Regulating Competition Susanna Fellman, Martin Shanahan, 2015-12-22. Cartels, trusts and agreements to reduce competition between firms have existed for centuries but became particularly prevalent toward the end of the 19th century. In the mid-20th century, governments began to use so-called cartel registers to monitor and regulate their behaviour. This book provides case studies from more than a dozen countries to examine the emergence, application and eventual decline of this form of regulation. Beginning with a comparison of the attitudes to regulation that led to monitoring rather than prohibiting cartels, this book examines the international studies on cartels undertaken by the League of Nations before World War II. This is followed by a series of studies on the context of the registers, including the international context of the European Union and the importance of lobby groups in shaping regulatory outcomes, using Finland as an example. Section two provides a broad international comparison of several countries' registers with individual studies on Norway, Australia, Japan, Germany, Sweden and the Netherlands. After examining the impact of registration on business behaviour in the insurance industry, this book concludes with an overview of the lessons to be learnt from 20th-century efforts to regulate competition. With a foreword by Harm Schroter, this book outlines the rise and fall of a system that allowed nations to tailor their approach to regulating competition to their individual circumstances whilst also responding to the pressures of globalisation that emerged after the Second World War. This book is suitable for those who are interested in and study economic history, international economics and business history.

Vessel Collisions in the Law of the Sea Alfredo C. Robles Jr., 2022-12-08. This book focuses on the decision of the Tribunal in the South China Sea Arbitration that China had operated its law enforcement vessels in ways that created risks of collision with Philippine official vessels at Scarborough Shoal in April and May 2012. The book explains the International Regulations for Preventing Collisions at Sea (COLREGS) and the incidents in layperson's terms. It analyzes China's violations of the COLREGS on the basis of confidential Philippine documents declassified for the Arbitration, technical works by professional mariners and the reports submitted by the navigational safety experts to the Tribunal. It pays attention to Chinese post-arbitration critiques of the Tribunal's decision which it characterizes as rationalizations of collisions as instruments of Chinese foreign policy. It contrasts China's conduct with the practice of the US and Western European States which mandate compliance with collision regulations even during law enforcement operations. The book draws on sources in five languages: English, French, German, Italian and Spanish and helps the reader understand the pattern of China's harassment of vessels from littoral and non-littoral States in the South China Sea as well as the absence of legal foundations for China's rationalizations of its

behavior **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events Martindale-Hubbell International Law Directory ,1994 *International Commerce* ,1966 The Literary World ,1887 **Engineering Journal** ,1919 Vol 7 no 7 July 1924 contains papers prepared by Canadian engineers for the first World power conference July 1924 *The Chinese Anti-Monopoly Law* Michael Faure, Xinzhu Zhang, 2013-01-01 This book focuses on experiences with the Anti Monopoly Law AML of 2007 in China It uses carefully chosen case studies to examine how the competition authorities in China discuss cases and how they use economic reasoning in their decision making process Bringing together comparative perspectives the expert contributors discuss the practice of the Anti Monopoly Law in China from the viewpoints of European and American competition policy Several very current topics are given specific attention including enforcement the role of the state how to define the relevant market and how to apply the AML to regulated industries The book also indicates the scope for mutual learning on how to improve the AML The Chinese Anti Monopoly Law will appeal to competition lawyers attorneys at law dealing with economic law generally civil servants and policy makers comparative lawyers and social scientists with an interest in developments in China Places of Refuge Eric Van Hooydonk, 2020-11-26 The need for specific legal arrangements governing ships in distress and places of refuge is one of the most topical problems in both public and private maritime law The headline grabbing shipping disasters involving the loss of the Erika 1999 and the Prestige 2002 attracted the attention of the IMO the Comité Maritime International the European Union national maritime authorities around the globe and the maritime industry in general Ultimately the impact of pollution on local economies and the environment was enough to arouse the concern of a broad swathe of public opinion Places of Refuge provides clarity on The scope of the right of access The conditions under which coastal authorities may deny access The liability of authorities granting or denying access The basis and the conditions of financial securities The obligation to establish contingency plans *The EU Charter of Fundamental Rights in the Member States* Michal Bobek, Jeremias Adams-Prassl, 2020-12-24 Ten years after the Charter of Fundamental Rights of the European Union became part of binding primary law and twenty years since its adoption this volume assess the application of the EU Charter in the Member States How often and in particular by which actors is the EU Charter invoked at the national level In what type of situations is it used Has the approach of national courts in general and of constitutional courts in particular to EU law to EU fundamental rights law changed following the entry into force of the Charter What sort of interplay does the Charter generate with the national bill of rights and the European Convention Is the life with the Charter on the national level a harmonious praktische Konkordanz or rather a messy m nage trois These and other questions are discussed in the four parts that form the book Part I is dedicated to the normative foundations Part II sets out Member States Perspectives providing a structured in depth account of the Charter s operation in 16 different Member States Part III provides a detailed evaluation

Competition Policy and Price Fixing Louis Kaplow, 2013-06-30 Throughout the world the rule against price fixing is competition law's most important and least controversial prohibition Yet there is far less consensus than meets the eye on what constitutes price fixing and prevalent understandings conflict with the teachings of oligopoly theory that supposedly underlie modern competition policy Competition Policy and Price Fixing provides the needed analytical foundation It offers a fresh in depth exploration of competition law's horizontal agreement requirement presents a systematic analysis of how best to address the problem of coordinated oligopolistic price elevation and compares the resulting direct approach to the orthodox prohibition In doing so Louis Kaplow elaborates the relevant benefits and costs of potential solutions investigates how coordinated price elevation is best detected in light of the error costs associated with different types of proof and examines appropriate sanctions Existing literature devotes remarkably little attention to these key subjects and instead concerns itself with limiting penalties to certain sorts of interfirm communications Challenging conventional wisdom Kaplow shows how this circumscribed view is less well grounded in the statutes principles and precedents of competition law than is a more direct functional proscription More important by comparison to the communications based prohibition he explains how the direct approach targets situations that involve both greater social harm and less risk of chilling desirable behavior and is also easier to apply

The Spectator, 1858 A weekly review of politics literature theology and art

The Goals of Competition Law Daniel Zimmer, 2012 What are the normative foundations of competition law That is the question at the heart of this book Leading scholars consider whether this branch of law serves just one or more than one goal and if it serves to protect unfettered competition as such how this goal relates to other objectives such as the promotion of economic welfare The book brings together contributions on the relevance of different welfare standards on the concept of freedom to compete and on distributional fairness as a goal of competition law Moreover it discusses the relationship to other legal goals such as market efficiency
