that the historical conflict between rhetoric and dialectic can be overcome in ways useful to both composition theory and the composition classroom Historically dialectic has taken two forms in relation to rhetoric First it has been the logical development of linear propositions leading to necessary conclusions a one dimensional form that was the counterpart of rhetorics in which philosophical metaphysical and scientific truths were conveyed with as little cognitive interference from language as possible Second dialectic has been the topical development of opposed arguments on controversial issues and the judgment of their relative strengths and weaknesses usually in political and legal contexts a two dimensional form that was the counterpart of rhetorics in which verbal battles over competing probabilities in public institutions revealed distinct winners and losers The discipline of writing studies is on the brink of developing a new relationship between dialectic and rhetoric one in which dialectics and rhetorics mediate and negotiate different arguments and orientations that are engaged in any rhetorical situation This new relationship consists of a three dimensional hybrid art called dialectical rhetoric whose method is based on five topoi deconstruction dialogue identification critique and juxtaposition Three dimensional dialectical

rhetorics function effectively in a wide variety of discursive contexts including digital environments since they can invoke contrasts in stagnant contexts and promote associations in chaotic contexts Dialectical Rhetoric focuses more attention on three dimensional rhetorics from the rhetoric and composition community **Concepts in Composition** Irene L.

Securing a Place for Reading in Composition Ellen C. Carillo,2015-01-15 Securing a Place for Reading in Composition addresses the dissonance between the need to prepare students to read not just write complex texts and the lack of recent scholarship on reading writing connections Author Ellen C Carillo argues that including attention to reading practices is crucial for developing more comprehensive literacy pedagogies Students who can read actively and reflectively will be able to work successfully with the range of complex texts they will encounter throughout their post secondary academic careers and beyond Considering the role of reading within composition from both historical and contemporary perspectives Carillo makes recommendations for the productive integration of reading instruction into first year writing courses She details a mindful reading framework wherein instructors help students cultivate a repertoire of approaches upon which they consistently reflect as they apply them to various texts This metacognitive frame allows students to become knowledgeable and deliberate about how they read and gives them the opportunity to develop the skills useful for moving among reading approaches in mindful ways thus preparing them to actively and productively read in courses and contexts

outside first year composition Securing a Place for Reading in Composition also explores how the field of composition might begin to effectively address reading including conducting research on reading revising outcome statements and revisiting the core courses in graduate programs It will be of great interest to writing program administrators and other compositionists and their graduate students *Bringing the Outside in* Sara B. Kajder, 2006 The reading that we value in school is becoming further and further distanced from the literacy students experience in their outside lives Inside the classroom we ask our students to immerse themselves in print texts and write purposefully Once out the door they are text messaging blogging engaging in online multi player games and expertly integrating words images and music to create original texts Can we import these textual spaces and literacies into English class to help re connect students who don't see themselves as readers and writers English educator Sara Kajder's answer is an emphatic yes and in *Bringing the Outside In* she demonstrates myriad ways to employ students outside talents in the classroom Drawing on multiple examples of student work she shows how she adapts the curriculum to incorporate an expanded definition of literacy and literacy tools Sara offers teachers guidance on how to extend their repertoire of teaching strategies and help kids connect their natural curiosity and skills as readers and writers of both print and electronic texts while keeping reading and writing at the center of the curriculum Keying in on the visual aspects of literacy and building upon students growing interest in using words and images from their lives to read and write for authentic reasons and authentic audiences integrating such strategies as digital storytelling visual think alouds visual literature circles and others into English class Sara and her kids redefine what it means to be literate in today's world By adding visual components to class activities and projects integrating tools ranging from pencils and paper to weblogs and wikis even reluctant students can become engaged and see themselves as readers and writers for the first time
