1999 traced development from ages 3 to 12 This volume continues the story integrating these early findings with the results from adolescence and young adulthood Each of the chapters provides an overview of current research and addresses how the data help us understand the presence and developmental effects of individual differences Among the findings are results on The relative stability of cognitive competencies The long term effects of shyness and aggression The relation between moral understanding and action and The role of education in the development or maintenance of performance differences Intended for researchers and advanced students in developmental educational personality social and cognitive psychology this book will also appeal to educators especially the chapters that focus on literacy development educational context scientific reasoning and mathematical reasoning Concepts and Theories of Human Development Richard M. Lerner, 2013-05-13 A classic in the field this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development This volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives Since the publication of the second edition developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis As a consequence a developmental systems orientation frames the presentation in this edition This new edition has been expanded substantially in comparison to the second edition Special features include A separate chapter focuses on the historical roots of concepts and theories of human development on philosophical models of development and on developmental contextualism Two new chapters surrounding the discussion of

developmental contextualism one on developmental systems theories wherein several exemplars of such models are discussed and a corresponding chapter wherein key instances of such theories life span life course bioecological and action theoretical ones are presented A new chapter on cognition and development is included contrasting systems approaches to cognitive development with neo nativist perspectives A more differentiated treatment of nature oriented theories of development is provided There are separate chapters on behavior genetics the controversy surrounding the study of the heritability of intelligence work on the instinctual theory of Konrad Lorenz and a new chapter on sociobiology A new chapter concentrates on applied developmental science Developmental Science and the Holistic Approach Lars R.

Bergman,Robert B. Cairns,Lars-Goran Nilsson,Lars Nystedt,2000 This volume celebrates David Magnusson s career long contributions with a collection of chapters by internationally renowned colleagues on the holistic approach that is transforming developmental psychology For developmentalists and lifespan researchers **The Developmental Science of Adolescence** Richard M. Lerner,Anne C. Petersen,Rainer K. each section are a definite plus The choice of sites is excellent Cosby Steele Rogers Virginia Tech An Introduction to Theories of Human Development examines the development process looking at the series of changes that occur as a result of an interaction between biological and environmental factors Why might our behavior as an adult be so different from when we were infants Why and how does one stage of development follow the next Are the changes that we experience abrupt in nature or smooth and predictable Author Neil J Salkind reflects on such critical questions to help readers understand what happens along the way as one develops from infancy through later life This book provides a comprehensive view of the primary theoretical models of human development including those from the biological psychoanalytic behavioral and cognitive developmental perspectives Along with a brief discussion of a historical background for each of these approaches An Introduction to Theories of Human Development examines the application of these theories to various aspects of human development such as the effectiveness of early intervention individual differences adolescence and sociobiology Features of this text A final integrative chapter compares the various theories presented in the book using Murry Sidman s model of six criteria for judging a theory to help develop students skills for critically assessing theory Classic approaches to understanding human behavior across the lifespan are also examined Pedagogical features such as chapter opening quotes boxed highlights key terms a glossary and websites for further reading enhance student understanding of everyday human behavior An Introduction to Theories of Human Development is an accessible text for advanced undergraduate students in the social and behavioral sciences including such fields as psychology education human services nursing sociology social welfare and human development and family studies *Handbook of Research Methods in Developmental Science* Douglas M. Teti, 2008-04-15 The Handbook of Research Methods in Developmental Science is a collection of newly written articles that provide an overview of methods and approaches associated with the study of human development Contains accessible contributions from some of the most renowned developmental scientists in the field Provides basic information on the strengths and challenges inherent in traditional and complex research design Discusses successful intervention approaches that have been used to promote intellectual social and linguistic development Includes cutting edge research that is forging new and exciting directions in developmental research Provides students and scholars with a working understanding of research approaches and issues in the developmental sciences *Human Differences* Lewis R. Aiken, 2014-04-08 This text reviews the mass of information concerning the ways in which individuals and groups differ from each other Reviews of research findings and interpretations are provided on physical appearance performance and health cognitive abilities personality and development across the life span Extensive treatment of foundations historical measurement research methods biological social and cultural is also provided Both normal and abnormal behaviors are considered The book provides an interdisciplinary focus including material from all the behavior and natural sciences not just psychology sociology or biology **Paths to Successful Development** Lea Pulkkinen, Avshalom Caspi, 2002-04-04 The influence of the lifespan

approach has been an important feature of recent research in developmental psychology as has a growing interest in the relationship between personality and development This important new book edited by two distinguished psychologists explores the relationship between personality and development from a life course perspective The book presents current theoretical approaches and new empirical findings from ongoing studies conducted by leading researchers in North America and Europe It is unique in focussing on successful personality development where developmental psychology in the past seems to have focussed almost entirely on problem behaviour and risk of maladaptation The book has a multidisciplinary appeal and will be of interest to students and researchers in the fields of developmental psychology adult development and aging and personality and social psychology

Storylines Elliot G. Mishler, 2009-07-01 What do we mean when we refer to our identity and how do we represent it in the stories we tell about our lives Is identity a sustained private core or does it change as circumstances and relationships shift Mishler explores these questions through analyses of in depth interviews with five craftartists

Family Psychopathology Luciano L'Abate, 1998-08-17 Providing an authoritative review of the influence of the family on individual behavior this book shows how many individual psychopathologies stem from external rather than internal conditions Chapters describe a variety of dysfunctional patterns and explore how they lead to different kinds of disorders Preventive measures and treatment approaches are critically examined
