Making Of The Modern World:

The Making of the Modern World Christopher Condon, 1987 **The Origins of the Modern World** Robert B. Marks, Robert Marks, 2007 The Origins of the Modern World offers a refreshing alternative to Eurocentric histories by exploring the roles that Asia Africa and the New World played in creating the world we know today Starting in 1400 it brings the saga of the modern world to the present considering how and why the United States emerged as a world power in the 20th century and why Asia is experiencing resurgence now **Remaking the Modern World 1900 - 2015** C. A. Bayly, 2018-10-22 The sequel and companion volume to C A Bayly s ground breaking The Birth of the Modern World 1780 1914 this wide ranging and sophisticated study explores global history since the First World War offering a coherent comparative overview of developments in politics economics and society at large Written by one of the leading historians of his generation an early intellectual leader in the study of World History Weaves a clear narrative history that explores the themes of politics economics social cultural and intellectual life throughout the long twentieth century Identifies the themes of state capital and communication as key drivers of change on a global scale in the last century and explores the impact of those ideas Interrogates whether warfare was really the pre eminent driving force of twentieth century history and what other ideas shaped the course of history in this period Explores the causes behind the resurgence of local conflict rather than global scale conflict in the years since the turn of the millennium Delves into the narrative of inequality a story that has shaped and been shaped by the events of the last hundred years Part of The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world It will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time The volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production **Day of Empire** Amy Chua, 2009-01-06 In this sweeping history bestselling author Amy Chua explains how globally dominant empires or hyperpowers rise and why they fall In a series of brilliant chapter length studies she examines the most powerful cultures in history from the ancient empires of Persia and China to the recent global empires of England and the United States and reveals the reasons behind their success as well as the roots of their ultimate demise Chua s analysis uncovers a fascinating historical pattern while policies of tolerance and assimilation toward conquered peoples are essential for an empire to succeed the multicultural society that results introduces new tensions and instabilities threatening to pull the empire apart from within What this means for the United States uncertain future is the subject of Chua s provocative and surprising conclusion *The Cold War and the Making of*

Genghis Khan and the Making of the Modern World Jack Weatherford, 2005-03-22 NEW YORK TIMES BESTSELLER The startling true history of how one extraordinary man from a remote corner of the world created an empire that led the world into the modern age by the author featured in *Echoes of the Empire Beyond Genghis Khan* The Mongol army led by Genghis Khan subjugated more lands and people in twenty five years than the Romans did in four hundred In nearly every country the Mongols conquered they brought an unprecedented rise in cultural communication expanded trade and a blossoming of civilization Vastly more progressive than his European or Asian counterparts Genghis Khan abolished torture granted universal religious freedom and smashed feudal systems of aristocratic privilege From the story of his rise through the tribal culture to the explosion of civilization that the Mongol Empire unleashed this brilliant work of revisionist history is nothing less than the epic story of how the modern world was made

The Making of the Modern World. From the Renaissance to the Present. Second Edition - Enlarged. [With Illustrations.] Richard Munthe BRACE, 1961

How the Scots Invented the Modern World Arthur Herman, 2002-09-24 An exciting account of the origins of the modern world Who formed the first literate society Who invented our modern ideas of democracy and free market capitalism The Scots As historian and author Arthur Herman reveals in the eighteenth and nineteenth centuries Scotland made crucial contributions to science philosophy literature education medicine commerce and politics contributions that have formed and nurtured the modern West ever since Herman has charted a fascinating journey across the centuries of Scottish history Here is the untold story of how John Knox and the Church of Scotland laid the foundation for our modern idea of democracy how the Scottish Enlightenment helped to inspire both the American Revolution and the U S Constitution and how thousands of Scottish immigrants left their homes to create the American frontier the Australian outback and the British Empire in India and Hong Kong How the Scots Invented the Modern World reveals how Scottish genius for creating the basic ideas and institutions of modern life stamped the lives of a series of remarkable historical figures from James Watt and Adam Smith to Andrew Carnegie and Arthur Conan Doyle and how Scottish heroes continue to inspire our contemporary culture from William Braveheart Wallace to James Bond And no one who takes this incredible historical trek will ever view the Scots or the modern West in the same way again

