Online Impulse Buying and Cognitive Dissonance Giovanni Mattia, Alessio Di Leo, Ludovica Principato, 2021-02-12 Consumers beliefs and attitudes towards online sales significantly influence buying behavior on the internet However the

impact of these thoughts and beliefs on the decision to make an online purchase is not direct. It can be moderated by the emotions experienced while browsing an e-commerce website. Impulse buying in particular is influenced by a number of factors, for example, how stimulating the e-shopping platform is and how easy it is to click on the cart for a certain product, for instance, a smartphone. But what happens after an online impulse buy is made? Often the customer can regret the purchase and in the throes of anxiety look for reasons to justify the choices made. Consumer behaviour scholars and psychologists call this phenomenon cognitive dissonance, and certain individuals are more sensitive than others in developing this than others. This book offers a deep investigation around online impulse buying and subsequent cognitive dissonance. Specifically, the authors present a research case study of a group of millennials who are shopping for smartphones to study whether an initial positive state can reduce the onset of cognitive dissonance in consumers. Based on substantial research and a sample of 212 impulsive millennial buyers, the book provides a comprehensive but simple and synthetic framework of impulse buying, cognitive dissonance, and positive affect state, highlighting their relationships. It Could Happen to Anyone Alyce D. LaViolette, Ola W. Barnett, 2014. This revised and updated edition of It Could Happen to Anyone provides a comprehensive examination of why women stay in abusive relationships and why they leave, explaining why women should not be blamed for their victimization. Assessment in Counseling Danica G. Hays, 2014-11-03. Now more user friendly than ever while continuing the legacy of excellence that Albert Hood and Richard Johnson began, the latest version of this best-selling text updates students and clinicians on the basic principles of psychological assessment, recent changes in assessment procedures, and the most widely used tests relevant to counseling practice today. Hays walks the reader through every stage of the assessment process and provides practical tools such as bolded key terminology, chapter pretests, summaries, and review questions, self-development and reflection activities, client case examples, practitioner perspectives illustrating assessment in action, and handy tip sheets. More than 100 assessment instruments examining intelligence, academic aptitude, and achievement, career and life planning, personal interests and values, personality, and interpersonal relationships are described. Also discussed are specialized mental health assessments for substance abuse, depression, anxiety, anger, self-injury, eating disorders, suicide risk, and attention deficit hyperactivity disorder.
