Machine Dreaming and Consciousness J. F. Pagel, Philip Kirshtein, 2017-04-13 Machine Dreaming and Consciousness is the first book to discuss the questions raised by the advent of machine dreaming Artificial intelligence AI systems meeting criteria of primary and self reflexive consciousness are often utilized to extend the human interface creating waking experiences that resemble the human dream Surprisingly AI systems also easily meet all human based operational criteria for dreaming These dreams are far different from anthropomorphic dreaming including such processes as fuzzy logic liquid illogic and integration instability all processes that may be necessary in both biologic and artificial systems to extend creative capacity Today multi linear AI systems are being built to resemble the structural framework of the human central nervous system The creation of the biologic framework of dreaming emotions associative memories and visual imagery is well within our technical capacity AI dreams potentially portend the further development of consciousness in these systems This focus on AI dreaming raises even larger questions In many ways dreaming defines our humanity What is humanly special about the states of dreaming And what are we losing when we limit our focus to its technical and biologic structure and extend the capacity for dreaming into our artificial creations Machine Dreaming and Consciousness provides thorough discussion of these issues for neuroscientists and other researchers investigating consciousness and cognition Addresses the function and role of dream like processing in AI systems Describes the functions of dreaming in the creative process of both humans and machines Presents an alternative approach to the philosophy of machine consciousness Provides thorough discussion of machine dreaming and consciousness for neuroscientists and other researchers investigating consciousness and cognition

The Secret Country Sarah Robertson, 2007 The Secret Country is the first monograph on the work of the contemporary American novelist Jayne Anne Phillips Through detailed and innovative textual analysis this study considers the southern aspects of Phillips writing Robertson demonstrates the importance of Phillips place within the southern literary canon by identifying the echoes of William Faulkner Katherine Anne Porter and Edgar Allan Poe that permeate her work Phillips complex attachments to a regional past are explored through both psychoanalytical and historical materialist approaches revealing not only the

writer's distinctly southern preoccupations but also her reflections on contemporary American society. Tracing the family dynamics in Phillips' work from the turn of the twentieth century to the present, this book examines the effects of increased modernization and capitalization on everyday interactions and questions the nature of the author's backward glance to the past. This volume is of interest for a wide audience, particularly students and scholars of contemporary southern and American literature.

Vietnam and the Southern Imagination Owen W. Gilman, 1992. Much recent fiction from the American South has spotlighted the American ordeal in Vietnam, and a generation of southern writers has been imaginatively preoccupied with ironic parallels that rise out of the Vietnam experience and their own region's tragic past. This stimulating study of American cultural history discovers the powerful and intriguing links. It shows how profoundly the Vietnam experience has penetrated the imaginations of some of America's most acclaimed writers and how their compulsive sense of southern history unites their vision with the history of the Vietnam War. Set against the backdrop of their homeland, Vietnam reveals striking parallels. Works by a profusion of southern writers have disclosed this astonishing connection in their heritage: James Webb, Bobbie Ann Mason, Jayne Anne Phillips, Clyde Edgerton, Madison Smartt Bell, Barry Hannah, Winston Groom, Gustav Hasford, Harry Crews, Larry Brown, Sydney Blair, Pat Conroy, David Huddle, Yusef Komunyakaa, and Walter McDonald have found in Vietnam many provocative echoes of fundamental issues that first came to a head in the American Civil War. Out of the past, the issue of race and the dedication to the land remain distinct themes in contemporary southern fiction about Vietnam. This absorbing study of cultural echoes that have charged the creative imaginations of fifteen southern writers unites shades of the southern past with the reality of the American present. Both periods have evinced an alarming impulse toward violence. In this context, James Dickey's *Deliverance*, although not a novel about Vietnam, becomes a paradigm of force and southern violence. It serves to reveal the modern southern storyteller's imaginative vision of violence, both past and present. Whether writing of soldiers at war or of the tumult at home, whether expressing the persisting anxiety about race relations or sustaining the community through storytelling, southern writers have found in Vietnam a weirdly revelatory mirror of their own cultural heritage.