The Origins of the Modern World Robert B. Marks, 2024-01-02 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the

environmental constraints of the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world Now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century and why the changed relationship of humans to the environment likely will be the hallmark of the modern era the Anthropocene Once again arguing that the US rise to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years

The Making of the Modern World A. Macfarlane, 2001-12-17 At the start of the third Christian millennium we are aware of massive political economic and ideological changes which condition the chances of liberty wealth and equality Yet it is surprisingly difficult for us to understand these forces for we cannot see what surrounds us so closely This book analyses our condition by looking at the work of two great thinkers one of whom provides a deep historical perspective the other a wide comparative analysis F W Maitland 1850 1906 was more than the greatest professional historian of modern times he was a philosopher who provides a brilliant sketch of how our strange world has come about particularly in his work on associations and trusts Yukichi Fukuzawa 1835 1901 more than any other created the institutions of modern Japan As an outsider he provides a brilliant insight into the heart of the new capitalist and industrial civilization which had emerged in the west

The Origins of the Modern World Robert Marks, 2007 Robert B The Making of the Modern World, from the Renaissance to the Present Richard Munthe Brace, 1960 **Hunger** James Vernon, 2007-11-30 This book draws together social cultural and political history to show us how we came to have a moral political and social responsibility toward the hungry Vernon forcefully reminds us how many perished from hunger in the empire and reveals how their history was intricately connected with the precarious achievements of Britain s welfare state

Troubled Identity and the Modern World L. Donskis, 2009-05-25 The book maps what Leonidas Donskis terms the troubled identity that is the identity that constantly needs assurance and confirmation Through an identity building and shifting process argues Donskis we can move from political majority to cultural minority or the other way around **The Cauldron of Ethnicity in the Modern World** Manning Nash, 1989 The melting pot metaphor conveys an image of individuals from varied origins blending imperceptibly together But when such ingredients as inequality nationalism or perceived injustice are added to the mix the melting pot can become a seething cauldron Manning Nash s examination of

ethnicity in the postcolonial world offers insights into the ways that ethnic tensions are engendered and sustained Ethnicity Nash suggests is formed by historical processes based on preexisting elements of society and culture Notions of ethnicity have at their core the recursive metaphor of blood bed and cult body substance kinship and religious belief When individuals who perceive themselves bound by these ties are threatened in some way ethnicity becomes a unifying call to action Nash identifies a number of concepts political self rule economic opportunity cultural identity religious freedom that have been rallying cries for ethnic struggles in the twentieth century He offers a novel analysis of the ways that ethnic groups identify themselves and maintain boundaries and he assesses the circumstances under which ethnicity may be relevant or nearly irrelevant to political economic and cultural dynamics Nash presents three case studies that highlight the multifaceted nature of ethnicity and that each demonstrate a particular mode of comparative method He compares a situation of conquest Ladino and Maya in Mexico and Guatemala a new excolonial nation with nearly equally sized groups Chinese and Malays in Malaysia and a small immigrant group in a large nation Jews in the United States pointing out the many possible combinations of political economic or cultural struggles in ethnic conflicts Even in nations where such conflict is minimal Nash warns ethnicity remains a reservoir of turbulence in a world where power wealth and dignity are unevenly and illegitimately distributed

Great Religions of the Modern World Edward Jabra Jurji, 2015-12-08 Here is the answer to the desire of many thoughtful laymen for an intelligent appraisal of the great contemporary faiths This is not a reference book but a group of essays for the general reader on the idea the spiritual core of the chief religions of the modern day Each essay is written simply and objectively by an eminent scholar with the authority that is the fruit of a lifetime study of his subject Fidelity to the classical tenets of each religion and a desire to permit each to speak for itself are salient features of the work of these men They collaborated on the fundamental outline of the book with the result that it is well integrated not a random collection of articles Recent events in China Palestine India Indonesia Japan and many other parts of the globe lend a special interest to the subject at this time but this is not a book on current events It takes a larger view and is a study of religion in its widest connotations as a potent force in history and as a meaningful influence in the world today Originally published in 1946 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
