The Looking-Glass Self John V. Canfield, 1990-11-20 John Canfield here presents a penetrating study of the self and self consciousness from the point of view of contemporary analytic philosophy Taking as his starting point Wittgenstein's views on the nature of the self Canfield explains Wittgenstein's approach to philosophy and his way of looking at language He also explores significant non Wittgensteinian philosophical literature including the widespread debate over criteria of personal identity and basic assumptions about the I of such expressions as I think The second half of the book examines how we fix or ascertain certain beliefs about ourselves a problem not previously discussed by analytic philosophers Canfield begins by examining traditional theories that take the self to be a fiction of some sort He goes on to analyze our deep seated existential belief in self a belief that he notes can coexist with a theoretical denial of self's existence A central chapter of the book attempts to delineate clearly Wittgenstein's view of the I as a grammatical fiction In addressing the large literature on criteria of personal identity Canfield argues that a central assumption of that work the notion of judging by intuition in puzzle cases is mistaken Turning his attention to forms of self consciousness Canfield demonstrates that the I of gut level belief is categorically heterogeneous and in part fictional Written with a minimum of jargon this book will interest Wittgensteinian scholars as well as philosophers social scientists and psychoanalysts involved in the study of the self

Averting Global Extinction Louis S. Berger,2009-06-11 The extensive literature about averting ecological disasters nuclear catastrophe and unsupportable overpopulation typically describes dangers analyzes their implications and presses for remedial action It seems that what is taken as too obvious and well understood to mention let alone to address seriously is humanity s failure to give global and human survival top priority More careful consideration of this irrational self destructive sociocultural negligence shows that it is complex puzzling and ensconced and perpetuated by pathological societal defenses This paradox is Averting Global Extinction s subject Berger argues that if these psychological defenses were reduced so would be society s indifference to necessary action The book s clinically informed approach conceptualizes society s self destructiveness as an analogue to the self destructive psychopathologies of individuals identifies society s ubiquitous and destructive psychological defenses denial projection and avoidance as the chief element in that sociocultural psychopathology and devises a sociocultural therapy This therapy is accomplished by translating a carefully selected individual psychotherapy framework a subtype of the so called analysis of defense into a corresponding societal therapeutic methodology society becomes the patient This intervention is intended to complement and facilitate not replace the usual recommended approaches to rescuing the globe Thus three analogies are deployed between individual and societal pathology defenses and psychotherapy The book s new and valuable principal contributions are the identification of sociocultural psychopathology as the underlying cause of our near indifference to the threat of global extinction the recognition of societal defenses as key elements in that pathology the conceptualization of a therapeutic analogue applicable at the societal level to counter that indifference and the construction of an exemplar of that analogue
