governance as a primarily agency driven rather than structure induced phenomenon He addresses the issue of causes and mechanisms of bad governance in Russia and beyond from a different scholarly optics which is based on a more general rationale of state building political regime dynamics and policy making He argues that although these days bad governance is almost universally perceived as an anomaly at least in developed countries in fact human history is largely a history of ineffective and corrupt governments while the rule of law and decent state regulatory quality are relatively recent matters of modern history when they emerged as side effects of state building Indeed the picture is quite the opposite bad governance is the norm while good governance is an exception The problem is that most rulers especially if their time horizons are short and the external constraints on their behavior are not especially binding tend to govern their domains in a predatory way because of the prevalence of short term over long term incentives Contemporary Russia may be considered as a prime example of this phenomenon Using an analysis of case studies of political and policy changes in Russia after the Soviet collapse Gel man discusses the logic of building and maintaining the politico economic order of bad governance in Russia and paths of its possible transformation in a theoretical and comparative perspective **Imperial Russia** J.
