Looking At China:

China Walter F. Mondale, 1979 *Looking for Balance* Steve Chan, 2013-07-15 Debate surrounding China's rise and the prospects of its possible challenge to America's preeminence has focused on two questions whether the United States should contain or engage China and whether the rise of Chinese power has inclined other East Asian states to balance against Beijing by alignment with the United States or ramping up their military expenditures By drawing on alternative theoretic approaches most especially balance of threat theory political economic theory and theories of regime survival and economic interdependence Steve Chan is able to create an explanation of regional developments that differs widely from the traditional strategic vision of national interest He concludes that China's primary aim is not to match U S military might or the foreign policy influence that flows from that power and that its neighbors are not balancing against its rising power because in today's guns versus butter fiscal reality balancing policies would entail forfeiting possible gains that can accrue from cooperation economic growth and the application of GDP to nonmilitary ends Instead most East Asian countries have collectively pivoted to a strategy of elite legitimacy and regime survival based on economic performance *Engineers and Engineering*, 1920

China's Millions, 1900 *The Urban Code of China* Dieter Hassenpflug, 2012-12-13 Die Gestalt der chinesischen Stadt entschlüsseln Es geht in diesem urbanistischen Fachbuch nicht primär um bekannte Städte wie Peking Shanghai oder Shenzhen sondern um jene Formen Strukturen Zeichen und Botschaften die das Chinesische der chinesischen Stadt ausmachen Erst die Dekodierung der Sinität der chinesischen Stadt eröffnet die Möglichkeit die Vielfalt der empirischen Eindrücke richtig zu gewichten und sinnvoll einzuordnen So liefert dieses Buch auch einen Schlüssel zum Verständnis der aktuellen Hyperurbanisierung und der Vielzahl westlicher Städtebauprojekte in China **Look Again at China** Willis Church

Lamott, 1948 **International Construction Management Research** Igor Martek, 2024-12-30 This book lays out the evolution of the often contested construction management discipline How is the field defined What has been discovered to date Who are the researchers involved Where is the research being conducted What national priorities exist among the many nations now grappling with how to absorb foreign construction expertise or compete in the global commons Despite the overwhelming economic and political importance of the global construction industry and its impact on the world until now there has been no book dedicated to describing the body of research in the field or where the knowledge frontier lies This book is the first of its kind offering a comprehensive appraisal of the state of play in the emerging field of international construction management ICM research It will serve as a reference guide for academics and researchers embarking on or already active in global construction management research It lays out who the researchers are along with their fields of expertise the institutions dedicated to ICM research global research trends the journals accepting ICM research and a country by country analysis of national research priorities It will assist the fledgling PhD and the budding researcher as well as the discipline expert in making better decisions on how to advance the field of international construction management

through research that both augments CM education and directly benefits the industry **China** William A. Callahan, 2009-11-19 The rise of China presents a long term challenge to the world not only economically but politically and culturally Callahan meets this challenge in *China The Pessoptimist Nation* by using new Chinese sources and innovative analysis to see how Chinese people understand their new place in the world To chart the trajectory of its rise the book shifts from examining China's national interests to exploring its national aesthetic Rather than answering the standard social science question what is China with statistics of economic and military power this book asks when where and who is China to explore the soft power dynamics of China's identity politics *China The Pessoptimist Nation* shows how the heart of Chinese foreign policy is not a security dilemma but an identity dilemma Through careful analysis Callahan charts how Chinese identity emerges through the interplay of positive and negative feelings in a dynamic that intertwines China's domestic and international politics China thus is the pessoptimist nation where national security is closely linked to nationalist insecurities Callahan concludes that this interactive view of China's pessoptimist identity means that we need to rethink the role of the state and public opinion in Beijing's foreign policy making *Perspectives on Modern China* Kenneth Lieberthal, 1991 The conveners the editors of this book of the September 1989 Four Anniversaries China Conference in Annapolis asked the contributors to look back from that point in time to consider four major events in modern Chinese history in the perspective of the rapid changes that were shaping the Chinese society economy polity and sense of place in the world in the 1980s a time when China was making rapid strides toward becoming more integrated with the outside world With contributions by distinguished scholars in the field the four anniversaries considered are the High Qing the May Fourth Movement forty years of communism in China and ten years of the Deng era **Australia-China Relations post 1949** Yi Wang, 2016-04-08 This book challenges the common perceptions of Australian dependence upon great power allies in the conduct of its foreign relations through a critical examination of Australia's relations with the People's Republic of China The author focuses on the economic and political dimensions of the policy making process from the founding of the PRC in 1949 to the present era against an analytical framework that takes into account both internal and external factors in the formulation and implementation of Australian foreign policy Informed by political science and international relations the book differs from the conventional literature on Sino Australian relations which has either focused on pure economic analysis or concentrated on chronicling historical events The author weaves theoretical insights from political science and international relations into the historical analysis while seeking to examine the interplay between political and economic factors over time in shaping policy outcomes The book draws not only on primary and secondary sources but also on information and insights obtained from interviews with a vast array of direct participants in the policy process including almost all the former ambassadors from both China and Australia covering the entire period of the diplomatic relationship As a result the book breaks new ground especially from the Hawke era onwards revealing hitherto overlooked details of interest in the policy process Looking
