quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests The assessment of test difficulty on the other hand is informed by research on language testing and in particular by findings and methodologies of Classical Test Theory and Item Response Theory Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text inherent complexity perceived test difficulty and actual test difficulty *ICOPE 2020* Ryzal Perdana, Gede Eka
