Looking Into The Middle Ages:

Multilingualism in the Middle Ages and Early Modern Age Albrecht Classen, 2016-09-12 Bi and multilingualism are of great interest for contemporary linguists since this phenomenon deeply reflects on language acquisition language use and sociolinguistic conditions in many different circumstances all over the world Multilingualism was however certainly rather common already if not especially in the premodern world For some time now research has started to explore this issue through a number of specialized studies The present volume continues with the investigation of multilingualism through a collection of case studies focusing on important examples in medieval and early modern societies that is in linguistic and cultural contact zones such as England Spain the Holy Land but also the New World As all contributors confirm the numerous cases of multilingualism discussed here indicate strongly that the premodern period knew considerably less barriers between people of different social classes cultural background and religious orientation But we also have to acknowledge that already then human communication could fail because of linguistic hurdles which prevented mutual understanding in religious and cultural terms

Urban Space in the Middle Ages and the Early Modern Age Albrecht Classen, 2009-12-15 Although the city as a central entity did not simply disappear with the Fall of the Roman Empire the development of urban space at least since the twelfth century played a major role in the history of medieval and early modern mentality within a social economic and religious framework Whereas some poets projected urban space as a new utopia others simply reflected the new significance of the urban environment as a stage where their characters operate very successfully As today the premodern city was the locus where different social groups and classes got together sometimes peacefully sometimes in hostile terms The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms

Nature in the Middle Ages and the Early Modern Times Albrecht Classen, 2024-07-01 The study of pre modern anthropology requires the close examination of the relationship between nature and human society which has been both precarious and threatening as well as productive soothing inviting and pleasurable Much depends on the specific circumstances as the works by philosophers theologians poets artists and medical practitioners have regularly demonstrated It would not be good enough as previous scholarship has commonly done to examine simply what the various writers or artists had to say about nature While modern scientists consider just the hard core data of the objective world cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of

nature presented by countless writers and artists Only when we have a good grasp of the interactions between people and their natural environment are we in a position to identify and interpret mental structures social and economic relationships medical and scientific concepts of human health and the messages about all existence as depicted in major art works In light of the current conditions threatening to bring upon us a global crisis it matters centrally to take into consideration pre modern discourses on nature and its enormous powers to understand the topoi and tropes determining the concepts through which we perceive nature Nature thus proves to be a force far beyond all human comprehensibility being both material and spiritual depending on our critical approaches

Women In Dark Age And Early Medieval Europe c.500-1200 Helen Jewell,2006-10-04 The period 1200 1550 opened in a time of population expansion but went on to suffer the demographically cataclysmic effects of the plague beginning with the Black Death of 1347 51 The period dawned with a confident papacy and the Albigensian crusade against heretics and ended with the Catholic church torn apart by the Protestant Reformation Huge challenges were affecting society in various ways but they did not always affect men and women in the same ways Helen M Jewell provides a lively survey of western European women s activities and experiences during this timeframe The core chapters investigate The function of women in the countryside and towns The role of women in the ruling and landholding classes Women within the context of religion This practical centre of the book is embedded in an analysis of the gender theories inherited from the earlier Middle Ages which continued to underpin laws which restricted women s activity an education system which offered them inferior institutional provision and a church which

denied them ministry Three individuals who vastly exceeded these expectations crashing through the glass ceilings of their day are brought together in a fascinating final chapter Combining a historiographical survey of trends over the last thirty years with more recent scholarship this is as indispensable introduction for anyone with an interest in women's history from the late Medieval period through to the Reformation
