Scientific Studies in Mental Retardation John Dobbing, A. D. B. Clarke, 1984-06-18 The Modern Management of *Mental Handicap* G.B. Simon, 2012-12-06 The aim of this book is to provide parents staff and others involved with mentally handicapped children and adults with up to date basic information and advice in their management Methods of care treatment and management of a heterogeneous group of people such as the mentally handicapped must of necessity include many disciplines if they are to be given an adequate service This book is an attempt to bring the knowledge and experience of many people together. The size of the book could have been increased to include more detail on other aspects of the subject but this might easily have diminished its value as a convenient reference to as wide a readership as possible both professional and non professional The contents deal essentially with the needs of the severely mentally handicapped and should have an application in most parts of the world Much of the information and advice on services and on treatment and management is based on the experience of specialists working in the United Kingdom this now being standard practice in most parts of the world The Implications of Cost-effectiveness Analysis of Medical Technology, 1980 Implications of Cost-effectiveness Analysis of Medical Technology: Background Paper #2 United States. Congress. Office of Technology Assessment, 1981 Parent-Baby Attachment in Premature Infants (Psychology Revivals) John A. Davis, Martin Richards, N. R. C. Roberton, 2014-10-10 Originally published in 1983 in the two decades prior to publication specialised neonatal units for the treatment of sick or preterm babies had been set up in most major neonatal centres In the early years these units did little to prevent separation of parents and babies and evidence accumulated of the ill effects of this situation In addition we had gradually become aware of the difficulties of building a relationship with a sick or immature baby even under more ideal circumstances This book in a series of authoritative review chapters sets out to describe the process by which social relationships develop after birth and the ways in which this process may be distorted by separation the condition of the baby or by the process of medical treatment Experienced practitioners describe practical steps which may be taken to support parents and foster their relationship with their babies in treatment situations. The final section of the book examines the organisation of neonatal care in a number of widely different settings and indicates that diverse approaches may be successful in achieving the same ends **DHHS Publication No. (NIH).**, 1985 Special Care Fred M. Frohock, 1986 Special Care explores the moral and legal issues in neonatal intensive care It is an urgently needed entry in the current discussions of treatment for badly damaged babies Antenatal Diagnosis, 1979 Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 2000 United States. Congress. House. Committee on Appropriations. Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, 1999 **Perinatal Events and Brain Damage in Surviving Children** Fred Kubli, Naren Patel, W. Schmidt, O. Linderkamp, 2012-12-06 Decision making in modem obstetrics and perinatology is controlled by a variety of different factors

but there is little doubt that in industrialized countries one of the most powerful single factors is the concern and fear of causing permanent brain damage in the unborn and newborn The dramatic increase in the rates of abdom inal deliveries in many parts of the world is certainly rooted to a substantial part in the bstetrician's concern not so much about possible perinatal death but more so about permanent brain dam age in surviving children This trend has been accelerated by the increasing number of litigations in connection with brain damage observed in many societies. This problem itself has many aspects but it seems evident that litigation justified or unjustified is one modem expression of the human and social tragedy inflicted on individuals and families by the birth of a brain damaged child The medical social and human importance of the problem is in sharp contrast to the relative lack of scientific knowledge avail able This became very clear when the National Institutes of Health published the excellent review in 1985 on Prenatal and Perinatal Factors Associated with Brain Disorders and its editor J M Cumulated Index Medicus ,1979 Fetal Growth Retardation Asim Kurjak, J.M. Beazley, 2020-08-11 In this unique book emphasis is placed on tests necessary to evaluate fetal well being and to detect those fetuses at risk of hypoxia and acidosis in utero Written by pioneers in the neonatal field this publication contains chapters on the pathophysiology obstetric management and collagen diseases of intrauterine growth retardation Ultrasound in detection of growth retarded fetuses is explored as well as magnetic resonance imaging and magnesium substitution for the prevention of intrauterine growth retardation Containing never before published information this volume is an excellent reference source for both investigators in the field and those entering it Topics Include Perinatal growth chart for international reference Ultrasound guided procedures in small for gestation fetuses Utero placental and fetal circulation **Disabled Children** and Developing Countries Pam Zinkin, Helen McConachie, 1995-01-17 A critical evaluation of approaches to helping disabled children in developed and developing countries Early Intervention United States. General Accounting Office, 1992 Develops a framework to estimate potential savings in providing early intervention services to children Using a case study it estimates the savings to Medicaid and other federal programs from providing WIC services to pregnant women in 1990 Contains recommendations to the Congress and the Secretaries of Agriculture Education and Health and Human American Journal of Mental Deficiency, 1986 Includes the association's conference proceedings and addresses Services
