Making Mans Environment Leisure :

Designing for Play Barbara Hendrickson, 2018-12-13 This title was first published in 2001 Architects landscape designers builders gardeners and teachers have all at some time been called upon to design a play area Unfortunately this diversity has not resulted in a similar diversity of design solutions for this very problematic task Despite a proliferation of how to books on this subject playgrounds have remained virtually the same throughout the world since their creation over a century ago This is not a how to design book Instead based on thirty years experience as a specialist play area designer Barbara Hendricks details a radically new approach applying cutting edge thinking from child development and child psychology to find innovative design solutions challenging the established notions of play provision Covering key sociological public policy environmental and design issues this book provides designers with an exploration of and guide to designing from a child's eye view of the world Beautifully crafted and copiously illustrated with numerous examples of recently designed playgrounds this book is not only stimulating and informative but fun to read and seriously playful in itself

Designing for Play Ms Barbara E Hendricks, 2013-06-28 10 years ago Barbara Hendricks brought together thinking from child development and child psychology perspectives on play with practical issues confronted by designers and policy makers The result was a beautifully crafted well illustrated guide challenging established notions of play provision This second edition brings the text up to date from 2001 to 2010 with added discussion about new ideas for play area designs and what has not worked in the past decade

Resolving Environmental Disputes Roger Sidaway, 2013 Resolving Environmental Disputes presents detailed case studies from the key contemporary themes in resource management and environmental protection such as access to the countryside for recreation sustainable forestry pollution and risks to health and coastal zone management The book spans both theory and practice in assessing the relationship between public participation and mediation It is structured around detailed case studies from Britain the USA and the Netherlands which are interspersed with chapters providing explanation and interpretation of the theoretical and practical issues involved In reviewing the state of environmental conflict resolution the author examines how and why conflicts occur and whether approaches to conflict resolution based on consensus building could be more widely applied
