**Moving up the Value Chain** K R Kashyap, 2014-03-04. The book explains the way forward during 2014 and beyond for Indian IT

Exporters in what the author refers to as a multi-speed global economy. The book covers several trends and industry shifts affecting Indian IT exporters from a business perspective. The primary focus is on multinational corporations (MNCs) and global banks based in the US and in Europe. The author leverages his industry experience to discuss strategies and new business models for Indian IT exporters. He also explains how the industry as well as Indian IT professionals can move up the value chain. Many topics are also relevant to India-based captive units of MNCs in the Indian IT industry. The book is in three parts. Part 1, chapters 2 to 4, introduces what the author describes as a multi-speed global economy. The theme of Part 2, chapters 5, 6, and 7, is how to get closer to global clients from a business perspective. Part 3, chapters 8 to 10, covers implications for Indian IT exporters. The topics are intended to ignite the minds of readers, especially young Indian IT professionals. This book will provide them the necessary insight to move up the value chain in the years ahead.

*Employment and Skills for the Defence Industry in Scotland* Great Britain: Parliament: House of Commons: Scottish Affairs Committee, 2008. Defence and aerospace industries in Scotland generate nearly 2.31 billion in sales and together with the MoD support almost 50,000 jobs and a record number of apprentices. As well as a recognised expertise in naval ship building, Scotland also has a strong defence electronics industry and a strong aerospace industry based around Prestwick. This report examines the delay in the signing of the contract for two new aircraft carriers; the Committee is concerned that similar delays

during the construction phase could lead to job losses and damage the ship building skills base the UK needs to support if it wishes to retain sovereign capability in key areas The Committee also comments on the Government's decision to treat the Military Afloat Reach and Sustainability MARS vessels as commercial rather than naval vessels making them subject to EU competition law There is confusion over the status of these vessels The report also looks at the supply of skilled semi skilled and graduate workers the Modern Apprenticeship programme and the funding for adult apprentices It is vital for Scottish industry to look at upskilling throughout the workforce including mature workers who were not able to access apprenticeships as school leavers The issue of constitutional change also affects the future sustainability of the Scottish defence industry In the long term it is unclear what naval requirement an independent Scotland would have and whether this would make up for the potential loss of UK MoD orders Government and industry need to work effectively together to ensure that Scotland's engineering and manufacturing base continues to be world class
