Making City Planning Work:

Making City Planning Work Allan B. Jacobs, 1978 **Making Equity Planning Work** Norman Krumholz, John Forester, 1990-05-18 From 1969 to 1979 Cleveland's city planning staff under Norman Krumholz's leadership conducted a unique experiment in equity oriented planning Fighting to defend the public welfare while also assisting the city's poorest citizens these planners combined professional competence and political judgment to bring pressing urban issues to the public's attention Although frequently embroiled in controversy while serving three different mayors the Cleveland planners not only survived but accomplished impressive equity objectives In this book Norman Krumholz and John Forester provide the first detailed personal account of a sustained and effective equity planning practice that influenced urban policy Krumholz describes the pragmatic equity planning agenda that his staff pursued during the mayoral administrations of Carl B Stokes Ralph J Perk and Dennis J Kucinich He presents case studies illuminated with rich personal experience of the Euclid Beach development the Clark Freeway and the tax delinquency and land banking project that resulted in a change in the State of Ohio's property law among others In the second part of the book John Forester explores the implications of this experience and the lessons that can be drawn for planning public management and administrative practice more generally *Making Equity Planning Work* Norman Krumholz, 2011-02-07 Lessons from an experiment in equity planning **The Oxford Handbook of Urban Planning** Randall Crane, Rachel Weber, 2015 Why plan How and what do we plan Who plans for whom These three questions are then applied across three major topics in planning States Markets and the Provision of Social Goods The Methods and Substance of Planning and Agency Implementation and Decision Making *Designing San Francisco* Alison Isenberg, 2024-09-24 A major urban history of the design and development of postwar San Francisco *Designing San Francisco* is the untold story of the formative postwar decades when U S cities took their modern shape amid clashing visions of the future In this pathbreaking and richly illustrated book Alison Isenberg shifts the focus from architects and city planners those most often hailed in histories of urban development and design to the unsung artists activists and others who played pivotal roles in rebuilding San Francisco between the 1940s and the 1970s Previous accounts of midcentury urban renewal have focused on the opposing terms set down by Robert Moses and Jane Jacobs put simply development versus preservation and have followed New York City models Now Isenberg turns our attention west to colorful pioneering and contentious San Francisco where unexpectedly fierce battles were waged over iconic private and public projects like Ghirardelli Square Golden Gateway and the Transamerica Pyramid When large scale redevelopment came to low rise San Francisco in the 1950s the resulting rivalries and conflicts sparked the proliferation of numerous allied arts fields and their professionals including architectural model makers real estate publicists graphic designers photographers property managers builders sculptors public interest lawyers alternative press writers and preservationists Isenberg explores how these centrally engaged arts professionals brought new ideas to city regional and national planning and shaped novel

projects across urban suburban and rural borders San Francisco's rebuilding galvanized far reaching critiques of the inequitable competition for scarce urban land and propelled debates over responsible public land stewardship Isenberg challenges many truisms of this renewal era especially the presumed male domination of postwar urban design showing how women collaborated in city building long before feminism's impact in the 1970s An evocative portrait of one of the world's great cities Designing San Francisco provides a new paradigm for understanding past and present struggles to define the urban future

Healthy City Planning Jason Corburn, 2013-04-12 Healthy city planning means seeking ways to eliminate the deep and persistent inequities that plague cities Yet as Jason Corburn argues in this book neither city planning nor public health is currently organized to ensure that today's cities will be equitable and healthy Having made the case for what he calls adaptive urban health justice in the opening chapter Corburn briefly reviews the key events actors ideologies institutions and policies that shaped and reshaped the urban public health and planning from the nineteenth century to the present day He

uses two frames to organize this historical review the view of the city as a field site and as a laboratory In the second part of the book Corburn uses in depth case studies of health and planning activities in Rio de Janeiro Nairobi and Richmond California to explore the institutions policies and practices that constitute healthy city planning These case studies personify some of the characteristics of his ideal of adaptive urban health justice Each begins with an historical review of the place its policies and social movements around urban development and public health and each is an example of the urban poor participating in shaping and being impacted by healthy city planning

