Furman,2024-05-31 A methodology for using philosophy to guide teaching preparation and practice Transforming Schools D. G. Mulcahy,2013-05-01 President Obama has on a number of occasions rejected policies that have been tried and do not work Legislation such as No Child Left Behind and policies such as Race to the Top are neither effective nor based on sound research Educational policy making is now more than ever the preserve of politicians advocacy foundations and lobbyists parading as corporate leaders Teachers have little voice their role is merely to be held responsible for policies foisted upon them In Transforming Schools Alternative Perspectives on School Reform our aim is to provide alternative perspectives to the dead end educational policies by which our governments have become consumed We turn the spotlight on a select range of topics that have become the focus of concern and we consider the implications for school improvement These topics include school reform in general the achievement gap literacy standardized assessment social justice and ecojustice aesthetic and moral education and general education **Composing and Comprehending** ,1987 *Byzantium - Rus - Russia* Simon Franklin,2024-10-28 The Christian culture of Rus the medieval precursor of modern Russia Ukraine and Belarus is sometimes presented either as a reflection of an indigenous spirituality wrapped in borrowed Byzantine forms or by contrast as merely a provincial version of its Byzantine original The essays in this volume start from the premise that neither view is adequate The history of culture even of a self consciously imitative culture involves a continual process of inevitable mistranslation as the imported models are reshaped and reinterpreted according to local resources circumstances

and preconceptions These essays explore aspects of the translation of culture on several levels from the semantic processes of the actual translation of written texts from Greek into Slavonic through to larger issues of ideology and identity They consider both the initial stages of such translation from Byzantium to Rus and some of the subsequent retranslations of the Byzantine heritage in the culture of Rus and eventually of Russia **Computer Games and Technical Communication** Jennifer deWinter,Ryan M. Moeller,2016-05-23 Taking as its point of departure the fundamental observation that games are both technical and symbolic this collection investigates the multiple intersections between the study of computer games and the discipline of technical and professional writing Divided into five parts Computer Games and Technical Communication engages with questions related to workplace communities and gamic simulations industry documentation manuals gameplay and ethics training testing and number crunching and the work of games and gamifying work In that computer games rely on a complex combination of written verbal visual algorithmic audio and kinesthetic means to convey information technical and professional writing scholars are uniquely poised to investigate the intersection between the technical and symbolic aspects of the computer game complex The contributors to this volume bring to bear the analytic tools of the field to interpret the roles of communication production and consumption in this increasingly ubiquitous technical and symbolic medium
