A. Smith, 2014-01-09 The impact of Communism on the twentieth century was massive equal to that of the two world wars Until the fall of the Soviet Union in 1991 historians knew relatively little about the secretive world of communist states and parties Since then the opening of state party and diplomatic archives of the former Eastern Bloc has released a flood of new documentation The thirty five essays in this Handbook written by an international team of scholars draw on this new material to offer a global history of communism in the twentieth century In contrast to many histories that concentrate on the Soviet Union The Oxford Handbook of the History of Communism is genuinely global in its coverage paying particular attention to the Chinese Revolution It is global too in the sense that the essays seek to integrate history from above and from below to trace the complex mediations between state and society and to explore the social and cultural as well as the political and economic realities that shaped the lives of citizens fated to live under communist rule The essays reflect on the similarities and differences between communist states in order to situate them in their socio political and cultural contexts and to capture their changing nature over time Where appropriate they also reflect on how the fortunes of international communism were shaped by the wider economic political and cultural forces of the capitalist world The Handbook provides an informative introduction for those new to the field and a comprehensive overview of the current state of scholarship for those seeking to deepen their understanding *The SAGE Handbook of Contemporary China* Weiping Wu, Mark Frazier, 2018-07-09 The study of contemporary China constitutes a fascinating yet challenging area of scholarly inquiry Recent decades have brought dramatic changes to China's economy society and governance Analyzing such changes in the context of multiple disciplinary perspectives offers opportunities as well as challenges for scholars in the field known as contemporary China Studies The SAGE Handbook of Contemporary China is a two volume exploration of the transformations

China's Social Insurance in the Twentieth Century Aiqun Hu,2015-10-27 In China s Social Insurance in the Twentieth Century Aiqun Hu develops a framework of interactive diffusion of global models in examining the history of China s social insurance since the 1910s The book covers both Nationalist and Communist controlled areas 1927 1949 and Taiwan 1949 present surpassing the party divide It argues that China s progression in social insurance resulted from diffusion of two global models German capitalist and Soviet socialist social insurance until the early 1990s Thereafter China s social insurance reforms were increasingly directed by the World Bank s neoliberal models which also influenced Taiwan s pension reforms During the entire process however global forces provided the basic intellectual framework while national forces determined the timing and specifics of adopting the models

The Chinese Typewriter Thomas S. Mullaney,2018-10-09 How Chinese characters triumphed over the QWERTY keyboard and laid the foundation for China s information technology successes today Chinese writing is character based the one major world script that is neither alphabetic nor syllabic Through the years the Chinese written language encountered presumed alphabetic universalism in the form of Morse Code Braille stenography Linotype punch cards word processing and other systems developed with the Latin alphabet in mind This book is about those encounters in particular thousands of Chinese characters versus the typewriter and its QWERTY keyboard Thomas Mullaney describes a fascinating series of experiments prototypes failures and successes in the century long quest for a workable Chinese typewriter The earliest Chinese typewriters Mullaney tells us were figments of popular imagination sensational accounts of twelve foot keyboards with 5 000 keys One of the first Chinese typewriters actually constructed was invented by a Christian missionary who organized characters by common usage but promoted the less common characters for Jesus to the common usage level Later came typewriters manufactured for use in Chinese offices and typewriting schools that turned out trained typewriter girls and typewriter boys Still later was the Double Pigeon typewriter produced by the Shanghai Calculator and Typewriter Factory the typewriter of choice under Mao Clerks and secretaries in this era experimented with alternative ways of organizing characters on their tray beds inventing an input method that was the first instance of predictive text Today after more than a century of resistance against the alphabetic not only have Chinese characters prevailed they form the linguistic substrate of the vibrant world of Chinese information technology The Chinese Typewriter not just an object history but grappling with broad questions of technological change and global communication shows how this happened A Study of the Weatherhead East Asian Institute Columbia University

Self-Reflections of Fears and Dreams Ray T. Hartman, 2023-04-15 While the years between 1927 and 1953 in China were a time of war revolution and social disintegration they were also a time for building political legitimacy In this groundbreaking work Ray Hartman painstakingly details how Chinese Communist Party CCP leaders perceived political legitimacy during the party's formative years He argues that Chinese Communist leaders' conception of legitimacy was the main force driving the party's policies and military strategy during this time Although legitimacy often comes up in discussions pertaining to the CCP's performance regarding the party's policies whether they be social economic or military this work is the first to demonstrate how top CCP leaders themselves understood the concept Providing extensive documentation from party directives and speeches including recently available sources as well as memoirs written by party members and military leaders the author reveals a CCP consumed with the notion of its own legitimacy in hopes of not only attaining power but saving the Chinese state from destructive internal and external forces

Trade and Technology Networks in the Chinese Textile Industry Carles Brasó Broggi, 2016-04-29 The aim of this book is to track the historical origins of China's economic reforms From the 1920s and 1930s strong ties were built between Chinese textile industrialists and foreign machinery importers in Shanghai and the Yangzi Delta Despite the fragmentation of China the contribution of these networks to the modernization of the country was important and longstanding Facing the challenge of growing in a fragmented country Chinese textile firms such as Dafeng Dacheng and Lixin focused on urban markets and also on importing technology for upgrading their production When the war against Japan blocked trade routes inside China these networks were concentrated in Shanghai where they envisaged an export oriented development strategy for China that was based on importing machinery and exporting manufactured products However this strategy was only implemented precariously in Shanghai while the city stood as a neutral space in the first years of the Japanese occupation but was only consolidated in Hong Kong in the late 1940s where textile industrialist and most of the foreign importers migrated These networks were thus reestablished in Hong Kong where they contributed to the city's industrialization in the Cold War period Meanwhile the Chinese industrialists that stayed in Shanghai and the Yangzi Delta had to adapt to the Maoist regime and were progressively incorporated into the

state owned companies or the local government agencies such as the United Front or the Textile bureaus However from the early 1970s the links between Hong Kong and Shanghai were reactivated and these networks played again a key role in the modernization of China especially regarding the imports of technology and exports of manufactured goods The book ends with the first joint ventures between Hong Kong businessmen and Chinese local administrations that took place in the beginnings of China s economic reforms in 1979