The Politics of Downtown Development Stephen J. McGovern, 2014-10-17 American cities experienced an extraordinary surge in downtown development during the 1970s and 1980s Pro growth advocates in urban government and the business community believed that the construction of office buildings hotels convention centers and sports complexes would generate jobs and tax revenue while revitalizing stagnant local economies But neighborhood groups soon became disgruntled with the unanticipated costs and unfulfilled promises of rapid expansion and grassroots opposition erupted in cities throughout the United States Through an insightful comparison of effective protest in San Francisco and ineffective protest in Washington D C Stephen McGovern examines how citizens even those lacking financial resources have sought to control their own urban environments McGovern interviews nearly one hundred business activists government officials and business leaders exploring the influence of political culture and individual citizens perceptions of a particular development issue McGovern offers a compelling explanation of why some battles against city hall succeed while so many others fail

City for Sale Chester Hartman, 2002-10-01 San Francisco is perhaps the most exhilarating of all American cities its beauty cultural and political avant gardism and history are legendary while its idiosyncrasies make front page news In this revised edition of his highly regarded study of San Francisco s economic and political development since the mid 1950s Chester Hartman gives a detailed account of how the city has been transformed by the expansion outward and upward of its downtown His story is fueled by a wide range of players and an astonishing array of events from police storming the International Hotel to citizens forcing the midair termination of a freeway Throughout Hartman raises a troubling question can San Francisco s unique qualities survive the changes that have altered the city s skyline neighborhoods and economy Hartman was directly involved in many of the events he chronicles and thus had access to sources that might otherwise have been unavailable A former activist with the National Housing Law Project San Franciscans for Affordable Housing and other neighborhood organizations he explains how corporate San Francisco obtained the necessary cooperation of city and federal governments in undertaking massive redevelopment He illustrates the rationale that produced BART a subway system that serves upper income suburbs but few of the city s poor neighborhoods and cites the environmental effects of unrestrained highrise development such as powerful wind tunnels and lack of sunshine In describing the struggle to keep housing affordable in San Francisco and the seemingly intractable problem of homelessness Hartman reveals the human face of the city s economic transformation

Dollars from Design S. Jerome Pratter, 1983 Urban Public Policy Martin V. Melosi, 2010-11 The 1992 Los Angeles riots catapulted the problems of the city back onto the policy agenda The cauldron of social problems of the city as the riots showed offers no simple solutions Indeed urban policy includes a range of policy issues involving welfare housing job training education drug control and the environment The myriad of local state and federal agencies only further

complicates formulating and implementing coherent policies for the city This volume while not offering specific proposals to remedy the problems of the city provides a broad historical context for discussing contemporary urban policy and for arriving at new prescriptions for relieving the ills of the American city The essays address issues related to public housing poverty transportation and the environment In doing so the authors discuss larger themes in urban policy as well as provide case studies of how policies have been implemented over time in specific cities Of particular interest are two essays that discuss the role of the historian in shaping urban policy and the importance of historical preservation in urban planning *The Making of Urban Japan* André Sorensen,2005-08-19 During the twentieth century Japan was transformed from a poor primarily rural country into one of the world s largest industrial powers and most highly urbanised countries Interestingly while Japanese governments and planners borrowed carefully from the planning ideas and methods of many other countries Japanese urban planning urban governance and cities developed very differently from those of other developed countries Japan s distinctive patterns of urbanisation are partly a product of the highly developed urban system urban traditions and material culture of the pre modern period which remained influential until well after the Pacific War A second key influence has been the dominance of central government in urban affairs and its consistent prioritisation of economic growth over the public welfare or urban quality of life Andr Sorensen examines Japan s urban trajectory from the mid nineteenth century to the present paying particular attention to the weak development of Japanese civil society local governments and land development and planning regulations *Planning Matter* Robert A. Beauregard,2015-11-03 City and regional planners talk constantly about the things of the world from highway interchanges and retention ponds to zoning documents and conference rooms yet most seem to have a poor understanding of the materiality of the world in which they re immersed Too often planners treat built forms weather patterns plants animals or regulatory technologies as passively awaiting commands rather than actively involved in the workings of cities and regions In the ambitious and provocative *Planning Matter* Robert A Beauregard sets out to offer a new materialist perspective on planning practice that reveals the many ways in which the nonhuman things of the world mediate what planners say and do Drawing on actor network theory and science and technology studies Beauregard lays out a framework that acknowledges the inevitable insufficiency of our representations of reality while also engaging more holistically with the world in all of its diversity including human and nonhuman actors alike *New International Yearbook* ,1911 *The New International Year Book* ,1921 *What We See* Stephen A. Goldsmith,Lynne Elizabeth,2010-05-01 Leading thinkers offer fresh insight into the workings of vibrant ecological equitable communities and their economies
