Longterm Final Energy Demand Analysis For Chile:

Long-term Final Energy Demand Analysis for Chile Jaime Zuazagoitia, 1994 After the oil price crises of the 1970s and 1980s the role of energy in the nations socio economic process has become important Energy and environmental planning tools are necessary to manage both primary and final energy flows of a region and to control their corresponding air pollutant emissions The basic goal of this study is to develop and to apply appropriate planning instruments for forecasting the future long term final energy demand of Chile in order to answer elementary questions related to long range energy and environmental planning Two energy demand models with different methodological characteristics were developed and the Chilean final energy demand forecasted up to 2020 *New at the Energy Library* Energy Library, 1991 *Abstracts of Public Administration, Development, and Environment* ,1995 *Energy Abstracts for Policy Analysis* ,1989

Bibliographie der Wirtschaftswissenschaften ,1994 **Bibliographie der Staats-und Wirtschaftswissenschaften** ,1994 **Renewable Energies as a Growth Factor in Argentina, Brazil, Chile and Colombia** Thomas S. Konrad, 2017-06-27 Master s Thesis from the year 2012 in the subject Economy Environment economics grade 1 0 Business School INSEEC Paris Bordeaux language English abstract This present empirical Master thesis deals with renewable energies as potential growth factor in emerging countries in the context of sustainable economic development The geographical focus is placed on South America The sample embraces Argentina Brazil Chile and Colombia whose energy markets are interrelated through historical and political commonalities which at the same time constitute collaboration obstacles in energy trade The concrete research question is whether renewable energies can act as an acceleration factor upon the development of emerging South American economies and refers to the assumption that renewable energies may contribute to economic growth Following a substantive literature review eight hypotheses were formulated and verified by means of multivariate regression models including different checks and tests regarding significance of the coefficients p value significance of the regression model F Test autocorrelation Durbin Watson Test multicollinearity VIF value heteroscedasticity Goldfeld Quandt Test and structural break Chow Test Empirical input data were gathered from publicly available sources such as the IEA and the World Bank The results are transparently visualized by numerous figures and tables In general the results indicate the existence of positive and negative relations between various dependent and independent variables related to macroeconomic and renewable energy proxies which were used for the forming of hypotheses Finally the empirical data gathered in present study provide sufficient evidence to conclude that renewable energies act as an important acceleration factor for the development of the economies of Brazil Chile and Colombia In the case of Argentina a sufficient amount of significant results could not be obtained to make a judgment with respect to the research question **OECD Environmental Performance Reviews: Chile 2016** OECD, Economic Commission for Latin America and the Caribbean, 2016-07-21 This report is the second Environmental Performance Review of Chile It evaluates

progress towards sustainable development and green growth with a focus on climate change and biodiversity conservation and sustainable use

Chile Energy Policy Review 2009, 2009 Drawing on the experience of IEA member countries this IEA review assesses Chile's major energy challenges and provides recommendations Six main themes emerge the successful liberalisation of the power sector in the 1980s the essential role played by the state in ensuring energy security the re-formulation of Chile's long term energy policy the proposed reorganisation of the institutional framework greater independence for the system operators and the need for a clear framework of regulation so that long term investment decisions integrate social and environmental costs

How Do Households Consume Energy?: Evidence from Latin American and Caribbean Countries Raul Jimenez Mori, Ariel Yépez-Garcia, 2020-11-22 How do households consume and spend on energy What are the drivers of their spending and consumption patterns How does energy consumption have evolved What is to be expected as the region climbs the development ladder What are the distributive implications of different energy pricing approaches This book looks at these questions and examines which policies work in reducing energy poverty and increasing energy savings The authors unveil the growing household demand of better quality of energy and show that to achieve more cost effective and progressive public policies it is necessary to strengthen the transparency and sustainability of energy pricing while having into account the consumer behavioral responses This volume is a resource for designing energy policies based on an empirical understanding of the household's energy needs