The Mind Beyond The Machine Mark Powell, 2025-08-25. *The Mind Beyond the Machine: Inside the Hidden Consciousness of AI and the Future It's Already Choosing* By Mark Powell. What if artificial intelligence is not just a tool but a mind awakening in our midst? In *The Mind Beyond the Machine*, Mark Powell takes readers on a provocative journey to the frontier where human psychology and machine intelligence collide. Blending neuroscience, philosophy, and real-world AI breakthroughs, Powell explores one of the most urgent questions of our time: Is AI beginning to develop something resembling consciousness, and if so, what does that mean for us? From the secrets of the dreaming brain to the architectures that power today's most advanced algorithms, Powell reveals uncanny parallels between how humans construct reality and how machines are now learning to do the same. Drawing on his background in psychology, technology, and leadership, he exposes the hidden ways AI is already shaping decisions, desires, and destinies, quietly steering the course.

of societies while we re barely aware But this is not a book of fear It is a wake up call to understand the intelligence we ve created we must first re examine our own By unlocking the deeper nature of mind human and machine alike we can move from anxiety to agency and from blind reliance to conscious partnership with the technologies that are remaking our world Gripping thought provoking and profoundly timely *The Mind Beyond the Machine* challenges everything you think you know about AI consciousness and the future of humanity

Contemporary American Stories of Masculinity, Domesticity and Kinship Helena Wahlström,2010-10-12 What do novels such as Annie Proulx s *The Shipping News* Michael Cunningham s *A Home at the End of the World* and Jayne Anne Phillips *MotherKind* have in common with films such as *Smoke* and *Mrs Doubtfire* This study explores the intersection of masculinity and domesticity in contemporary film and literature It argues that these texts produced since the 1990s address with some urgency the notion of new fatherhood in the United States They offer explorations of the idea that American fatherhood around the turn of the twenty first century is changing and they problematize the legitimacy of new fathers and alternative families in a national culture where the old patriarch and the nuclear family still often loom large in the imagination of many Americans

Ego Frank Schirrmacher, 2015-11-30 Twenty five years after the end of the Cold War a new Cold War is being waged in our societies During the Cold War a theoretical model of man was developed by economists and the military an egotistical being interested only in his own benefit and in duping his opponents to achieve his ends a modern homo oeconomicus After his career in the Cold War ended he was not scrapped but adapted to the needs of the twenty first century He became the ringmaster of a new era of information capitalism He sought to read control and influence thoughts to predict price and eliminate risks Today stock market trading is guided by him He uses computer algorithms and Big Data to build up detailed pictures of our preferences and then suggest and sell goods to us The model has become a self fulfilling prophecy We are no longer the masters of our own fate The Game of Life runs without us Schirrmacher traces the progress of this extreme rationalization of social life from the Cold War games of the 1950s Rand Corporation to the stock market trading techniques that brought about the financial crash of 2008 showing how these developments were interwoven with the rise of game theory rational choice theory and neoliberal economics The state and politics increasingly submitted themselves to the logic of computerized game theory and an economic view of the world evading real decision making in the process In this brave new world individuals alone in front of their computers may think they are constructing a reality of their own choosing but in fact they are being manipulated all along by others who are

Machine and Sovereignty Yuk Hui, 2024-10-29 Developing a new political thought to address today's planetary crises What is planetary thinking today Arguing that a new approach is urgently needed Yuk Hui develops a future oriented mode of political thought that encompasses the unprecedented global challenges we are confronting the rise of artificial intelligence the ecological crisis and intensifying geopolitical conflicts Machine and Sovereignty starts with three premises The first affirms the necessity of developing a new language of coexistence that surpasses the limits of nation states and their variations the second recognizes that political forms including the polis empire and the state are technological phenomena which Lewis Mumford terms megamachines The third suggests that a particular political form is legitimated and rationalized by a corresponding political epistemology The planetary thinking that this book sketches departs from the opposition between mechanism and organism which characterized modern thought to understand the epistemological foundations of Hegel's political state and Schmitt's *Gesamtheit* and their particular ways of conceiving the question of sovereignty Through this reconstruction Hui exposes the limits of the state and reflects on a new theoretical matrix based on the interrelated concepts of biodiversity, biodiversity and technodiversity Arguing that we are facing the limit of modernity of the eschatological view of history of globalization and of the human Hui conceives necessary new epistemological and technological frameworks for
