Los Senores De Las Plantas Medicina Y Herbolaria En Mesoamerica:

THE LIMPIA IN THE MESOAMERICAN ETHNOMEDICINES Alfonso J. Aparicio Mena, Francesco Di

Ludovico, 2013-03-18 A limpia cleansing in the Spanish language is a physical symbolic method used in the Mesoamerican traditional medical practices to reach a new balance. The verb to clean means make something or someone free of dirt, mess or defects. When what is removed is visible, the result of cleaning is an objective fact; when however the alteration, the defect, the block inside the person is symbolic/energetic, the limpia becomes an act of faith, a physical ritual that is a step away from the sacred or the traditional. In fact, according to Mesoamerican natives, the human being is built up also by something more than the body: this is a kind of vital energy that is an integral part of all creatures and of course the human being. Not specific of Mesoamerican worldview, the spiritual vibration is communicated with other discursive images by other ethnic groups coming from all around the world. Mesoamerican people thus think that health problems have not only corporal or psychological causes and relations but energetic too. The limpia makes the person connected with itself and with its own environment, biological community and of cultural beliefs; its purpose is to re-harmonize the person with that environment, removing and expelling from it the elements physical, psychic, social and symbolic causing its sickness or influencing it.

Ethnic Knowledge and Perspectives of Medicinal Plants Münir Öztürk, Kandikre Ramaiah Sridhar, Maryam Sarwat, Volkan Altay, Francisco Martín Huerta-Martínez, 2023-10-20. This new 2 volume set aims to share and preserve ethnic and traditional knowledge of herbal medicine and treatments while also emphasizing the link between biodiversity, human nutrition and food security. *Ethnic Knowledge and Perspectives of Medicinal Plants* is divided into two volumes with volume 1 focusing on the traditional use of curative properties and treatment strategies of medicinal plants and volume 2 addressing the varied nutritional and dietary benefits of medicinal plants and the practice of Ayurveda. Both volumes stress the importance of bioresources for human nutrition and nutraceuticals based on ethnic knowledge and the need for efforts to protect biodiversity in many regions rich with medicinal plants. Exploring the benefits of medicinal plants in disease prevention, treatment and management, Volume 1 discusses the traditional use of medicinal plants as promising therapeutics for cancer, liver conditions, COVID-19 and other human ailments. It examines the efficacy of Ayurvedic and Chinese herbal medicine, Indian traditional medicine and other ethnic herbal practices used by indigenous peoples of Azerbaijan, South America, Turkey, India etc. A variety of plants are discussed and the ethnomedicinal applications of over 100 wild mushrooms for their medicinal and healthcare purposes are elaborated on. While volume 1 focuses primarily on natural plant resources for addressing specific health issues, volume 2 looks at traditional medicinal plant use for their nutritional and dietary benefits while also encouraging the preservation of biodiversity for healthy and sustainable diets. The volume presents information on over 2200 vascular plant taxa from 127 families as well as many taxa from leaf parts, fruits, underground parts, floral parts, seeds and more that have potential use as edible food plants. Ethnic knowledge on the wild edible mushrooms is an emerging

area which is unique and is dependent on the folk knowledge of tribals this volume discusses the unique nutritional attributes of wild edible mushrooms 206 species belonging to 73 genera in Southern India The authors look at various lichens as nutritional aids and medicine and as flavoring agents and spices Fucoidans derived from the seaweeds and spirulina are described for their antioxidant activity nutritional and anti aging properties antiviral activities anti cancer properties anti diabetic properties and more The authors also examine how ethnicity affects healthcare nutritive systems at different levels through various dynamics such as lower income inability for services uptake disputes among different ethnic groups cultural attitudes some ethnic group are vegetarian lack of socio economic resources and disease prevalence Together these two important volumes aim to preserve and disseminate the valuable ethnic knowledge of medicinal plants gained over thousands of years and to promote the value of integrating and safeguarding biodiversity

Visible Empire Daniela Bleichmar, 2012-10-08 Between 1777 and 1816 botanical expeditions crisscrossed the vast Spanish empire in an ambitious project to survey the flora of much of the Americas the Caribbean and the Philippines While these voyages produced written texts and compiled collections of specimens they dedicated an overwhelming proportion of their resources and energy to the creation of visual materials European and American naturalists and artists collaborated to manufacture a staggering total of more than 12 000 botanical illustrations Yet these images have remained largely overlooked until now In this lavishly illustrated volume Daniela Bleichmar gives this archive its due finding in these botanical images a window into the worlds of Enlightenment science visual culture and empire Through innovative interdisciplinary scholarship that bridges the histories of science visual culture and the Hispanic world Bleichmar uses these images to trace two related histories the little known history of scientific expeditions in the Hispanic Enlightenment and the history of visual evidence in both science and administration in the early modern Spanish empire As Bleichmar shows in the Spanish empire visual epistemology operated not only in scientific contexts but also as part of an imperial apparatus that had a long established tradition of deploying visual evidence for administrative purposes
