**German Jews in Love** Christian Bailey, 2022-11-01 This book explores the dynamic role of love in German Jewish lives from the birth of the German Empire in the 1870s to the 1970s a generation after the Shoah During a remarkably turbulent hundred year period when German Jews experienced five political regimes rapid urbanization transformations in gender relations and war and genocide the romantic ideals of falling in love and marrying for love helped German Jews to develop a new sense of self Appeals to romantic love were also significant in justifying relationships between Jews and non Jews even when those unions created conflict within and between communities By incorporating novel approaches from the history of emotions and life cycle history Christian Bailey moves beyond existing research into the sexual and racial politics of modern Germany and approaches a new frontier in the study of subjectivity and the self German Jews in Love draws on a rich array of sources from newspapers and love letters to state and other official records Calling on this evidence Bailey shows the ways German Jews romantic relationships reveal an aspect of acculturation that has been overlooked how deeply cultural scripts worked their way into emotions those most intimate and seemingly pre political aspects of German Jewish subjectivity

*The Hand that Feeds* Alexander Mullan, Riley Smallman, Herre de Bondt, Juliette Waterman, 2025-05-13. Food plays a major part in shaping human-animal relations from nurturing farm and zoo animals to bringing wild birds into suburban gardens. Food-mediated interactions create personal interspecies bonds, enrich and alter environments, change species distributions, enable new relationships and reconfigure social perspectives but also lead to many concerns over health and disease for example as well as conflicts over spaces and resources. However, previous attention has almost exclusively focused on the purpose-driven, utilitarian and economic aspects of feeding rather than the affective and emotional encounters that motivate many feeding practices. Presenting new research and interdisciplinary case studies, *The Hand that Feeds* considers animal feeding from historic to modern times. The volume explores the nuances and complexity of non-utilitarian feeding relationships across urban and rural divides: in the wild, on the farm, at the zoo and in the garden, and how our feeding relationships have altered animal distributions and behaviours. The authors scrutinise contrasts between which species are promoted and which are persecuted and how the species we choose to feed reflects broader world views and cultural values. Ultimately, this volume engages in the discussion of how we feed, why we feed, which animals we deem worthy of feeding and the widespread impacts of feeding relations. Praise for *The Hand that Feeds*: An innovative and exciting collection of studies exploring the cultural phenomenon of animal feeding. Drawing on cutting-edge approaches and case studies from wild raptors to livestock and zoo animals, *The Hand that Feeds* has started a new conversation on this fundamental relationship between other species and ourselves. Aleks Pluskowski, University of Reading. This fascinating book explores the how, why and consequences of people feeding other species, drawing on perspectives from the historical life and social sciences. Different voices bring diverse observations and viewpoints to a refreshingly lively and informative discussion of a topic that is anything but simple. Terry O'Connor, University of York. This is a fantastic interdisciplinary collection interrogating how human-animal relations are mediated by food. Food can be an enticement, a medicine or a poison; it can be a vehicle for protection and bonding or distance and killing. Dolly Jørgensen, University of Stavanger.

peacekeeping has undergone radical transformation in the new millennium Where it once was limited in scope and based firmly on consent of all parties contemporary operations are now charged with penalizing spoilers of peace and protecting civilians from peril Despite its more aggressive posture practitioners and academics continue to affirm the vital importance of impartiality whilst stating that it no longer means what it once did *Taking Sides in Peacekeeping* explores this transformation and its implications in what is the first conceptual and empirical study of impartiality in UN peacekeeping The book challenges dominant scholarly approaches that conceive of norms as linear and static conceptualizing impartiality as a composite norm one that is not free standing but an aggregate of other principles each of which can change and is open to contestation Drawing on a large body of primary evidence it uses the composite norm to trace the evolution of impartiality and to illuminate the macro level politics surrounding its institutionalization at the UN as well as the micro level politics

surrounding its implementation in the Democratic Republic of the Congo site of the largest and costliest peacekeeping mission in UN history Taking Sides in Peacekeeping reveals that despite a veneer of consensus impartiality is in fact highly contested As the collection of principles it refers to has expanded to include human rights and civilian protection deep disagreements have arisen over what keeping peace impartially actually means Beyond the semantics the book shows how this contestation together with the varying expectations and incentives created by the norm has resulted in perverse and unintended consequences that have politicized peacekeeping and in some cases effectively converted UN forces into one warring party among many Taking Sides in Peacekeeping assesses the implications of this radical transformation for the future of peacekeeping and for the UN s role as guarantor of international peace and security
