Looking Into Teaching:

Looking Into Primary Headship Geoff Southworth, 2002-11-01 This is both a study of leadership and a research methods text. It offers an analytical description of a primary headteacher at work over the course of one school year. Using a mix of participant observation and interviews, the book provides a portrait of this head's approach to his work, his background, beliefs, the school as a context, what he did, how he dealt with change and development, power, and the personal dimension of headship. The portrait is matched to the contemporary literature, and an hypothesis is formulated about primary headship and is then used to critique existing ideas about school leadership. The book also suggests ways of developing heads and school teachers.

A Performatory Approach to Teaching, Learning and Technology Jaime E. Martinez, 2012-01-01 Even the most cursory glance at innovation in the field of education will reveal the emerging importance that researchers place on play, performance, and collaboration in the classroom. Concurrently, policy makers and school districts are investing more resources in promoting the development of 21st Century skills and technology use in the classroom. *A Performatory Approach to Teaching, Learning and Technology* integrates technology use in teaching and learning and the use of a Vygotskian performance-based pedagogy. Through the use of ethnographic vignettes and narratives, the development of the author's teaching practice is presented as challenges and contradictions brought about by technology use, and a humanistic perspective on teaching and learning are engaged. The performatory social therapeutic framework that the author's teaching practice is grounded in is richly illustrated with scenes from elementary, middle school, and undergraduate classrooms. The featured technologies include laptops, Internet-based applications, course management systems, discussion forums, e-mail, digital video, Wiki's, and Blogs. Audience: Teachers, first-year graduate students, and researchers will be interested in this book for a practitioner's perspective on the integration of an innovative pedagogy and technology into teaching practices.

Creative Collaboration in Teaching Marcelo Giglio, 2016-04-29 *Creative Collaboration in Teaching* focuses on the question of how best to facilitate creative collaboration among students in the classroom setting, with a focus on music composition and from the perspective of social-cultural psychology. This book is comprehensive, cutting-edge, and scholarly in its approach. Marcelo Giglio's attention to music and creativity is detailed enough to satisfy any researcher, educator, or teacher-educator, but at the same time, his research approach, classroom observations, and overriding recommendations can be easily applied to a wide range of subject areas. Giglio combines a rigorous review of the relevant literatures on creativity and social interactions with the reporting and analysis of his own original data across the world and then goes on to support this important work with detailed descriptions of classroom episodes: student-to-student and teacher-to-student interactions. By combining these three elements, this book offers socio-creative and pedagogical models for education in practice, as well as teacher education and research.
