American Landscape and Painting, 1825-1875, With a New Preface Barbara Novak Altschul Professor of Art History Barnard College and Columbia University (Emerita), 2007-01-05 In this richly illustrated volume featuring more than fifty black and white illustrations and a beautiful eight page color insert Barbara Novak describes how for fifty extraordinary years American society drew from the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz H Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau and Frederick Wilhelm von Schelling Now with a new preface this spectacular volume captures a vast cultural panorama It beautifully demonstrates how the idea of nature served not only as a vehicle for artistic creation but as its ideal form An impressive achievement Barbara Rose The New York Times Book Review An admirable blend of ambition elan and hard research Not just an art book it bears on some of the deepest fantasies of American culture as a whole Robert Hughes Time Magazine **Landscape and Nature in Scandinavian Art**

MaryClaire Pappas, Tonje Haugland Sørensen, 2025-04-16 This edited volume foregrounds new and vital scholarship shaping Scandinavian art historical research on the representations of the natural world Contributors deconstruct the interlinking of people and land through critical readings of the Scandinavian representation of nature bringing to the fore how the traditional focus on the landscape as a manifestation of temperament has tended to obfuscate critical approaches to the representation of the landscape Making interdisciplinary connections this volume redresses the imbalance in scholarship on the region that often emphasizes teleological national narratives and instead situates encounters with nature and the landscape in relationship to more interdisciplinary perspectives Each chapter serves as a specific case study on topics ranging from circumpolar exploration and colonial practices deconstructing National Romanticism myths and contemporary artistic responses to the history of the politics of land The book will be of interest to scholars working in art history visual culture nature studies and environmental history **The Nature of Landscape** Han Lörzing, 2001 **Science, Technology and Culture** Anne Balsamo, 2017-11-01 A special issue of the established journal Cultural Studies devoted to the study of

culture in scientific and technological systems Political Landscape Martin Warnke,1994 If a river runs through it somewhere there is bound to be a bridge Little in the landscape remains untouched by human hands and every touch from the simplest ditch to the most intricate monument reveals a political decision or design This is how Martin Warnke one of Germany's leading art historians looks at landscape in this book which leads to a new way of seeing nature as we have appropriated represented and transformed it over time Covering nearly a thousand years and most of western Europe Political Landscape provides a compelling summary history of modern humanity's ill fated attempt to master nature **The**

New Art of Photographing Nature Art Wolfe,Martha Hill,2013-04-02 A new spin on the classic guide to composing stunning images of nature and wildlife What is the difference between a good picture and a great one In this fully revised edition of the classic bestseller The Art of Photographing Nature master photographer Art Wolfe and former Audubon photo editor Martha Hill team up to explain the art of composing images of enduring beauty Against a backdrop of more than 250 photographs of nature wildlife and landscapes they share insights and advice about what works and what doesn't and how small changes can take an image from ordinary to extraordinary Throughout all new tips from digital imaging expert Tim Grey show readers how to make the most of digital technology whether by choosing the right color space understanding sensor size or removing distracting elements in post processing The result is an invaluable collection of expert advice updated for the modern age **Culture, Technology, and the Creation of America's National Parks** Richard A.

Grusin,2004-04-22 Richard Grusin's innovative study investigates how the establishment of national parks participated in the production of American national identity after the Civil War The creation of America's national parks is usually seen as an uncomplicated act of environmental preservation Grusin argues instead that parks must be understood as complex cultural technologies for the reproduction of nature as landscape art He explores the origins of America's three major parks Yosemite Yellowstone and Grand Canyon in relation to other forms of landscape representation including photography mapping travel writing and fiction **"Art, Technology and Nature "** CamillaSkovbjerg Paldam,2017-07-05 Since 1900 the connections

between art and technology with nature have become increasingly inextricable Through a selection of innovative readings by international scholars this book presents the first investigation of the intersections between art technology and nature in post medieval times Transdisciplinary in approach this volume's 14 essays explore art technology and nature's shifting constellations that are discernible at the micro level and as part of a larger chronological pattern Included are subjects ranging from Renaissance wooden dolls science in the Italian art academies and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the Wunderkammer eighteenth century plant printing the climate and its artistic presentations from Constable to Olafur Eliasson and the hermeneutics of bioart In their comprehensive introduction editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature suggesting this was a transient chapter in history

Thus they argue the present renegotiation between art technology and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods the Latin ars the Greek techne an area moreover supposed to imitate the creative forces of nature
