Making England Landscape Of Staffordshire:

British and Irish Archaeology, 1994 British Archaeological Abstracts, 1977 *The Shaping of a Community* Beat A. Kümin, 2016-12-05 This book offers a new perspective to the current debate about popular religious attitudes in Tudor England laying particular emphasis on the social and secular dimensions of parish life The argument focuses on the role of the laity and especially on the office of churchwarden It assesses the rising levels of parish income the importance of the social context for fund raising strategies and the growing expenditure on priests voluntary activities and administrative duties The final part discusses the Reformation related reduction in religious options and the intensifying trend towards oligarchical parish regimes and official local government responsibilities Wherever possible the English situation is put into sharper focus by comparisons with local ecclesiastical life on the Continent and appendices provide a detailed financial analysis for a large number of parishes The Northern Danelaw D.M. Hadley, 2001-01-01 Investigating the changing nature of lordship and peasant statuses the transformation of estate structures the emergence of villages and the development of the parish system D M Hadley also explains the peculiarities of the northern Danelaw and reassesses the impact of the Scandinavian settlements on its society and culture A detailed local study is combined with a consideration of wider issues concerning Anglo Saxon England and long and short term changes unrelated to successive conquests **Parks in Medieval England** S.A. Miles, 2009-07-16 Parks were prominent and indeed controversial features of the medieval countryside but they have been unevenly studied and remain only partly understood Stephen Miles provides the first full length study of the subject examining parks across the country and throughout the Middle Ages in their full social economic jurisdictional and landscape context The first half of the book investigates the purpose of these royal and aristocratic reserves which have been variously claimed as hunting grounds economic assets landscape settings for residences and status symbols An emphasis on the aristocratic passion for the chase as the key motivation for park making provides an important challenge to more recent views and allows for a deeper appreciation of the connection between park making and the expression of power and lordship The second part of the book examines the impact of park creation on wider society from the king and aristocracy to peasants and townsmen Instead of the traditional emphasis on the importance of royal regulation greater attention is paid to the effects of lordly park making on other members of the landed elite and ordinary people These widespread enclosures interfered with customary uses of woodland and waste hunting practices roads and farming not surprisingly they could become a focus for aristocratic feud popular protest and furtive resistance Combining historical archaeological and landscape evidence this ground breaking study provides fresh insight into contemporary values and how they helped to shape the medieval landscape **Education, Literacy and Society, 1830-70** W. B. Stephens, 1987 **In Search of England** Michael Wood, 2001 In a rich unfolding of history and legend the author of *Conquistadors* explores the character and origins of the Anglo Saxon world a culture that has had a significant impact worldwide 30 illustrations 16 in

An Environmental History of Wildlife in England 1650 - 1950 Tom Williamson, 2013-12-05 Choice Outstanding Academic Title 2014 While few detailed surveys of fauna or flora exist in England from the period before the nineteenth century it is possible to combine the evidence of historical sources ranging from game books diaries churchwardens accounts and even folk songs and our wider knowledge of past land use and landscape with contemporary analyses made by modern natural scientists in order to model the situation at various times and places in the more remote past This timely volume encompasses both rural and urban environments from 1650 to the mid twentieth century drawing on a wide variety of social historical and ecological sources It examines the impact of social and economic organisation on the English landscape biodiversity the agricultural revolution landed estates

the coming of large scale industry and the growth of towns and suburbs It also develops an original perspective on the complexity and ambiguity of man animal relationships in this post medieval period Lordship and Locality in the Long Twelfth Century Hannah Boston,2024 A new perspective on lordship in England between the Norman Conquest and Magna Carta Multiple lordship that is holding land or owing allegiance to more than one lord simultaneously was long regarded under the western European feudal model as a potentially dangerous aberration and a sign of decline in the structure of lordship Through an analysis of the minor lords of Leicestershire Derbyshire and Staffordshire during the long twelfth century this study demonstrates conversely that multiple lordship was at least as common as single lordship in this period and regarded as a normal practice and explores how these minor lords used the flexibility of lordship structures to construct localised centres of authority in the landscape and become important actors in their own right Lordship was moreover only one of several forces which minor lords had to navigate Regional society in this period was profoundly shaped by overlapping ties of lordship kinship and locality each of which could have a fundamental impact on relationships and behaviour These issues are studied within and across lords honours around religious houses and urban areas and in a close case study of the abbey of Burton upon Trent This book thus contextualises lordship within a wider landscape of power and influence *The Oxford Handbook of Anglo-Saxon Archaeology* Helena Hamerow,David A. Hinton,Sally Crawford,2011-03-31 Written by a team of experts and presenting the results of the most up to date research The Handbook of Anglo Saxon Archaeology will both stimulate and support further investigation into a society poised at the interface between prehistory and history

Landscapes and Landforms of England and Wales Andrew Goudie, Piotr Migoń, 2020-05-10 This book presents the geomorphological diversity of England and Wales These regions are characterised by an extraordinary range of landforms and landscapes reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years including ice sheet expansion and decay The book begins by providing the geological and geomorphological context needed in order to

understand this diversity in a relatively small area. In turn it presents nearly thirty case studies on specific landscapes and landforms all of which are landmarks in the territory discussed. These include the famous coastal cliffs and landslides, granite tors of Dartmoor, formerly glaciated mountains of Snowdonia and the Lake District, karst of Yorkshire and many others. The geomorphology of London and the Thames is also included. Providing a unique reference guide to the geomorphology of England and Wales, the book is lavishly illustrated with diagrams, colour maps and photos and written in an easy to read style. The contributing authors are distinguished geomorphologists with extensive experience in research, writing and communicating science to the public.
