The Iranian Crisis and the Birth of the Cold War Benjamin F. Harper, 2018-09-15 This work examines the Iranian Crisis of 1946 and its active role in shaping the Cold War that followed It is intended to serve as a case study of how the United States was able to successfully flex its short lived atomic monopoly and achieve its international objectives in the early postwar era This writing engages with the robust academic field of U S foreign relations that over the past number of years revisited and reimagined the origins and driving forces of the Cold War The Soviet Union's violation of a troop withdrawal agreement at the conclusion of the Second World War coupled with its active support of Kurdish and Azeri separatist movements aggressively tested the new and evolving international order The primary objective of this work is to understand how the international community achieved a relatively peaceful withdrawal of Soviet forces from Iranian territory I contend that 1 Iran possessed due to its wartime role and latent economic potential a degree of leverage in negotiations with the United States and Russia that other nations did not 2 that the Iranian prime minister Ahmad Qavam shrewdly manipulated both superpowers with his own brand of masterful statecraft while pursuing his own Iran centric objectives 3 that the United States used its preponderance of military economic and diplomatic might to effectively achieve its postwar aims and 4 the primary actors in the crisis solidified the legitimacy of the

United Nations and its Security Council which had previously been in jeopardy While lesser known than the Berlin Airlift or the Korean War or the Cuban Missile Crisis the Iranian Crisis revealed for the first time what a superpower clash might look like This event provides a stunning example of crisis management by the primary participants The Iranian Crisis was indeed the birth of the Cold War and it established a model for state actions during and after this long conflict The Crisis also provides a powerful example of how third party entities outside of Europe despite possessing relatively meager military and economic might had the ability to alter and occasionally manipulate superpower behavior
